mHealth Multidisciplinary Verticals-Sasan Adibi 2014-11-21 An in-depth overview of the emerging concept; Mobile Health (mHealth), mHealth Multidisciplinary Verticals links applications and technologies to key market and vendor players. It also highlights interdependencies and synergies between various stakeholders which drive the research forces behind mHealth. The book explores the trends and directions where this vertical market is headed. Divided into nine sections, the book covers a number of multidisciplinary verticals within the field of mHealth such as: Preventive and curative medicine Consumer and patient-centric approaches Psychological, behavioral, and mental verticals Social perspectives Education, adoption, and acceptance Aged care and the aging population Regional, geographical, and public-health perspectives Technology implications Cloud applications The book collates emerging and diverse mHealth applications into a single resource. The result of extensive research, the book is a collaborative effort between experts from more than 20 countries, who have been carefully reviewed and selected by the team of reviewers. It takes a multidisciplinary approach to health informatics and provides a roadmap to current and future directions of mHealth.

Just a Spoonful of Laughter Helps the Medicine Go Down-Richard D. Edgerly, MD 2011-03-29 Just a Spoon Full of Laughter...is a great read for anyone that's been to a doctors office and made it out alive. Written by an actual physician, it will keep you in stitches (no pun intended) from one story to the next. See for yourself what could be so funny about the physician office visit. Whether it's recalling his first sigmoidoscopy or performing an autopsy, you'll keep this riveting series of short humorous stories right there in the bathroom for pleasurable reading. You may even find yourself somewhere between the pages. From an author who will never be a New York Times Best Seller, it's a great book for young or old, male or female, professional or not. It's especially ideal for that person in your life who has everything except a sense of humor. It's ideal as a stocking stuffer, white elephant gift or for future yard sales. "The funniest book I ever read." Says Dr. Zhivago "Yes! Yes! Yes!" Says Dr. No

Sulfites, Selenites & Tellurites-M.R. Masson 2013-10-22 This volume presents compilations and critical evaluations of reported solubility data for a wide range of compounds, including binary, ternary and more complex systems. The entire literature up to 1984 has been covered. Rigorous statistical procedures have been applied in the evaluations. For many of the ternary systems and some quaternary ones, computer-drawn phase diagrams are included (prepared to the same scale where possible to allow easy comparison).

The Mobile Application Hacker's Handbook-Dominic Chell 2015-06-11 See your app through a hacker's eyes to find the real sources of vulnerability The Mobile Application Hacker's Handbook is a comprehensive guide to securing all mobile applications by approaching the issue from a hacker's point of view. Heavily practical, this book provides expert guidance toward discovering and exploiting flaws in mobile applications on the iOS, Android, Blackberry, and Windows Phone platforms. You will learn a proven methodology for approaching mobile application assessments, and the techniques used to prevent, disrupt, and remediate the various types of attacks. Coverage includes data storage, cryptography, transport layers, data leakage, injection attacks, runtime manipulation, security controls, and cross-platform apps, with vulnerabilities highlighted and detailed information on the methods hackers use to get around standard security. Mobile applications are widely used in the consumer and enterprise markets to process and/or store sensitive data. There is currently little published on the topic of mobile security, but with over a million apps in the Apple App Store alone, the attack surface is significant. This book helps you secure mobile apps by demonstrating the ways in which hackers exploit weak points and flaws to gain access to data. Understand the ways data can be stored, and how cryptography is defeated Set up an environment for identifying insecurities and the data leakages that arise Develop extensions to bypass security controls and perform injection attacks Learn the different attacks that apply specifically to cross-platform apps IT security breaches have made big headlines, with millions of consumers vulnerable as major corporations come under attack. Learning the tricks of the hacker's trade allows security professionals to lock the app up tight. For better mobile security and less vulnerable data, The Mobile Application Hacker's Handbook is a practical, comprehensive guide.

International Handbook of Mathematical Learning Difficulties-Annemarie Fritz 2019-01-30 This comprehensive volume provides teachers, researchers and education professionals with cutting edge knowledge developed in the last decades by the educational, behavioural and neurosciences, integrating cognitive, developmental and socioeconomic approaches to deal with the problems children face in learning mathematics. The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades, but the most part of this research has been conducted in non-applied settings and there's still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings. Now it's time to bring the results from the laboratory to the classroom. Apart from bringing the theoretical discussions to educational settings, the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments. It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues. And it does so from an international perspective, dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world. All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society.

