Accounting and Financial System Reform in Eastern Europe and Asia-Robert W. McGee 2006-03-14 Much has been written about the economic and political problems of countries that are in the process of changing from centrally planned systems to market systems. Most studies have focused on the economic, legal, political and sociological problems these economies have had to face during the transition period. However, not much has been written about the dramatic changes that have to be made to the accounting and financial system of a transition economy. This book was written to help fill that gap. This book is the second in a series to examine accounting and financial system reform in transition economies. The first book used Russia as a case study. The present volume in the series examines some additional aspects of the reform in Russia and also looks at the accounting and financial system reform efforts that are being made in Ukraine, Bosnia & Herzegovina, Armenia and five Central Asian republics.

The Integrated Reporting Movement-Robert G. Eccles 2014-10-20 An in-depth, enlightening look at the integrated reporting movement The Integrated Reporting Movement explores the meaning of the concept, explains the forces that provide momentum to the associated movement, and examines the motives of the actors involved. The book posits integrated reporting as a key mechanism by which companies can ensure their own long-term sustainability by contributing to a sustainable society. Although integrated reporting has seen substantial development due to the support of companies, investors, and the initiatives of a number of NGOs, widespread regulatory intervention has yet to materialize. Outside of South Africa, adoption remains voluntary, accomplished via social movement abetted, to varying degrees, by market forces. In considering integrated reporting's current state of play, the authors provide guidance to ensure wider adoption of the practice and success of the movement, starting with how companies can improve their own reporting processes. But the support of investors, regulators, and NGOs is also important. All will benefit, as will society as a whole. Readers will learn how integrated reporting has evolved over the years, where frameworks and standards are today, and the practices that help ensure effective implementation—including, but not limited to an extensive discussion of information technology's role in reporting and the importance of corporate reporting websites. The authors introduce the concepts of an annual board of directors' "Statement of Significant Audiences and Materiality" and a "Sustainable Value Matrix" tool that translates the statement into management decisions. The book argues that the appropriate combination of market and regulatory forces to speed adoption will vary by country, concluding with four specific recommendations about what must be done to accelerate high quality adoption of integrated reporting around the world.

Accounting Certification, Educational, & Reciprocity Requirements-Jack R. Fay 1992 This unique international guide presents up-to-date, factual data on professional accounting throughout the world. It contains the certification requirements, responsibilities and activities of professional accountants, and information on accounting organizations and periodicals in over 100 countries. With current emphasis on globalization by many industrial and service organizations, accounting firms, and universities, the author has provided a resource for all those who participate in or who are interested in learning about globalization. Based on responses to his worldwide survey and other sources of information, the author presents material on reciprocity for professional accountants (the present state-of-the-art status of such policies); certification requirements for various levels or categories of professional accountants in different countries; primary functions of the professional accountants and the types of documents reviewed by them in various countries; current requirements for continuous education; names and addresses of organizations which control or supervise the accounting program in each country; and ethical standards for professional accountants. This guide book provides a wealth of information for consultants and executives involved, directly or indirectly, in globalization and could easily be used as supplementary reading in college-level international accounting and business courses.
