Apex Courts and the Common Law-Paul Daly 2019-04-08 For centuries, courts across the common law world have developed systems of law by building bodies of judicial decisions. In deciding individual cases, common law courts settle litigation and move the law in new directions. By virtue of their place at the top of the judicial hierarchy, courts at the apex of common law systems are unique in that their decisions and, in particular, the language used in those decisions, resonate through the legal system. Although both the common law and apex courts have been studied extensively, scholars have paid less attention to the relationship between the two. By analyzing apex courts and the common law from multiple angles, this book offers an entry point for scholars in disciplines related to law — such as political science, history, and sociology — who are seeking a deeper understanding and new insights as to how the common law applies to and is relevant within their own disciplines.

 American Government-Glen Krutz 2018-01-07 Our American Government textbook adheres to the scope and sequence of introductory American government courses nationwide. We have endeavored to make the workings of American Government interesting and accessible to students while maintaining the conceptual coverage and rigor inherent in the subject at the college level. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as engaged citizens. The organization and pedagogical features were developed and vetted with feedback from American government instructors dedicated to the project.