A First Course in Design and Analysis of Experiments-Gary W. Oehlert 2000-01-19 Oehlert's text is suitable for either a service course for non-statistics graduate students or for statistics majors. Unlike most texts for the one-term grad/upper level course on experimental design, Oehlert's new book offers a superb balance of both analysis and design, presenting three practical themes to students: • when to use various designs • how to analyze the results • how to recognize various design options Also, unlike other older texts, the book is fully oriented toward the use of statistical software in analyzing experiments.

Alternative Medicine for the Elderly-P. Cherniack 2013-04-18 The explosion of information about complementary and alternative medicine (CAM) has demanded the attention of health professionals and responsible consumers, in cluding the elderly. Increasingly, medical schools are providing education about CAM. This book brings together for academicians and interested mainstream practitio ners much of the current information on CAM and its role in the health of the elderly. The individual chapters are thoroughly researched and quite readable, even for patients and the lay public concerned with the state of the evidence and art supporting CAM's role in prevention and management of illness and well-being. This book provides edu cators with much necessary information needed to prepare coursework and learning activities. Although definitive data are lacking regarding efficacy and even safety of CAM methodologies, many chapters in this book summarize the existing evidence in a us able way. The topics analyzed range from well-accepted therapies, such as vitamin E for dementia and zinc tablets for the common cold, to far less conventional therapies such as transcendental meditation. The conclusions are often surprising, but well-presented and defended. Even the most highly controversial areas, such as the use of acupuncture to treat low back pain and osteoarthritis of the knee, are thoroughly and fairly re viewed. Finally, the chapters address some of the political issues that challenge CAM. These issues include who should be allowed to practice a CAM discipline whose efficacy is not based on the scientific method, and some of the state-to-state variations in prac tice standards and licensure.

Nutrition and Eye Health-John Lawrenson 2020-01-03 Blindness and visual impairment impact significantly on an individual's physical and mental well-being. Loss of vision is a global health problem, with approximately 250 million of the world's population currently living with vision loss, of which 36 million are classified as blind. Visual impairment is more frequent in the elderly, with cataract and age-related macular degeneration (AMD) accounting for over 50% of cases globally. Oxidative stress has been strongly implicated in the pathogenesis of both conditions, and consequently the role of nutritional factors, in particular carotenoids and micronutrient antioxidants, have been investigated as possible preventative or therapeutic strategies. Dry eye syndrome (DES) is one of the most common ophthalmic conditions in the world. DES occurs where the eye does not produce enough tears and/or the tears evaporate too quicklyleading to discomfort and varying degrees of visual disturbance. There has recently been a great deal of interest in the potential for oral or topical supplementation with essential fatty acids (EFAs), specifically omega-3 and omega-6 fatty acids, as an adjunct to conventional treatments for DES. The objective of this Special Issue on 'Nutrition and Eye Health' is to publish papers describing the role of nutrition in maintaining eye health and the use of nutritional

interventions to prevent or treat ocular disease. A particular (but not exclusive) emphasis will be on papers (reviews and/or clinical or experimental studies) relating to cataract, AMD and DES.

Essentials of Strategic Management-Charles W. L. Hill 2011-04-19 Thorough yet concise, ESSENTIALS OF STRATEGIC MANAGEMENT, Third Edition, is a brief version of the authors' market-leading text STRATEGIC MANAGEMENT: AN INTEGRATED APPROACH. Following the same framework as the larger book, ESSENTIALS helps students identify and focus on core concepts in the field in a more succinct, streamlined format. Based on real-world practices and current thinking, the text's presentation of strategic management features an increased emphasis on the business model concept as a way of framing the issues of competitive advantage. Cutting-edge research, new strategic management theory, and a hands-on approach allow students to explore major topics in management, including corporate performance, governance, strategic leadership, technology, and business ethics. In addition, a high-quality case program examines small, medium, and large companies--both domestic and international--so that students gain experience putting chapter concepts into real-world practice in a variety of scenarios. Expectations and Aspirations-Safaa El Tayeb El-Kogali 2019-10-21 Education, which has been at the heart of the Middle East and North Africa (MENA) region's history and civilizations for centuries, has a large untapped potential to contribute to human capital, well-being, and wealth. The region has invested heavily in education for decades, but it has not been able to reap the benefits of its investments. Despite a series of reforms, MENA has remained stuck in a low-learning, low-skills level. Expectations and Aspirations: A New Framework for Education in the Middle East and North Africa identifies four key sets of tensions that are holding back education in the region: credentials and skills, discipline and inquiry, control and autonomy, and tradition and modernity. These tensions are shaped by society and are reflected in classrooms. If they are not addressed, MENA will continue to operate at a level below its potential. This report outlines a new framework with a three-pronged approach that can help address these tensions and unleash the potential of education in MENA: • A concerted push for learning that starts early for all children regardless of background, with qualified and motivated educators, and that leverages technology, uses modern approaches, and monitors learning outcomes • A stronger pull for skills by all stakeholders in the labor market and society that involves coordinated multisystem reforms within and beyond the education system • A new pact for education at the national level with a unified vision, shared responsibilities, and accountabilities. Education is not just the responsibility of the education system—it is everyone's business. The push, pull, and pact framework offers an opportunity for MENA to move forward to reclaim its heritage of a learned region and to meet the expectations and aspirations of its people. The current situation in MENA requires a renewed focus on education, not just as a national priority for economic growth and social development, but as a national emergency for stability, peace, and prosperity.

