News Councils as Alternative Dispute Resolution-Louise Williams Hermanson 1990

Online Courts and the Future of Justice-Richard Susskind 2019-10-22 In Online Courts and the Future of Justice, Richard Susskind, the world's most cited author on the future of legal services, shows how litigation will be transformed by technology and proposes a solution to the global access-to-justice problem. In most advanced legal systems, the resolution of civil disputes takes too long, costs too much, and the process is not just antiquated; it is unintelligible to ordinary mortals. The courts of some jurisdictions are labouring under staggering backlogs - 100 million cases in Brazil, 30 million in India. More people in the world now have internet access than access to justice. Drawing on almost 40 years in the fields of legal technology and jurisprudence, Susskind shows how we can use the remarkable reach of the internet (more than half of humanity is now online) to help people understand and enforce their legal rights. Online courts provide 'online judging' - the determination of cases by human judges but not in physical courtrooms. Instead, evidence and arguments are submitted through online platforms through which judges also deliver their decisions. Online courts also use technology to enable courts to deliver more than judicial decisions. These 'extended courts' provide tools to help users understand relevant law and available options, and to formulate arguments and assemble evidence. They offer non-judicial settlements such as negotiation and early neutral evaluation, not as an alternative to the public court system but as part of it. A pioneer of online courts, Susskind maintains that they will displace much conventional litigation. He rigorously assesses the benefits and drawbacks, and looks ahead, predicting how AI, machine learning, and virtual reality will likely come to dominate court service.

Formalisation and Flexibilisation in Dispute Resolution-Joachim Zekoll 2014-09-29 In Formalisation and Flexibilisation in Dispute Resolution, scholars from four continents examine both historical and recent developments that cast doubt on the validity of the widespread assumption that alternative dispute resolution (ADR) can be distinguished from state-based proceedings by invoking the contrasting labels of informal justice versus formal law.

Civil Justice, Privatization, and Democracy-Trevor C.W. Farrow 2014-04-30 Privatization is occurring throughout the public justice system, including courts, tribunals, and state-sanctioned private dispute resolution regimes. Driven by a widespread ethos of efficiency-based civil justice reform, privatization claims to decrease costs, increase speed, and improve access to the tools of justice. But it may also lead to procedural unfairness, power imbalances, and the breakdown of our systems of democratic governance. Civil Justice, Privatization, and Democracy demonstrates the urgent need to publicize, politicize, debate, and ultimately temper these moves towards privatized justice. Written by Trevor C.W. Farrow, a former litigation lawyer and current Chair of the Canadian Forum on Civil Justice, Civil Justice, Privatization, and Democracy does more than just bear witness to the privatization initiatives that define how we think about and resolve almost all non-criminal disputes. It articulates the costs and benefits of these privatizing initiatives, particularly their potential negative impacts on the way we regulate ourselves in modern democracies, and it makes recommendations for future civil justice practice and reform.

Alternative Dispute Resolution in the Regulatory Process-Deirdre Gallagher 2020-06-01 An in-depth look at the institutionalization of alternative dispute resolution (ADR) processes in the federal and state regulatory arenas over the past twenty-five years, this volume showcases the value of these processes and highlights the potential for their expanded application and growth. It describes ADR techniques, how to use them, and how to integrate them into existing processes, using examples from the Federal Energy Regulatory Commission and three state utility regulatory commissions. The book recounts ADR successes, recognizing that traditional litigative methods may not always meet the needs of agencies, the parties, or the public. Institutionalizing these processes requires a systematic commitment to different approaches to problem-solving and, ultimately, cultural change. The authors spearheaded initiatives to integrate these processes and skills at the federal level. Drawing from valuable insights gained from their experience, the authors introduce a versatile new ADR system design model, the Voices of Value, which aims to enhance input, creativity, and effectiveness in regulatory and other public arenas as well as the private sector.

Alternative Dispute Resolution in Patent Disputes- 2013-04-29 Seminar paper from the year 2013 in the subject Law - Civil / Private / Trade / Anti Trust Law / Business Law, grade: 1,1, Berlin School of Economics and Law, course: Internationalisierung von Wirtschaftsprozessen, language: English, abstract: Major cell phone manufacturers Apple and Samsung are currently accusing one another of infringing patents relating to their smartphones. The lawsuits simultaneously being carried out in several countries across the world are a burden to both companies. Due to the fact that the two stand in a crucial business relationship with each other, an alternative dispute resolution model may be appropriate. Methods such as mediation, arbitration and expert determination may be suitable. Patents are part of intellectual property protection and have grown in importance over the last decades. They protect an invention and can only be granted if certain criteria are met. However, patent holders litigate patent infringements in order to protect their competitive position. Alternative Dispute Resolution offers advantages such as a single procedure, autonomy of the parties, neutrality, finality of awards, confidentiality as well as enforceability, and has been known as a method of resolution since the 1980s. De-spite this, most international disputes are carried out in court, even though companies are aware that a trial is the least beneficial method. In the past, Apple had successfully negotiated patent litigation with several competitors, but initial attempts at Alternative Dispute Resolution have failed in the case of Apple and Samsung. However, it can still be carried next to court to find common ground and identify economic needs and interests that may support court litigation and direct it towards a beneficial outcome for both. In addition, it is advisable to implement an early-stage conflict management model for the future.
