Enhancing Digital Literacy and Creativity-Alicia Blum-Ross 2019-11-26 Enhancing Digital Literacy and Creativity is an exploration of how young children gain digital literacies in 'makerspaces.' The international authors investigate how hands-on experimentation with a variety of materials - from traditional arts and crafts to contemporary digital tools like 3D printers and laser cutters - can aid children in their development of play, creativity and storytelling. From museums to libraries, nursery schools to community centres, this research shows how 'making' supports the development of creative skills and introduces concepts to be explored in a variety of environments and contexts. Drawing on examples from around the globe, described by a range of international academics, Enhancing Digital Literacy and Creativity includes chapters on: Virtual reality Museum and library makerspaces Intergenerational making in families Making in schools and nursery settings Assessing learning in makerspaces Links to previous theories Social imagination This book will be a valuable resource for students and researchers in the fields of education and digital literacies; early childhood teacher educators and practitioners; librarians; museum educators; and makerspace staff.

The Archaeology of Mobility-Hans Barnard 2008-12-31 There have been edited books on the archaeology of nomadism in various regions, and there have been individual archaeological and anthropological monographs, but nothing with the kind of coverage provided in this volume. Its strength and importance lies in the fact that it brings together a worldwide collection of studies of the archaeology of mobility. This book provides a ready-made reference to this worldwide phenomenon and is unique in that it tries to redefine pastoralism within a larger context by the term mobility. It presents many new ideas and thoughtful approaches, especially in the Central Asian region.

Contemporary Theatre in Education-Roger Wooster 2007-08-01 Theatre in Education emerged in the mid-sixties as a unique hybrid of performance and child-centred learning. Contemporary Theatre in Education charts the creation and adaptation of this 'hybrid' through the Is it possible for the hybrid to survive? Or have the economics of schools, the post-National Curriculum educational philosophy and the lack of understanding from a new breed of teachers created an environment that has forced a mutation? Perhaps theatre in education has just evolved, but perhaps just forty years after it began it is facing extinction.changing political, economic and educational environment. It also takes a 'snapshot' of the TIE being created today, considering all the projects being performed in Wales during a single month. The projects are analysed and every TIE director interviewed about the work and the policies of their companies. It becomes very clear that that the distinction between TIE and Children's Theatre is being blurred.

Modern Technologies in Manufacturing-Nicolae Bâlc 2015-11-23 Collection of selected, peer reviewed papers from the 12th International Conference on Modern Technologies in Manufacturing (MTeM) October 14-16, 2015, Cluj-Napoca, Romania. The 59 papers are grouped as follows: Chapter 1: Processes of Metal Machining Chapter 2: Metal Forming Chapter 3: Processing of Plastics and Composite Materials Chapter 4: Additive Manufacturing and Non-traditional Technologies Chapter 5: Computer Aided Design and Manufacturing Chapter 6: Automation of Manufacturing Systems and Assembly Chapter 7: Manufacturing Engineering

Makeology-Kylie Pepler 2016-05-20 Makeology introduces the emerging landscape of the Maker Movement and its connection to interest-driven learning. While the movement is fueled in part by new tools, technologies, and online communities available to today's makers, its simultaneous emphasis on engaging the world through design and sharing with others harkens back to early educational predecessors including Froebel, Dewey, Montessori, and Papert. Makerspaces as Learning Environments (Volume 1) focuses on making in a variety of educational ecosystems, spanning nursery schools, K-12 environments, higher education, museums, and after-school spaces. Each chapter closes with a set of practical takeaways for educators, researchers, and parents.

Real Sex-Mike Lousada 2017-05-30 The more modern culture shines its light on sex, the longer the shadow it casts. This shadow is commercialism, pornography and shame. This approach to sexuality distorts it to create performance pressure, increasing numbers of sexual 'dysfunctions' and a fundamental disconnect from ourselves and others. Yet sexuality is one of the most important paths to happiness, simply because it requires us to engage all the other aspects of ourselves. To have deeply satisfying sex we must engage the mind, the body and our feelings. Real Sex will show you how almost everything that our society has tried to teach you about your sexuality is misleading or simply wrong. Real Sex is a journey into the heart of your sexual self; a way of creating meaningful and fulfilling intimacy. It sets out seven keys that will teach you how to love and accept your mind, body, feelings, desires and sexuality at a deeper level, leaving behind feelings of guilt, insecurity and shame. Real Sex offers a new, integrated idea of sexuality that holds a positive perspective of the sexual beings that we are; longing for intimacy and aliveness that we know deep down makes our lives meaningful.