Child and Adolescent Drug and Substance Abuse-Louis A. Pagliaro 2019-11-01 By offering unique analysis and synthesis of theory, empirical research, and clinical guidance in an up-to-date and unbiased context, this book assists health and social care professionals in understanding the use of drugs and substances of abuse by children and adolescents. A comprehensive reference for health and social care professionals, the book identifies and corrects related false narratives and, with the use of the authors' combined experience of over 70 years of clinical and academic experience in drug and substance abuse, provides current pharmacotherapeutic and psychotherapeutic approaches for the treatment of alcohol or other dependence or use disorders among children and adolescents. The book also provides a useful reference for identifying brand/trade and street names of the drugs and substances of abuse commonly used by children and adolescents. Also included is a comprehensive, cross-referenced subject index. Clear, comprehensive, accessible, and fully referenced, this book will be an invaluable resource for professionals and students who aim to treat children and adolescents. Child and Adolescent Drug and Substance Abuse is the 19th clinical pharmacology and therapeutic text that the Pagliaros have written over the past 40 years and is the sixth that deals exclusively with drug and substance abuse.

Flora of the Pacific Northwest-C. Leo Hitchcock 2018-09-17 Flora of the Pacific Northwest, first published in 1973, became an instant classic for its innovative style of providing species descriptions in the identification keys, and for its comprehensive illustrations of nearly all treated taxa (species, subspecies, and varieties). Students rely on it as an essential primer, while veteran botanists and natural resource managers use it as the definitive reference for the region�s flora. This completely revised and updated edition captures the advances in vascular plant systematics over the decades since publication of the first edition. These advances, together with significant changes in plant nomenclature, the description of taxa new to science from the region, and the recent documentation of new native and nonnative species in the Pacific Northwest required a thorough revision of this authoritative work. Flora of the Pacific Northwest covers all of Washington, the northern half of Oregon, Idaho north of the Snake River Plain, the mountainous portion of western Montana, and the southern portion of British Columbia. It accounts for the wild-growing native and introduced vascular plants falling within those boundaries and includes: Treatment of 5,545 taxa (more than 1,000 taxa added from the first edition) Illustrations for 4,716 taxa (1,382 more than the first edition) Nomenclature changes for more than 40 percent of the taxa included in the first edition These enhancements make this new edition the most comprehensive reference on Pacific Northwest vascular plants for professional and amateur botanists, ecologists, rare plant biologists, plant taxonomy instructors, land managers, nursery professionals, and gardeners.

Education and Technology for a Better World-Arthur Tatnall 2009-07-03 Education and Technology for a Better World was the main theme for WCCE 2009. The conference highlights and explores different perspectives of this theme, covering all levels of formal education as well as informal learning and societal aspects of education. The conference was open to everyone involved in education and training. Additionally players from technological, societal, business and political fields outside education were invited to make relevant contributions within the theme: Education and Technology for a Better World. For several years the WCCE (World Conference on Computers in Education) has brought benefits to the fields of computer science and computers and education as well as to their communities. The contributions at WCCE include research projects and good practice presented in different formats from full papers to posters, demonstrations, panels, workshops and symposiums. The focus is not only on presentations of accepted contributions but also on discussions and input from all participants. The main goal of these conferences is to provide a forum for the discussion of ideas in all areas of computer science and human learning. They create a unique environment in which researchers and practitioners in the fields of computer science and human learning can interact, exchanging theories, experiments, techniques, applications and evaluations of initiatives supporting new developments that are potentially relevant for the development of these fields. They intend to serve as reference guidelines for the research community.

