Parliamentary Debates (Hansard).-Great Britain. Parliament. House of Commons 2006 Contains the 4th session of the 28th Parliament through the session of the Parliament.

Resident Duty Hours-Institute of Medicine 2009-04-27 Medical residents in hospitals are often required to be on duty for long hours. In 2003 the organization overseeing graduate medical education adopted common program requirements to restrict resident workweeks, including limits to an average of 80 hours over 4 weeks and the longest consecutive period of work to 30 hours in order to protect patients and residents from unsafe conditions resulting from excessive fatigue. Resident Duty Hours provides a timely examination of how those requirements were implemented and their impact on safety, education, and the training institutions. An in-depth review of the evidence on sleep and human performance indicated a need to increase opportunities for sleep during residency training to prevent acute and chronic sleep deprivation and minimize the risk of fatigue-related errors. In addition to recommending opportunities for on-duty sleep during long duty periods and breaks for sleep of appropriate lengths between work periods, the committee also recommends enhancements of supervision, appropriate workload, and changes in the work environment to improve conditions for safety and learning. All residents, medical educators, those involved with academic training institutions, specialty societies, professional groups, and consumer/patient safety organizations will find this book useful to advocate for an improved culture of safety.

Traffic Safety Facts: 2005 Data-Barry Leonard 2008-05 Motor vehicle travel is the primary means of transport. in the U.S., providing an unprecedented degree of mobility. Yet for all its advantages, deaths & injuries resulting from motor vehicle crashes are the leading cause of death for persons from 3 to 33. Traffic fatalities accounted for more than 90% of transportation-related fatalities. This report contains statistics on motor vehicle fatalities based on data from the Fatality Analysis Reporting System, a census of fatal crashes within the 50 States, D.C., & Puerto Rico. Crash & injury statistics are based on data from a probability-based sample of police-reported crashes, from 60 locations across the country, from which

estimates of nat. totals for injury & property-damage-only crashes are derived. Tables.

Safety and Survival in an Earthquake-George O. Gates 2008-05 Discusses the many actions you can take before an earthquake occurs to reduce the dangers to yourself, your family, & others. These include what you can do as a citizen; as a homeowner or tenant; as a parent or head of a family; & as an individual. Also discusses what you can do during & after an earthquake. Photos.

Professional Safety- 2003

Industrial Safety Survey- 1931

Occupational Health and Safety in the Care and Use of Nonhuman Primates-National Research Council 2003-07-13 The field of occupational health and safety constantly changes, especially as it pertains to biomedical research. New infectious hazards are of particular importance at nonhuman-primate facilities. For example, the discovery that B virus can be transmitted via a splash on a mucous membrane raises new concerns that must be addressed, as does the discovery of the Reston strain of Ebola virus in import quarantine facilities in the U.S. The risk of such infectious hazards is best managed through a flexible and comprehensive Occupational Health and Safety Program (OHSP) that can identify and mitigate potential hazards. Occupational Health and Safety in the Care and Use of Nonhuman Primates is intended as a reference for vivarium managers, veterinarians, researchers, safety professionals, and others who are involved in developing or implementing an OHSP that deals with nonhuman primates. The book lists the important features of an OHSP and provides the tools necessary for informed decision-making in developing an optimal program that meets all particular institutional needs.