Teaching Arithmetic in Primary Schools-Richard English 2012-11-16 There is a new and increasing emphasis on the importance of teaching arithmetical skills in primary schools. This text outlines what is meant by arithmetic and enables trainee teachers to build their own confidence in teaching arithmetic. It covers all aspects of arithmetic including recall of number facts and traditional pen and paper methods. Each arithmetical approach is illustrated with detailed examples and readers can access their own learning in each area. Guidance on when and where to use different approaches to enhance children's learning is included and interactive activities highlight essential links between theory and

practice. About the Transforming Primary QTS series This series reflects the new creative way schools are beginning to teach, taking a fresh approach to supporting trainees as they work towards primary QTS. Titles provide fully up to date resources focused on teaching a more integrated and inclusive curriculum, and texts to draw out meaningful and explicit cross curricular links.

The Mystical Teachings of Jesus-David Hoffmeister 2016-01-01 The Mystical Teachings of Jesus will illuminate the mind with a deeper understanding of the teachings of the Bible and A Course in Miracles (ACIM). The chapters in this book contain Bible verses, side-by-side with ACIM quotes, providing a dialogue of clarity, and directly answering questions from the heart, such as: "Jesus, what is my relationship to you? What is a miracle?" and, "How will the world end?"

Manual Therapy for the Peripheral Nerves-Jean-Pierre Barral 2007 "This book shows the important role that manual therapy plays in releasing pain conditions caused by the dysfunction of the peripheral nerves. It is written in an instructive, detailed and easily accessible style and will be useful to all those who wish to improve their manual skills and add an important new dimension to their practice."--BOOK JACKET.

Applied Physics, System Science and Computers III-Klimis Ntalianis 2019-06-27 This book reports on advanced theories and methods in three related fields of research: applied physics, system science and computers. The first part covers applied physics topics, such as lasers and accelerators; fluid dynamics, optics and spectroscopy, among others. It also addresses astrophysics, security, and medical and biological physics. The second part focuses on advances in computers, such as those in the area of social networks, games, internet of things, deep learning models and more. The third part is especially related to systems science, covering swarm intelligence, smart cities, complexity and more. Advances in and application of computer communication, artificial intelligence, data analysis, simulation and modeling are also addressed. The book offers a collection of contributions presented at the 3rd International Conference on Applied Physics, System Science and Computers (APSAC), held in Dubrovnik, Croatia on September 26-28, 2018. Besides presenting new methods, it is also intended to promote collaborations between different communities working on related topics at the interface between physics, computer science and engineering.

Design, Make, Play-Margaret Honey 2013-03-12 Design, Make, Play: Growing the Next Generation of STEM Innovators is a resource for practitioners, policymakers, researchers and program developers that illuminates creative, cutting edge ways to inspire and motivate young people about science and technology learning. The book is aligned with the National Research Council's new Framework for Science Education, which includes an explicit focus on engineering and design content, as well as integration across disciplines. Extensive case studies explore real world examples of innovative programs that take place in a variety of settings, including schools, museums, community centers, and virtual spaces. Design, Make, and Play are presented as learning methodologies that have the power to rekindle children's intrinsic motivation and innate curiosity about STEM (science, technology, engineering, and mathematics) fields. A digital companion app showcases rich multimedia that brings the stories and successes of each program—and the students who learn there—to life.

Cuban Legends-Salvador Bueno 2003 This collection of Cuban legends, compiled by the renowned essayist and literary critic Salvador Bueno, brings readers the best of a time-honored tradition of storytelling in Cuba. These tales, passed on from generation to generation throughout the island, are here retold by a diverse group of prominent Cuban literary figures. Their stories embrace a broad spectrum of Cuban history from the remote past to the modern era. The book features stories of the Taino and Siboney, the island's original inhabitants, accompanied by narratives about Afro-Cuban religious and cultural traditions, and finally tales that are typically "Cuban" because they illustrate both the cohesion of the various strands - Hispanic, African, and indigenous - that define Cuban nationality and the patriotism and love of freedom exemplified in the celebrated struggles against Spanish colonialism. Cuban Legends brings to life the stories of unforgettable people and words that have survived the passage of time. They are both witty and wise, and capture the essential spirit of Cuban culture.