Withdrawing Under Fire-Joshua L. Gleis 2011-04-30 The post-9/11 world has witnessed a rebirth of irregular and asymmetrical warfare, which, in turn, has led to an increase in conflicts between conventional armies and non-state armed groups. In their haste to respond to the threat from insurgencies, nations often fail to plan effectively not only for combat operations but also for withdrawal, which is inevitable, win or lose. In order to answer the question of how to withdraw from engagement with an insurgency, Gleis examines how insurgencies are conducted and what, if anything, is unique about an Islamist insurgency. He then proposes ways to combat these groups successfully and to disentangle one's military forces from the war once strategic objectives have been met—or once it is clear that they cannot be. Because this type of warfare is dynamic and ever-changing, this book is not meant to suggest a set of cookie-cutter solutions for how to withdraw from insurgencies. Rather, the author analyzes six counterinsurgency operations that have taken place in the past, with the intention of gleaning from them as many lessons as possible to better prepare for future withdrawals.The literature on how wars end has failed to explore irregular warfare.This much needed reexamination serves as an indispensable starting point.

Monitoring Bird Populations by Point Counts-C. John Ralph 1998-05 Point counts of birds are the most widely used quantitative method and involve an observer recording birds from a single point for a standardized time period. In response to the need for standardization of methods to monitor bird populations by census, researchers met to present data from various investigations working under a wide variety of conditions, and to examine various aspects of point count methodology. Statistical aspects of sampling and analysis were discussed and applied to the objectives of point counts. The final chapter presents these standards and their applications to point count methodology.

Military English Tactical and Peacekeeping Operations-Robert Buckmaster 2019-06-24 Military English: English for Tactical and Peacekeeping Operations is a pre-deployment course for Army personnel who are to be sent on multinational peace support operations or on training courses in an English language speaking country, or are to be trained by English-speaking instructors. Your students should already have studied up to a pre-intermediate level [Common European Framework A2] before starting the course - that is they should be ready for an Intermediate/ B1 Level course. There are four components to the course: 1: A Coursebook (this component) with 200 lesson-units, providing over 200 hours of study materials including vocabulary learning tasks, reading and listening tasks, briefings, role plays and other speaking tasks. 2: A Workbook, which includes a grammar reference and study pages, peacekeeping reading tasks, writing tasks, abbreviations and acronym study pages, patrol report forms etc., consolidation tasks, a mini dictionary, key vocabulary pages, and key tactical verbs. 3: A Teacher's Book with full instructions on teaching the course, and coursebook and workbook task keys. 4: Downloadable colour pictures, maps, PowerPoint Presentations and audio files, and audio transcripts for use on phones, tablets or computers. These can be freely downloaded and shared with all students. Course Overview: There are three Phases to the Course. Phase One of the course is a series of intertwined threads of General English units, General Military English units and some Specialised Military English units. Phase Two is blocks of units of Specialised Military English, and General English with a Military Application. Phase Three revises and activates the Specialised Military English of Phase One and Two and adds Peacekeeping English. Course Aims: This course is designed to teach soldiers (enlisted men, NCOs and junior officers) how to operate effectively in multinational tactical and peacekeeping operations. By the end of the course the students should be able to do the following in English: Interpersonal Skills: Talk about their families * Talk about their careers * Talk about their homes * Talk about their leisure interests e.g. hobbies, sports, films and music * Socialise e.g. make arrangements to meet * Ask and answer questions * Give personal opinions on topics like personal equipment. Professional Skills: Understand and use common acronyms * Use the NATO/Phonetic Alphabet * Tell the time * Talk about the weather and climate * Talk about their army and unit structure and purpose * Talk about their training * Make radio calls including MEDEVAC/CASEVAC * Understand Tactical Combat Casualty Care * Understand land navigation * Describe rural and urban terrain * Describe people and clothing * Give a short professional briefing supported by visuals * Understand ROE * Describe bases * Understand and describe convoy operations * Understand and describe checkpoint operations * Understand and describe the use of observation posts * Understand and describe patrol operations * Understand [and give] orders [Patrol Orders, WARNO, OPORD] * Understand the differences between tactical and peacekeeping missions, patrols, ROE, OPs, checkpoints, and convoys * Understand and propose solutions to common survival situations * Understand and propose solutions to common tactical and peacekeeping problems * Write a short report. The course has an open and clear methodology, built in revision tasks and essential practice in the five core area for tactical and peacekeeping operations: understanding briefings and orders, convoy and checkpoint operations, and patrolling. Each Phase has built in tests, and the whole course builds up your students confidence in using Military English, and develops their listening and speaking skills so they can operate effectively in training situations and on missions.

