Jonathan-Moshood Fayemiwo 2015-02-14 IN SUMMER 2010, Vice-President Goodluck Jonathan garnered unprecedented support among Nigerians and enormous goodwill from the international community in his epic battle to succeed the late President Umaru Yar'Adua as president. Propelled to power by his nation's local compradors and the "doctrine of necessity" in a country buffeted by sundry fissiparous tendencies, Mr. Jonathan, a minority from the Ijaw tribe won the 2011 Presidential Election convincingly in his own right and became Nigeria's substantive president. Nigeria has managed to remain intact under Mr. Jonathan, but five years after he became president, Mr. Jonathan has alienated key go-to-power brokers and squandered the good luck that helped him to power. His prevarication and dour personality, inaction and dithering administrative style are fueling more viviparous pulls dogging the corporate existence of Africa's most populous nation. Whether Mr. Jonathan wins the forthcoming presidential elections in 2015 or gets the shellacking of his political life is for the Nigerian people to decide, but whatever the outcome of the election, the next four years will be extremely critical for Nigeria as a nation against the backdrop of the smorgasbord of problems that will confront the Nigerian leadership and the swirl of economic problems that will face majority of Nigerians.

Ibrahim Babangida-Dan Agbese 2012-06-30 To borrow a hackneyed phrase, Nigeria has had a chequered political history before and since independence from British colonial rule on October 1, 1960. Two sets of actors - the civilian politicians and the military politicians - have been on the national political stage since January 15, 1966. General Ibrahim Badamasi Babangida was one of them. In his eight years in power as president, or perhaps more correctly as military president, he affected the course of Nigeria's events, for better or for worse, in a way that few, if any, before him did. It is not possible to tell Nigeria's story without Babangida's part in it. The book is the story of IBB, the little orphan from Minna, Niger State and his meticulous rise to the top of his profession and the leadership of his country. Perhaps, more importantly, it is the story of Nigeria, its post-independence politics and power, told from the perspective of the actions and decisions of one of the main actors on the country's political stage. The events that shaped the Babangida era did not begin on August 27, 1985, the day he staged a palace coup against General Muhammadu Buhari. They began long before that. This book is the definitive story of the military, politics and power in Nigeria.

Epidemics and the Health of African Nations-MISTRA 2019-07-25 News footage of disease in Africa is a familiar sight. Yet these outbreaks are often presented out of context, with no reference to the conditions that have triggered them. MISTRA's new book, Epidemics and the Health of African Nations, aims to redress that. Researchers and practitioners from within the continent explore why Africa is so vulnerable to disease, and show how this vulnerability is closely linked to political and economic factors. They demonstrate how these same factors determine the way epidemics are treated. Authors extract lessons from case studies in different parts of Africa; challenge conventional frameworks about disease to argue for a 'syndemics' approach that takes into account the interrelationship between disease and political and socio-economic contexts; explore challenges of Africa's future. They argue that a well-functioning health system is at the core of a country's capacity to counter an epidemic. This volume brings African experts together to probe possible solutions to the continent's heavy burden of disease. The insights offered will be helpful in devising policy for the control of disease and the combatting of epidemics in Africa.

This Present Darkness-Stephen Ellis 2016-07-01 Nigeria and Nigerians have acquired a notorious reputation for involvement in drug-trafficking, fraud, cyber-crime and other types of serious crime. Successful Nigerian criminal networks have a global reach, interacting with their Italian, Latin American and Russian counterparts. Yet in 1944, a British colonial official wrote that 'the number of persistent and professional criminals is not great' in Nigeria and that 'crime as a career has so far made little appeal to the young Nigerian'. This book traces the origins of Nigerian organised crime to the last years of colonial rule, when nationalist politicians acquired power at a regional level. In need of funds for campaigning, they offered government contracts to foreign businesses in return for kickbacks, in a pattern that recurs to this day. Political corruption encouraged a wider disrespect for the law that spread throughout Nigerian society. When the country's oil boom came to an end in the early 1980s, young Nigerian college graduates headed abroad, eager to make money by any means. Nigerian crime went global at the very moment new criminal markets were emerging all over the world.