This Moment Is Your Miracle-David Hoffmeister 2019-02-02 Written by a world-renowned teacher of A Course in Miracles, this book reveals the profound power of the present moment and shows how tapping into it using practical insights and simple exercises can fortify your spirit against fear, break down perceived limitations and your sense of separation, and help you manifest a life of joy, oneness, and serenity. We all feel isolated and afraid sometimes, but the truth is, we're never really alone. Indeed, as author and spiritual teacher David Hoffmeister points out, it is the deeply ingrained belief that you are separate from everything—that you're on your own, there is reason to be afraid, and you might not be worthy—that prevents you from living the joyful life you long for. So, how can you begin to untangle the thoughts and feelings that keep you trapped in your own egoic fears? This Moment Is Your Miracle addresses this painful yet widespread belief in separation, peeling back the layers of misperception to uncover the divine oneness at the heart of reality, through which we are all connected. You'll find spiritual practices and tools to help you awaken from the nightmare of fear and isolation, and practical ways to cultivate acceptance, forgiveness, healing, and trust—for healing yourself, your relationships, and the world. With this book as your guide, you'll learn how to trust your inner guidance and accept life's miracles, and find true freedom and peace of mind. There has never been a better time than now.

Connected Code-Yasmin B. Kafai 2016-01-08 Coding, once considered an arcane craft practiced by solitary techies, is now recognized by educators and theorists as a crucial skill, even a new literacy, for all children. Programming is often promoted in K-12 schools as a way to encourage 'computational thinking' - which has now become the umbrella term for understanding what computer science has to contribute to reasoning and communicating in an ever-increasingly digital world. Yasmin Kafai and Quinn Burke argue that although computational thinking represents an excellent starting point, the broader conception of 'computational participation' better captures the twenty-first-century reality.

Toward Free Trade in the Americas-José Manuel Salazar-Xirinachs 2004-05-13 In the past 15 years, the nations of the Western Hemisphere have staged a remarkable revolution—in the way they trade with their neighbors. First, after decades of restrictive import policies, several countries began to liberalize their trade and investment regimes. Then, beginning a decade ago, numerous bilateral and sub-regional trade agreements were achieved, to serve as vital complements to domestic reforms and to foster trade flows among member countries. At the Second Summit of the Americas in 1998, negotiations among 34 democracies were launched to establish the Free Trade Area of the Americas (FTAA). This report takes stock of the remarkable progress to date in the development of free trade in the Western Hemisphere. It examines trade flows between countries in the same regional groupings and between members of different sub-regional arrangements. The report describes the main characteristics of the trade arrangements signed between countries of the Hemisphere and explores the development of trade rules in these arrangements. Finally, the report details recent advances in the construction of the FTAA.

Analysis of the four-bar linkage-John A. Hrones 1951

Electoral Engineering-Pippa Norris 2004-02-09 From Kosovo to Kabul, the last decade witnessed growing interest in 'electoral engineering'. Reformers have sought to achieve either greater government accountability through majoritarian arrangements or wider parliamentary diversity through proportional formula. Underlying the normative debates are important claims about the impact and consequences of electoral reform for political representation and voting behavior. The study compares and evaluates two broad schools of thought, each offering contracting expectations. One popular approach claims that formal rules define electoral incentives facing parties, politicians and citizens. By changing these rules, rational choice institutionalism claims that we have the capacity to shape political behavior. Alternative cultural modernization theories differ in their emphasis on the primary motors driving human behavior, their expectations about the pace of change, and also their assumptions about the ability of formal institutional rules to alter, rather than adapt to, deeply embedded and habitual social norms and patterns of human behavior.

High Sensitivity Magnetometers-Asaf Grosz 2016-09-20 This book gathers, for the first time, an overview of nearly all of the magnetic sensors that exist today. The book is offering the readers a thorough and comprehensive knowledge from basics to state-of-the-art and is therefore suitable for both beginners and experts. From the more common and popular AMR magnetometers and up to the recently developed NV center magnetometers, each chapter is describing a specific type of sensor and providing all the information that is necessary to understand the magnetometer behavior including theoretical background, noise model, materials, electronics, design and fabrication techniques, etc.