The History of Medical Informatics in the United States-Morris F. Collen 2015-10-08 This is a meticulously detailed chronological record of significant events in the history of medical informatics and their impact on direct patient care and clinical research, offering a representative sampling of published contributions to the field. The History of Medical Informatics in the United States has been restructured within this new edition, reflecting the transformation medical informatics has undergone in the years since 1990. The systems that were once exclusively institutionally driven – hospital, multihospital, and outpatient information systems – are today joined by systems that are driven by clinical subspecialties, nursing, pathology, clinical laboratory, pharmacy, imaging, and more. At the core is the person – not the clinician, not the institution – whose health all these systems are designed to serve. A group of world-renowned authors have joined forces with Dr Marion Ball to bring Dr Collen's incredible work to press. These recognized leaders in medical informatics, many of whom are recipients of the Morris F. Collen Award in Medical Informatics and were friends of or mentored by Dr Collen, carefully reviewed, editing and updating his draft chapters. This has resulted in the most thorough history of the subject imaginable, and also provides readers with a roadmap for the subject well into later in the century.

Broadband Strategies Handbook-Tim Kelly 2012-03-16 This guide identifies issues and challenges in broadband development, analyzing potential solutions to consider, and providing practical examples from countries that have addressed broadband-related matters.

Infotech Teacher's Book-Santiago Remacha Esteras 1999-07-15 Infotech, second edition, is a comprehensive course for intermediate level learners who need to be able to understand the English of computing for study and work. Thoroughly revised by the same author it offers up to date material on this fast moving area. The course does not require a specialist knowledge of computers on either the part of the student or the teacher. The 30 units are organized into seven thematically linked sections and cover a range of subject matter, from Input/output devices for the disabled to Multimedia and Internet issues. Key features of the Teacher's Book: - exhausative support for the teacher, with technical help where needed - a photocopiable extra activities section - answer key and tapescripts

My Samsung Galaxy S7-Craig James Johnston 2016-06-27 Full-color, step-by-step tasks walk you through getting and keeping your Samsung Galaxy S7 or S7 edge working just the way you want. Nondestructive Evaluation of Wood-Forest Service (U S) 2015 This report summarizes information on nondestructive testing and evaluation of wood. It includes information on a wide range of nondestructive assessment technologies and their uses for evaluating various wood products.

Modern Approaches for Intelligent Information and Database Systems-Andrzej Sieminski 2018-02-23 This book offers a unique blend of reports on both theoretical models and their applications in the area of Intelligent Information and Database Systems. The reports cover a broad range of research topics, including advanced learning techniques, knowledge engineering, Natural Language Processing (NLP), decision support systems, Internet of things (IoT), computer vision, and tools and techniques for Intelligent Information Systems. They are extended versions of papers presented at the ACIIDS 2018 conference (10th Asian Conference on Intelligent Information and Database Systems), which was held in Dong Hoi City, Vietnam on 19–21 March 2018. What all researchers and students of computer science need is a state-of-the-art report on the latest trends in their respective areas of interest. Over the years, researchers have proposed increasingly complex theoretical models, which provide the theoretical basis for numerous applications. The applications, in turn, have a profound influence on virtually every aspect of human activities, while also allowing us to validate the underlying theoretical concepts.

Successful Scientific Writing-Janice R. Matthews 2007-10-11 The detailed, practical, step-by-step advice in this user-friendly guide will help students and researchers to communicate their work more effectively through the written word. Covering all aspects of the writing process, this concise, accessible resource is critically acclaimed, well-structured, comprehensive, and entertaining. Self-help exercises and abundant examples from actual typescripts draw on the authors' extensive experience working both as researchers and with them. Whilst retaining the user-friendly and pragmatic style of earlier editions, this third edition has been updated and broadened to incorporate such timely topics as guidelines for successful international publication, ethical and legal issues including plagiarism and falsified data, electronic publication, and text-based talks and poster presentations. With advice applicable to many writing contexts in the majority of scientific disciplines, this book is a powerful tool for improving individual skills and an eminently suitable text for classroom courses or seminars.