"Those Terrible Weeks in Their Camp"-Mausi Segun 2014 In April 2014, the Islamist group Boko Haram abducted 276 female students from a secondary school in Chibok, Borno State, in Nigeria's northeast. The group has abducted more than 500 women and girls from Borno, Yobe, and Adamawa States since 2009. Based field research in northeast Nigeria and Abuja, the capital city, including interviews with women and girls who escaped abduction or were freed from captivity, social workers, journalists, religious leaders, civil society workers, state and federal government officials, and witnesses of abductions, "Those Weeks in Their Camp" documents how Boko Haram targets women and girls. The report highlights the harrowing experiences of some of the abducted women and girls, many of whom have endured physical and psychological abuse, forced conversions, coerced marriages, forced labor, sexual violence and rape. To ensure accountability, the report calls on Nigerian authorities to investigate and prosecute, based on international fair trial standards, those who committed serious crimes in violation of international law, including Boko Haram, members of the security forces, and pro-government vigilante groups. In addition, the government should provide adequate measures to protect schools and the right to education, and ensure access to medical and mental health services to victims of the abduction and other violence. The government should also ensure that hospitals and clinics treating civilian victims of Boko Haram atrocities are equipped with medical supplies to treat survivors of sexual and gender-based violence. -- back cover.

"Pan" Africa Rising-Rita Kiki Edozie 2017-09-08 This book uses Nigeria's Afri-capitalist and South Africa's Ubuntu Business models as case studies that reconcile the tension between Africa Rising and Pan African economics, presenting their convergence as Africa's viable Third Way route to global development. In presenting Afri-capitalism and Ubuntu Business as national, business sector manifestations of a "new" Pan Africanism, the author explores Africa's "culturalist" path in engaging the international political economy. This is an African customized engagement that parallels the alternative models of China's "market-socialism" and Latin America's "21st C Socialism". All present alternatives to realist, liberal, and structuralist standpoints, inclining instead toward constructivist political economies derived from the perspectives and subject conditions of African economic histories, socio-cultures, alternative modernities, and agent-led initiatives.

Time is Not the Measure-Vusi Mavimbela 2018-11-01 'Time is Not the Measure' is the memoir of Vusi Mavimbela, one of South Africa's foremost political adventurers and wanderers. A writer of singular verve, humour and descriptive power, his memoir provides penetrating pen portraits of many well-known South African and African political actors, including martyred Umkhonto we Sizwe guerilla Solomon Mahlangu, Nigeria's Olusegun Obasanjo, Robert Mugabe and a galaxy of senior ANC exiles such as Joe Slovo, Chris Hani, Josiah Jele, Joel Netshitenzhe and Mac Maharaj. He touches on and illuminates the personalities of many influential men and women in South Africa's early democratic governments. But the heart of Mavimbela's narrative lies in his unique experience of working as a top administrator and counsellor in the offices of both Thabo Mbeki and Jacob Zuma. In the most intimate detail, he describes the emergence and escalation of the conflict between those two flawed principals. He captures the drama of their struggle and its destructive fallout for the new South African state. Mavimbela offers a potent warning: loyalty and long service to a political party is no guarantee of wise and effective leadership.

Biocentrism-Robert Lanza 2009 Robert Lanza is one of the most respected scientists in the world a US News and World Report cover story called him a genius and a renegade thinker, even likening him to Einstein. Lanza has teamed with Bob Berman, the most widely read astronomer in the world, to produce Biocentrism, a revolutionary new view of the universe. Every now and then a simple yet radical idea shakes the very foundations of knowledge. The startling discovery that the world was not flat challenged and ultimately changed the way people perceived themselves and their relationship with the world. For most humans of the 15th century, the notion of Earth as ball of rock was nonsense. The whole of Western, natural philosophy is undergoing a sea change again, increasingly being forced upon us by the experimental findings of quantum theory, and at the same time, toward doubt and uncertainty in the physical explanations of the universes genesis and structure. Biocentrism completes this shift in worldview, turning the planet upside down again with the revolutionary view that life creates the universe instead of the other way around. In this paradigm, life is not an accidental byproduct of the laws of physics. Biocentrism takes the reader on a seemingly improbable but ultimately inescapable journey through a foreign universe our own from the viewpoints of an acclaimed biologist and a leading astronomer. Switching perspective from physics to biology unlocks the cages in which Western science has unwittingly managed to confine itself. Biocentrism will shatter the readers ideas of life--time and space, and even death. At the same time it will release us from the dull worldview of life being merely the activity of an admixture of carbon and a few other elements; it suggests the exhilarating possibility that life is fundamentally immortal. The 21st century is predicted to be the Century of Biology, a shift from the previous century dominated by physics. It seems fitting, then, to begin the century by turning the universe outside-in and unifying the foundations of science with a simple idea discovered by one of the leading life-scientists of our age. Biocentrism awakens in readers a new sense of possibility, and is full of so many shocking new perspectives that the reader will never see reality the same way again.

