Auto Repair For Dummies-Deanna Sclar 2019-01-07 Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Access Controlled-Ronald Deibert 2010-04-02 Reports on a new generation of Internet controls that establish a new normative terrain in which surveillance and censorship are routine. Internet filtering, censorship of Web content, and online surveillance are increasing in scale, scope, and sophistication around the world, in democratic countries as well as in authoritarian states. The first generation of Internet controls consisted largely of building firewalls at key Internet gateways; China's famous "Great Firewall of China" is one of the first national Internet filtering systems. Today the new tools for Internet controls that are emerging go beyond mere denial of information. These new techniques, which aim to normalize (or even legalize) Internet control, include targeted viruses and the strategically timed deployment of distributed denial-of-service (DDoS) attacks, surveillance at key points of the Internet's infrastructure, take-down notices, stringent terms of usage policies, and national information shaping strategies. Access Controlled reports on this new normative terrain. The book, a project from the OpenNet Initiative (ONI), a collaboration of the Citizen Lab at the University of Toronto's Munk Centre for International Studies, Harvard's Berkman Center for Internet and Society, and the SecDev Group, offers six substantial chapters that analyze Internet control in both Western and Eastern Europe and a section of shorter regional reports and country profiles drawn from material gathered by the ONI around the world through a combination of technical interrogation and field research methods.

Beyond Growth-Herman E. Daly 2014-09-30 "Daly is turning economics inside out by putting the earth and its diminishing natural resources at the center of the field . . . a kind of reverse Copernican revolution in economics." --Utne Reader "Considered by most to be the dean of ecological economics, Herman E. Daly elegantly topples many shibboleths in Beyond Growth. Daly challenges the conventional notion that growth is always good, and he bucks environmentalist orthodoxy, arguing that the current focus on 'sustainable development' is misguided and that the phrase itself has become meaningless." --Mother Jones "In Beyond Growth, . . . [Daly] derides the concept of 'sustainable

growth' as an oxymoron. . . . Calling Mr. Daly 'an unsung hero,' Robert Goodland, the World Bank's top environmental adviser, says, 'He has been a voice crying in the wilderness.'" --G. Pascal Zachary, The Wall Street Journal "A new book by that most far-seeing and heretical of economists, Herman Daly. For 25 years now, Daly has been thinking through a new economics that accounts for the wealth of nature, the value of community and the necessity for morality." -Donella H. Meadows, Los Angeles Times "For clarity of vision and ecological wisdom Herman Daly has no peer among contemporary economists. . . . Beyond Growth is essential reading." --David W. Orr, Oberlin College "There is no more basic ethical question than the one Herman Daly is asking." --Hal Kahn, The San Jose Mercury News "Daly's critiques of economic orthodoxy . . . deliver a powerful and much-needed jolt to conventional thinking." --Karen Pennar, Business Week Named one of a hundred "visionaries who could change your life" by the Utne Reader, Herman Daly is the recipient of many awards, including a Grawemeyer Award, the Heineken Prize for environmental science, and the "Alternative Nobel Prize," the Right Livelihood Award. Tortellini at Midnight-Emiko Davies 2019-03-01

Sometime in the 1950s, Emiko Davies' nonno-in-law began the tradition of ringing in the new year with tortellini al sugo. He served it along with spumante and a round of tombola, and sparked a trend; up until the 1970s, you could find tortellini at midnight on New Year's Eve in the bars around the Tuscan town of Fucecchio.

This is just one of the heirloom dishes in this collection, for which Emiko Davies has gathered some of her favourite family recipes. They trace generations that span the length of Italy, from the Mediterranean port city of Taranto in the southern heel of Puglia to elegant Turin, the city of aperitif and Italian cafe culture in the far north and, finally, back to Tuscany, which Emiko calls home.

Tortellini at Midnight is a book rich with nostalgia, with fresh, comforting food and stunning photography. It is a book that is good for the soul.