Pacific Rim Objective Measurement Symposium (PROMS) 2015 Conference Proceedings-Quan Zhang 2016-08-06 This book collects and organizes the original studies presented at PROMS 2015 conference on theories and applications of Rasch model. It provides useful examples of the Rasch model used to address practical measurement problems across a range of different disciplines including Item Response Theory (IRT), philosophy of measurement, dimensionality, the role of fit statistics and residuals, application, educational application, language testing, health-related research, business and industrial application and Rasch-based computer software. PROMS 2015 (Pacific Rim Objective Measurement Symposium) was held from August 20-24th 2015, in Fukuoka, Japan. The goal of this conference is to bring together the researchers from academia, universities, hospitals, industry, management sector as well as practitioners to share ideas, problems and solutions relating to the multifaceted aspects of Rasch Model.

Empowering Learners for Life in the Digital Age-Don Passey 2019-06-29 This book constitutes the refereed post-conference proceedings of the IFIP TC 3 Open Conference on Computers in Education, OCCE 2018, held in Linz, Austria, in June 2018. The 24 revised full papers and 3 short papers included in this volume were carefully reviewed and selected from 63 submissions during two rounds of reviewing. The papers discuss key emerging topics and evolving practices in the area of educational computing research. They are organized in the following topical sections: computational thinking; programming and computer science education; teachers' education and professional development; games-based learning and gamification; learning in specific and disciplinary contexts; learning in social networking environments; and self-assessment, e-assessment and e-examinations.

Information Systems, Management, Organization and Control-Daniela Baglieri 2014-07-15 This book explores the diversity of topics, views and perspectives focused on the relationship between information systems, organizations and managerial control. It brings together theories and practices by a diverse group of scholars working in different disciplines: organization, management, accounting, information systems development, human-computer interaction. The volume is divided into three sections, each one focusing on a specific theme: organizational change, innovation and information and communication technologies; organizational control, accounting and information systems; information, knowledge and project management practices. The book is based on a selection of the best research papers - original double blind peer reviewed contributions of the annual conference of the Italian chapter of AIS, held in Milan, Italy in December 2013.

100 Amazing Computer Tips (Amazing Tips)-Diane McKeever 2014-04-28 Diane's easy to understand tips will help you become a power user. Packed with hundreds of time and money saving tips for PC and Apple users, this book will quickly pay for itself. Tips include basic keyboard shortcuts, recommendations on free or low cost software, back up strategies, Facebook and Google hints as well as how to use popular features of Microsoft's powerful Word, Excel and Outlook programs. Diane has been teaching people how become more effective computer users for over 25 years. In that time she has taught over 100,000 students. She earns her unofficial title, Certified Patient Person, every day. Participants in her classes often remark about the amazing tips that Diane McKeever includes in her presentations and ask where they could read about more about them. Sadly, up until now, she could not recommend a specific book, so she decided to write one herself. Diane started by writing a blog, 100ComputerTipsIn100Days.blogspot.com, challenging herself to come up with 100 tips in 100 days. She wrote the 100 tips in 100 days and then just kept on writing. Currently the total is more than 130 with additional tips being added all the time. Diane took the top 100 tips, reorganized and expanded on them, and created this book, "100 Amazing Computer Tips." Her classes have always been informative, entertaining, and, most importantly, not boring. Her writing style reflects her teaching approach and is clear and easy to follow. As a consultant to many Fortune 50 companies she has brought employees through the transitions from Wang word processing machines to PCs and Apple computers. Over the years she has helped people navigate the many versions of the popular computer programs. As a bonus, tips cards are included in the book. These can be copied and kept near the computer to help make you a more effective computer user. Diane and her husband Ed live in a boating community in Osprey, Florida where she is hard at work on her next title, "Amazing Windows 8.1 Tips" to help all of those who are confused by Microsoft's latest operating system. Get started now with "100 Amazing Computer Tips"; computers, in their many forms, are here to stay.

