Record-Breaking Animals-Daniel Gilpin 2011-08 Describes some of the world records held by animals, including the largest mammal, the fastest bird, and the deadliest animal. Experiencing Service-Learning-Robert F. Kronick 2011-06-30 A unique resource for students and professors alike, this book reveals the important practical, educational, and emotional benefits provided by college programs that allow students to help others through service work in inner-city classrooms, clinics, and other challenging environments. Filled with vivid first-person reflections by students, Experiencing Service-Learning emphasizes learning by doing, getting into the field, sharing what one sees with colleagues, and interpreting what one learns. As the authors make clear, service-learning is not a spectator sport. It takes students "away from the routines and comfort zones of lecture, test, term paper, exam" and puts them into the world. Service-learning requires them to engage actively with cultures that may be unfamiliar to them and to be introspective about their successes and their mistakes. At the same time, it demands of their instructors "something other than Power-Point slides or an eloquently delivered lecture," as no teacher can predict in advance the questions their students' experiences will raise. In service-learning, students and teacher must act together as a team of motivators, problem solvers, and change agents. While most of its personal vignettes come from service-learners who have worked as mentors in elementary schools, the book also includes a chapter in which coauthor Michele Gourley describes at length her experiences at a faith-based health clinic in Honduras. In offering such stories—along with a succinct introduction to basic concepts, an assessment of how service-learners can effect transformational change, and project examples—this text will not only prepare students for the adventures of service-learning but also aid professors and administrators tasked with developing service-learning courses and programs. Robert F. Kronick is a professor of educational psychology and counseling at the University of Tennessee-Knoxville and the author of Full Service Community Schools. Robert B. Cunningham is a professor emeritus of political science at the University of Tennessee-Knoxville. His books include Agendas and Decisions: How State Government Executives and Middle Managers Make and Administer Policy, coauthored with Dorothy F. Olshfski. Michele Courley is a physician and public health professional with a background in rural community health and state health policy. Boundary Breaking-Kay W. Allen 1995 Speak-Laurie Halse Anderson 2011-05-10 The first ten lies they tell you in high school. "Speak up for yourself--we want to know what you have to say." From the first moment of her freshman year at Merryweather High, Melinda knows this is a big fat lie, part of the nonsense of high school. She is friendless, outcast, because she busted an end-of-summer party by calling the cops, so now nobody will talk to her, let alone listen to her. As time passes, she becomes increasingly isolated and practically stops talking altogether. Only her art class offers any solace, and it is through her work on an art project that she is finally able to face what really happened at that terrible party: she was raped by an upperclassman, a guy who still attends Merryweather and is still a threat to her. Her healing process has just begun when she has another violent encounter with him. But this time Melinda fights back, refuses to be silent, and thereby achieves a measure of vindication. In Laurie Halse Anderson's powerful novel, an utterly believable heroine with a bitterly ironic voice delivers a blow to the hypocritical world of high school. She speaks for many a disenfranchised teenager while demonstrating the importance of speaking up for oneself. Speak was a 1999 National Book Award Finalist for Young People's Literature. Anthem-Ayn Rand 2020-12-01 Equality 7-2521 finds himself out of step with the collectivist society of the future, and discovers a means to freedom in Ayn Rand's fable of the individual in conflict with society. First published in 1938, Anthem takes place in a dystopian future world in which humanity is enduring a new dark age, human life is regimented in every respect and personal identity has been all but snuffed out by a totalitarian government. The narrator, writing his story in secret, realizes he is a criminal simply for having thoughts of his own. Exploring the ruins of a previous civilization he discovers relics, conducts forbidden experiments and learns enough to question the very structure of his society. Can he share this knowledge with his fellow citizens? The author strips the relationship of humanity to civilization down to its bare essence in this modern parable that starkly illuminates the challenge an oppressive government presents to individuality. With an eye-catching new cover, and professionally typeset manuscript, this edition of Anthem is both modern and readable. The ALPS Resource Book-Alistair Smith 2001-05-01 >

Statistical Theories of Mental Test Scores-Frederic M. Lord 2008-11-01 One of the most important books in the history of psychometrics has been virtually unavailable to scholars and students for decades. A gap in the archives of modern test theory is now being filled by the release in paperback for the first time of the classic text, Statistical Theories of Mental Test Scores, by the late and honored statisticians and psychometricians, Frederic M. Curriculum in Early Childhood Education-Nancy File 2012-01-30 Curriculum in Early Childhood Education: Reexamined, Rediscovered, Renewed provides a critical examination of the sources, aims, and features of early childhood curricula. Providing a theoretical and philosophical foundation for examining teaching and learning, this book will provoke discussion and analysis among all readers. How has theory been used to understand, develop, and critique curriculum? Whose perspectives are dominant and whose are ignored? How is diversity addressed? What values are explicit and implicit? The book first contextualizes the historical and research base of early childhood curriculum, and then turns to discussions of various schools of theory and philosophy that have served to support curriculum development in early childhood education. An examination of current curriculum frameworks is offered, both from the US and abroad, including discussion of the Project Approach, Creative Curriculum, Te Whāriki, and Reggio Emilia. Finally, the book closes with chapters that enlarge the topic to curriculum-being-enacted through play and that summarize key issues while pointing out future directions for the field. Offering a broad foundation for examining curriculum in early childhood, readers will emerge with a stronger understanding of how theories and philosophies intersect with curriculum development. Farewell to Manzanar-Jeanne Wakatsuki Houston 2002-04-29 During World War II a community called Manzanar was hastily created in the high mountain desert country of California, east of the Sierras. Its purpose was to house thousands of Japanese American internees. One of the first families to arrive was the Wakatsukis, who were ordered to leave their fishing business in Long Beach and take with them only the belongings they could carry. For Jeanne Wakatsuki, a seven-year-old child, Manzanar became a way of life in which she struggled and adapted, observed and grew. For her father it was essentially the end of his life. At age thirty-seven, Jeanne Wakatsuki Houston recalls life at Manzanar through the eyes of the child she was. She tells of her fear, confusion, and bewilderment as well as the dignity and great resourcefulness of people in oppressive and demeaning circumstances. Written with her husband, Jeanne delivers a powerful first-person account that reveals her search for the meaning of Manzanar. Farewell to Manzanar has become a staple of curriculum in schools and on campuses across the country. Last year the San Francisco Chronicle named it one of the twentieth century's 100 best nonfiction books from west of the Rockies. First published in 1973, this new edition of the classic memoir of a devastating Japanese American experience includes an inspiring afterword by the authors.

Night-Elie Wiesel 2012-05-03 Born into a Jewish ghetto in Hungary, as a child, Elie Wiesel was sent to the Nazi concentration camps at Auschwitz and Buchenwald. This is his account of that atrocity: the ever-increasing horrors he endured, the loss of his family and his struggle to survive in a world that stripped him of humanity, dignity and faith. Describing in simple terms the tragic murder of a people from a survivor's perspective, Night is among the most personal, intimate and poignant of all accounts of the Holocaust. A compelling consideration of the darkest side of human nature and the enduring power of hope, it remains one of the most important works of the twentieth century. New translation by Marion Wiesel, with a new introduction by Elie Wiesel.
