Global Surgery-Adrian Park 2017-05-02 This text was developed as a book aimed at surgeons and allied health professionals that provides an introduction to the unmet needs , epidemiological, socioeconomic and even political factors that frame Global Surgery. Following upon an understanding of these issues, the text is a practical guide that enables the reader on several levels: to work cross culturally , build relationships and negotiate the logistical challenges of bringing surgical care to low resource settings; to develop an approach to the management of various clinical conditions that would be unfamiliar to most “western” surgeons. Global Surgery is a recently coined term that encompasses many potential meanings. Most would agree that it focuses on the growing recognition of the crisis of access to quality surgical care in low resource settings. Such scenarios exist on every continent. Increasingly surgeons, allied health professionals (NGO), Public Health / Health Policy professionals as well as governmental and non-governmental organizations are engaging in this field. Many

surgeons have an interest in Global Health and a desire to become involved but feel ill equipped to do so and unsure where to start. Global Surgery: The Essentials serves as a ready resource to equip surgeons to manage clinical scenarios that lie beyond the scope of their training or current practice but that they would reasonably be expected to encounter in the field.

Anticipation: Learning from the Past-Mihai Nadin 2015-07-03 This volume presents the work of leading scientists from Russia, Georgia, Estonia, Lithuania, Israel and the USA, revealing major insights long unknown to the scientific community. Without any doubt their work will provide a springboard for further research in anticipation. Until recently, Robert Rosen (Anticipatory Systems) and Mihai Nadin (MIND - Anticipation and Chaos) were deemed forerunners in this still new knowledge domain. The distinguished neurobiologist, Steven Rose, pointed to the fact that Soviet neuropsychological theories have not on the whole been well received by Western science. These earlier insights as presented in this volume make an important contribution to the foundation of the science of anticipation. It is shown that the daring hypotheses and rich experimental evidence produced by Bernstein, Beritashvili, Ukhtomsky, Anokhin and Uznadze, among others—extend foundational work to aspects of neuroscience, physiology, motorics, education.

U.S. History-P. Scott Corbett 2017-12-19 Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike.

U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

The 5-Minute Recharge-Lynne Everatt 2019-01-15 Take five minutes out of your day to experience the small win of a mental, physical and emotional recharge that could change your life. Researchers have discovered the formula for living a good life, so why is depression still the world's leading disability and anxiety the most common mental health disorder in North America? Most people don't know what will truly make them happy, and far too few make proven wellness practices a part of their lives. To cope with all the stresses we encounter, we need to actively care for ourselves, which includes heeding our ancient programming that demands that we move our bodies, connect face-to-face and get enough sleep.

Science has proven that you have the power, through your habitual ways of thinking and behaving, to renovate the space inside your head, making it brighter, more resilient, and a more enjoyable place to hang out. The 5-Minute Recharge will teach you 31 proven techniques for thriving at work and in life, including: - the mental fitness technique that's better than magic mushrooms - the best way to grow new brain cells and ensure you continue to look good in your genes as you age - the easily accessible trait that's associated with the high-performance personality - what George Clooney can teach you about tapping into your inner wisdom - the Navy SEAL tactic you can use to trigger relaxation even in tense situations Each of the 31 strategies is backed by research and includes additional resources to enrich your understanding of wellness and discipline.

to care for yourself in quick, fun, life-affirming ways. With your well-being in mind, authors and soul sisters Lynne Everatt and Addie Greco-Sanchez designed these 31 hands-on tools for creating a greater sense of having enough time, connecting with others, nourishing your body and mind, feeding positivity, and taking time for reflection. And that's worth getting charged up about.

American Government-Glen Krutz 2018-01-07 Our American Government textbook adheres to the scope and sequence of introductory American government courses nationwide. We have endeavored to make the workings of American Government interesting and accessible to students while maintaining the conceptual coverage and rigor inherent in the subject at the college level. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as engaged citizens. The organization and pedagogical features were developed and vetted with feedback from American government instructors dedicated to the project.
