Motorized Obsessions-Paul R. Josephson 2007-08-22 From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.

Braxton Bragg-Earl J. Hess 2016-09-02 As a leading Confederate general, Braxton Bragg (1817-1876) earned a reputation for incompetence, for wantonly shooting his own soldiers, and for losing battles. This public image established him not only as a scapegoat for the South's military failures but also as the chief whipping boy of the Confederacy. The strongly negative opinions of Bragg's contemporaries have continued to color assessments of the general's military career and character by generations of historians. Rather than take these assessments at face value, Earl J. Hess's biography offers a much more balanced account of Bragg, the man and the officer. While Hess analyzes Bragg's many campaigns and battles, he also emphasizes how his contemporaries viewed his successes and failures and how these reactions affected Bragg both personally and professionally. The testimony and opinions of other members of the Confederate army—including Bragg's superiors, his fellow generals, and his subordinates—reveal how the general became a symbol for the larger military failures that undid the Confederacy. By connecting the general's personal life to his military career, Hess positions Bragg as a figure saddled with unwarranted infamy and humanizes him as a flawed yet misunderstood figure in Civil War history.

Navigating a world filled with abnormal children and clandestine snake handlers, one that is slowly being poisoned by illegal moonshine, Shad must pierce the townsfolk's superstitions and terrible secrets to find out the truth about his sister's death. But the Blood Dreams he's suffered from since childhood have taken on an eerie urgency, revealing to Shad the nightmarish form of an unseen adversary. Manual for Museums-Ralph H. Lewis 2005-01-01 Among the most important contributions the National Park Service has made since its founding in 1916 has been the development of extraordinary museum technology and administration—national in scope and international in influence. This manual, a distillation of

what many persons have learned about the day-to-day operations of museums, is meant to provide curatorial standards and serve as a reference for museum workers everywhere. This book was written by Ralph H. Lewis, an outstanding museum administrator and curator with many years of experience in the National Park Service. It is an outgrowth of an earlier (1941) volume entitled *Field Manual for Museums* by Ned J. Burns, a work that went out of print during World War II and is, even to this day, in demand by curators and museum managers. In this present manual, Mr. Lewis carries on a tradition of excellence in museum practice that can be traced back to the mid-1930's when Carl P. Russell set the basic pattern for museum work in the national parks. In those early years most park museums could not afford or were too small to engage a full time professional museum staff. Dr. Russell set up centralized laboratories staffed by curators and preparators and provided the parks with exhibition and preservation expertise from this pool. The ordinary maintenance and operation of the museums were left to the superintendents who managed the parks, and to the archeologists, historians and naturalists who interpreted them.