Black Titan-Carol Jenkins 2009-04-02 The grandson of slaves, born into poverty in 1892 in the Deep South, A. G. Gaston died more than a century later with a fortune worth well over \$130 million and a business empire spanning communications, real estate, and insurance. Gaston was, by any measure, a heroic figure whose wealth and influence bore comparison to J. P. Morgan and Andrew Carnegie. Here, for the first time, is the story of the life of this extraordinary pioneer, told by his niece and grandniece, the award-winning television journalist Carol Jenkins and her daughter Elizabeth Gardner Hines. Born at a time when the

bitter legacy of slavery and Reconstruction still poisoned the lives of black Americans, Gaston was determined to make a difference for himself and his people. His first job, after serving in the celebrated all-black regiment during World War I, bound him to the near-slavery of an Alabama coal mine—but even here Gaston saw not only hope but opportunity. He launched a business selling lunches to fellow miners, soon established a rudimentary bank—and from then on there was no stopping him. A kind of black Horatio Alger, Gaston let a single, powerful question be his guide: What do our people need now? His success flowed from an uncanny genius for knowing the answer. Combining rich family lore with a deep knowledge of American social and economic history, Carol Jenkins and Elizabeth Hines unfold Gaston's success story against the backdrop of a century of crushing racial hatred and bigotry. Gaston not only survived the hardships of being black during the Depression, he flourished, and by the 1950s he was ruling a Birmingham-based business empire. When the movement for civil rights swept through the South in the late 1950s and early 1960s, Gaston provided critical financial support to many activists. At the time of his death in 1996, A. G. Gaston was one of the wealthiest black men in America, if not the wealthiest. But his legacy extended far beyond the monetary. He was a man who had proved it was possible to overcome staggering odds and make a place for himself as a leader, a captain of industry, and a far-sighted philanthropist. Writing with grace and power, Jenkins and Hines bring their distinguished ancestor fully to life in the pages of this book. *Black Titan* is the story of a man who created his own future—and in the process, blazed a future for all black businesspeople in America. From the Hardcover edition.

Banker To The Poor-Muhammad Yunus 2007-03-31 Muhammad Yunus is that rare thing: a bona fide visionary. His dream is the total eradication of poverty from the world. In 1983, against the advice of banking and government officials, Yunus established Grameen, a bank devoted to providing the poorest of Bangladesh with minuscule loans. Grameen Bank, based on the belief that credit is a basic human right, not the privilege of a fortunate few, now provides over 2.5 billion dollars of micro-loans to more than two million families in rural Bangladesh. Ninety-four percent of Yunus's clients are women, and repayment rates are near 100 percent. Around the world, micro-lending programs inspired by Grameen are blossoming, with more than three hundred programs established in the United States alone. *Banker to the Poor* is Muhammad Yunus's memoir of how he decided to change his life in order to help the world's poor. In it he traces the intellectual and spiritual journey that led him to fundamentally rethink the economic relationship between rich and poor, and the challenges he and his colleagues faced in founding Grameen. He also provides wise, hopeful guidance for anyone who would like to join him in "putting homelessness and destitution in a museum so that one day our children will visit it and ask how we could have allowed such a terrible thing to go on for so long." The definitive history of micro-credit direct from the man that conceived of it, *Banker to the Poor* is necessary and inspirational reading for anyone interested in economics, public policy, philanthropy, social history, and business. Muhammad Yunus was born in Bangladesh and earned his Ph.D. in economics in the United States at Vanderbilt University, where he was deeply influenced by the civil rights movement. He still lives in Bangladesh, and travels widely around the world on behalf of Grameen Bank and the concept of micro-credit.