Schools in Transition-Pauli Siljander 2016-12-27 School is one of the most focal institutions in modern society. It is largely through the institutionalized forms of education that modern society attempts to secure and maintain its social and economic well-being and its valuable cultural life forms. In addition to this, school is the essential institution through which the future of a society is defined. Thus, at least when understood traditionally as a pedagogical institution, the school stands at the center of historically and socially constructed cultural life forms and at the brink of an unknown future: the determination of that future characterizes the pedagogical task of the school. It naturally ensues then, that modern discourses of the school have always been intertwined with the critical question of how past, present and future can be linked in educational practices so that schools can foster (in ever better ways) the well-being of individuals, societies and humanity. The chapters in this volume, despite the variety of viewpoints, share this critical view. The purpose of the volume is not to offer definite answers; rather it is to stress that to understand the role and functions of school in contemporary society and to orientate its transition, a well-founded critical evaluation of prevailing pedagogical practices and policy trends is required. This evaluation is vital for the future of school and society.

Python Tutorial-Guido Rossum 2018-06-19 Python is an easy to learn, powerful programming language. It has efficient high-level data structures and a simple but effective approach to object-oriented programming. Python's elegant syntax and dynamic typing, together with its interpreted nature, make it an ideal language for scripting and rapid application development in many areas on most platforms. The Python interpreter and the extensive standard library are freely available in source or binary form for all major platforms from the Python Web site, https: //www.python.org/, and may be freely distributed. The same site also contains distributions of and pointers to many free third party Python modules, programs and tools, and additional documentation. The Python interpreter is easily extended with new functions and data types implemented in C or C++ (or other languages callable from C). Python is also suitable as an extension language for customizable applications. This tutorial introduces the reader informally to the basic concepts and features of the python language and system. It helps to have a Python interpreter handy for hands-on experience, but all examples are self contained, so the tutorial can be read off-line as well. For a description of standard objects and modules, see library-index. reference-index gives a more formal definition of the language. To write extensions in C or C++, read extending-index and c-api-index. There are also several books covering Python in depth. This tutorial does not attempt to be comprehensive and cover every single feature, or even every commonly used feature. Instead, it introduces many of Python's most noteworthy features, and will give you a good idea of the language's flavor and style. After reading it, you will be able to read and write Python modules and programs, and you will be ready to learn more about the various Python library modules described in library-index. The Glossary is also worth going through.

1984-George Orwell 1983-10-17 A PBS Great American Read Top 100 Pick With extraordinary relevance and renewed popularity, George Orwell's 1984 takes on new life in this edition. "Orwell saw, to his credit, that the act of falsifying reality is only secondarily a way of changing perceptions. It is, above all, a way of asserting power."—The New Yorker In 1984, London is a grim city in the totalitarian state of Oceania where Big Brother is always watching you and the Thought Police can practically read your mind. Winston Smith is a man in grave danger for the simple reason that his memory still functions. Drawn into a forbidden love affair, Winston finds the courage to join a secret revolutionary organization called The Brotherhood, dedicated to the destruction of the Party. Together with his beloved Julia, he hazards his life in a deadly match against the powers that be. Lionel Trilling said of Orwell's masterpiece, "1984 is a profound, terrifying, and wholly fascinating book. It is a fantasy of the political future, and like any such fantasy, serves its author as a magnifying device for an examination of the present." Though the year 1984 now exists in the past, Orwell's novel remains an urgent call for the individual willing to speak truth to power.

An Oak Spring Pomona-Sandra Raphael 1990-12-26 An Oak Spring Pomona is the second in a series of catalogues describing selections of rare books and other material in the Oak Spring Garden Library, a collection formed by Mrs. Paul Mellon. The Pomona describes one hundred books and manuscripts about fruit, with illustrations taken from some of the most beautiful books on the subject as well as from original drawings and paintings. The earliest book described is Bussatos Giardino di Agricoltura of 1592, the latest The Herefordshire Pomona, an encyclopedia of apples and pears from the 1870s. In between there are fruit books large and small: La Quintinie's Instruction pour les Jardins fruitiers, Duhamel's Traite des arbres fruitiers, and many others. The book is divided into sections on fruit-growing in France and Britain, fruit elsewhere in Europe, and fruit in America, as well as citrus fruit, apples and pears, peaches and soft fruit, grapes, melons, and tropical fruit. Each description gives the background of the book and its relationship to others and is accompanied by illustrations of its contents in color and black and white. The Pomona includes not only brief bibliographical summaries of each book but also background wssays that place the books in a historical setting.