DIY Media-Michele Knobel 2010 Schools remain notorious for co-opting digital technologies to «business as usual» approaches to teaching new literacies. DIY Media addresses this issue head-on, and describes expansive and creative practices of digital literacy that are increasingly influential and popular in contexts beyond the school, and whose educational potential is not yet being tapped to any significant degree in classrooms. This book is very much concerned with engaging students in do-it-yourself digitally mediated meaning-making practices. As such, it is organized around three broad areas of digital media: moving media, still media, and audio media. Specific DIY media practices addressed in the chapters include machinima, anime music videos, digital photography, podcasting, and music remixing. Each chapter opens with an overview of a specific DIY media practice, includes a practical how-to tutorial section, and closes with suggested applications for classroom settings. This collection will appeal not only to educators, but to anyone invested in better understanding - and perhaps participating in - the significant shift towards everyday people producing their own digital media.

Rethinking Engineering Education-Edward F. Crawley 2014-04-02 This book describes an approach to engineering education that integrates a comprehensive set of personal, interpersonal, and professional engineering skills with engineering disciplinary knowledge in order to prepare innovative and entrepreneurial engineers. The education of engineers is set in the context of engineering practice, that is, Conceiving, Designing, Implementing, and Operating (CDIO) through the entire lifecycle of engineering processes, products, and systems. The book is both a description of the development and implementation of the CDIO model and a guide to engineering programs worldwide that seek to improve the education of young engineers.

The Secret Code of Japanese Candlesticks-Felipe Tudela 2008-04-30 A simple guide for using Japanese candlesticks correctly, and profitably Candlesticks have gotten a lot of attention lately, but few traders truly know how to use them wisely and profitably. Without the proper context, candlestick charting won't work. In this book, technical analysis expert Felipe Tudela shares candlestick creator Sokyu Honma's Great Market Cycle theory. With the Great Market Cycle, candlesticks reveal their powerful and simple logic and give traders the insight and context they need to use them successfully. Using these insights, readers will be able to trade each market phase in accordance with his or her own personal strategy. Felipe Tudela (Paris, France) is a researcher and specialist in technical analysis, as well as President of the Center of Financial Research in Paris.

Sharing Power-Manon Tremblay 2017-03-02 The representation of women in parliament is a subject of extensive research and a focus for political action in the last decade. The wide variation in women's parliamentary presence contradicts the expectation that established or consolidated democracies are more supportive of the presence of women in political life than emerging democracies. This volume explains this variation through a series of closely investigated case studies from the post-Communist transition democracies of Eastern Europe and emerging democracies in Asia and the Middle East to the long-established liberal democratic states. The volume examines the history of women's legislative involvement, clearly addressing the issue of equal opportunities for women in political life on a cross-national basis. It also identifies innovative solutions to redress the power-sharing balance between women and men. Offering a unique comparative perspective, Sharing Power will appeal to students and scholars of politics, women's studies, history and legislative studies.

The Grammar of Genres and Styles-Dominique Legallois 2018-04-09 The book provides new findings about the grammar of genres and styles. It combines new methods with different kinds of empirical material, from social reports to live TV sports commentaries or 16th century newspapers, in English, French, Latin and Spanish. The study of non-discrete units suggests new ways of seeing the linguistic variation between genres and styles and the ways in which belonging to a genre predetermines linguistic choices.

The Class-Julian Sefton-Green 2016-05-03 Do today's youth have more opportunities than their parents? As they build their own social and digital networks, does that offer new routes to learning and friendship? How do they navigate the meaning of education in a digitally connected but fiercely competitive, highly individualized world? Based upon fieldwork at an ordinary London school, The Class examines young people's experiences of growing up and learning in a digital world. In this original and engaging study, Livingstone and Sefton-Green explore youth values, teenagers' perspectives on their futures, and their tactics for facing the opportunities and challenges that lie ahead. The authors follow the students as they move across their different social worlds—in school, at home, and with their friends, engaging in a range of activities from video games to drama clubs and music lessons. By portraying the texture of the students' everyday lives, The Class seeks to understand how the structures of social class and cultural capital shape the development of personal interests, relationships and autonomy. Providing insights into how young people's social, digital, and learning networks enable or disempower them, Livingstone and Sefton-Green reveal that the experience of disconnections and blocked pathways is often more common than that of connections and new opportunities.

Oral Sex That'll Blow Her Mind-Shanna Katz 2012-07-10 BECOME AN ORAL SEX AFICIONADO You can't be a superstar sex partner until you've mastered the subtle art of cunnilingus.
