Teaching Information Technology 14+-Evershed, Jane 2010-10-01 The world of information technology is diverse, impacting on, driving and supporting westernised business and industry as well as affecting every individual. Teachers of IT need to ensure that students recognise and understand why information technology is so important to business and society, as well as helping them to develop functional skills. Teaching Information Technology 14+ helps teachers of IT do just that. It explores the nature of Information Technology (IT), describes some of the current issues and debates surrounding IT and suggests appropriate strategies for successful learning and assessment. In addition to providing teachers with support in differentiating between the numerous Information Technology qualifications, it also includes some examples of relevant teaching and learning strategies and includes case studies and quotations from successful IT teachers and industry practitioners, drawn from a range of environments to highlight key concepts. Teaching Information Technology 14+ is not designed simply as another resource book, but as a means to engage students in the wider aspects of IT through the inclusion of reflective questions, encouraging readers to research and debate the place of IT today.

Support for Home Education-Great Britain: Parliament: House of Commons: Education Committee 2012-12-18 This report supports the right of parents to educate their children at home and accept that home educating families should bear the costs of that provision. It is not reasonable, however, that it should be so difficult to access an exam centre nor that families should pay exam costs on top of everything else. Home educators and local authorities (LAs) have, since the Badman Review and its aftermath in 2009, made "real efforts to engage" and to "ensure more constructive relationships and better support", but there is clearly some way to go. In particular, the Committee notes the 'postcode lottery' element of current provision for home educators, with different LAs offering starkly different services and patterns of support. It calls on the Department for Education to conduct an audit, review the home education guidance given to LAs and to support pilots for 'local offers of support' being published. The Committee is also concerned that provisions for home-educated young people with SEN are not being fully met.
