Faster, Higher, Farther-Jack Ewing 2018-04-05 A shocking exposé of Volkswagen's fraud by the New York Times reporter who covered the scandal. Updated with a New Afterword by the Author. When news of Volkswagen's clean diesel fraud first broke in September 2015, it sent shockwaves around the world. Overnight, the company long associated with quality, reliability and trust became a universal symbol of greed and deception. Consumers were outraged, investors panicked, the company embarrassed and facing bankruptcy. As lawsuits and criminal investigations piled up, by August 2016 VW had settled with American regulators and car-owners for \$15 billion, with additional fines and claims still looming. In Faster, Higher, Farther, Jack Ewing rips the lid off the scandal. He describes VW's rise from "the people's car" during the Nazi era to one of Germany's most prestigious and important global brands, touted for being "green." He paints vivid portraits of Volkswagen chairman Ferdinand Piëch and chief executive Martin Winterkorn, arguing that their unremitting ambition drove employees, working feverishly in pursuit of impossible sales targets, to illegal methods. With unprecedented access to key players and a ringside seat during the course of the legal proceedings, Faster, Higher, Farther reveals how the succeed-at-all-costs culture prevalent in modern boardrooms led to one of corporate history's farthest-reaching cases of fraud--with potentially devastating consequences. As the future of one of the world's biggest companies remains uncertain, this is the extraordinary story of Volkswagen's downfall.

The Complete Book of Classic Volkswagens-John Gunnell 2017-06-20 Volkswagen Beetles and their variants are some of the most iconic and easily recognizable cars on the road! The classic air-cooled Volkswagen Beetle, officially the Volkswagen Type 1, is regarded as one of the most important and well-engineered vehicles of the twentieth century. It was the most popular imported car in America in the 1960s, and before that it enjoyed a humble beginning as "the people's car" in its native Germany. The Complete Book of Classic Volkswagens encompasses the evolution of the popular Beetle as well as other variations of Volkswagen's air-cooled cars, vans, and trucks. Thoroughly illustrated, this is an invaluable reference to Volkswagen's collectible and iconic cars. The history of VW automobiles is just as colorful as the hues they were manufactured in, and this book illustrates the full story. German automakers originally sought to supply their countrymen with an automobile that was easy to mass produce. By 1938, they finalized the design for the VW "Bug"--the first rear-engineed, rear-wheel-drive configured car. In its heyday, the little rounded Beetle was produced at a rate of more than one million per year. Today, with more than 23 million cars built, the Beetle holds the record as the most-produced passenger car of all time. But the Beetle is only one part of the air-cooled Volkswagen story. The rest--from Type 2 vans, pick-ups, and campers to the Type 113 "Super Beetle"--is included here. If you're the owner of a Volkswagen or if you just love their iconic look and you're interested in their evolution, this book deserves a place on your bookshelf.

Power, Process and Participation-Rachel Slocum 1995 This book focuses on participatory capacity-building in ways that address the practical needs and strategic interests of the disadvantaged and disempowered - it examines how differences in class, ethnicity, race, caste, religion, age and gender lead to the 'politics of exclusion'. It offers innovative, accessible tools to enable facilitators from both inside and outside communities to empower those who are frequently omitted from decision-making processes. The style and approach are interactive, stimulating reflection and involvement by all parties. Power, Process and Participation aims to enable facilitators from inside and outside communities to involve and empower those commonly excluded in decision making processes. It provides a balanced overview of how 'participation' has been used in this context and raises the questions that all those involved in this type of activity should ask themselves. There are three distinct sections: Part 1: Definitions, history and issues - which provides an overview of some of the broad issues underlying the themes addressed in this book. A useful brief history is given of well known participatory methodologies and key questions are asked on the use and misuse of 'participation': whose ends does it serve, who is involved and what are the power relations, appropriate time frames and scale and how should it proceed in order to best serve the interests of the people involved? Part 2: Methods and ethics in our research and our use of the mediaN251pp - Whose expertise counts? How is it acknowledged? These are explored in the context of contributors' experience of undertaking research with women in Zimbabwe. Questions of ownership and consent as well as other issues are discussed further in the context of the use of video in participatory communication. Part 3: Tools for environmental and social change - The longest section in the book gives 35 tools and how to use them in facilitating participation. An introductory session explains how to use the section. Tools are cross referenced and for each the purpose, materials, process and estimated time is provided. For a number of the tools, examples of how they have been used in practice are included. Power, Process and Participation describes itself as a manual and although it does not immediately look like one, it is readable, logically arranged and combines instructions on how tools can be used with examples of how they have been used in practice. There are notes on how to use the book and how to choose from the tools offered. This book would be useful to anyone looking for both an overview of participation and how it can be used and misused; and guidance on facilitating the process.

Before Monsters Were Made-Ross Dungan 2015-06-08 You see, people forever say history is written by the victors. It's not. It's written by those who can shape the simplest narrative. David is a man struggling to hold together his marriage when the small town he lives in is rocked by the sudden, untimely death of a local girl. As details are uncovered, rumours and talk take hold of the town, and start to force David to revisit old memories. Set in 1960s Ireland, Before Monsters Were Made tells the story of how a few small words can have a very big impact. When suspicion and old stories start to spread like a virus, how well do we know the people we trust the most? Can we ever know what goes on inside other people's lives? And do we really want to? Before Monsters Were Made is an unnerving and moving thriller about loyalty, lies and love.
Transitions to Alternative Vehicles and Fuels-National Research Council 2013-04-14 For a century, almost all light-duty vehicles (LDVs) have been powered by internal combustion engines operating on petroleum fuels. Energy security concerns about petroleum imports and the effect of greenhouse gas (GHG) emissions on global climate are driving interest in alternatives. Transitions to Alternative Vehicles and Fuels assesses the potential for reducing petroleum consumption and GHG emissions by 80 percent across the U.S. LDV fleet by 2050, relative to 2005. This report examines the current capability and estimated future performance and costs for each vehicle type and non-petroleum-based fuel technology as options that could significantly contribute to these goals. By analyzing scenarios that combine various fuel and vehicle pathways, the report also identifies barriers to implementation of these technologies and suggests policies to achieve the desired reductions. Several scenarios are promising, but strong, and effective policies such as research and development, subsidies, energy taxes, or regulations will be necessary to overcome barriers, such as cost and consumer choice.
