A People's Art History of the United States-Nicolas Lampert 2013-11-05 Most people outside of the art world view art as something that is foreign to their experiences and everyday lives. A People's Art History of the United States places art history squarely in the rough-and-tumble of politics, social struggles, and the fight for justice from the colonial era through the present day. Author and radical artist Nicolas Lampert combines historical sweep with detailed examinations of individual artists and works in a politically charged narrative that spans the conquest of the Americas, the American Revolution, slavery and abolition, western expansion, the suffragette movement and feminism, civil rights movements, environmental movements, LGBT movements, antiglobalization movements, contemporary antiwar movements, and beyond. A People's Art History of the United States introduces us to key works of American radical art alongside dramatic retellings of the histories that inspired them. Stylishly illustrated with over two hundred images, this book is nothing less than an alternative education for anyone interested in the powerful role that art plays in our society.

How to Create and Use Rubrics for Formative Assessment and Grading-Susan M. Brookhart 2013-01-01 What is a rubric? A rubric is a coherent set of criteria for student work that describes levels of performance quality. Sounds simple enough, right? Unfortunately, rubrics are commonly misunderstood and misused. The good news is that when rubrics are created and used correctly, they are strong tools that support and enhance classroom instruction and student learning. In this comprehensive guide, author Susan M. Brookhart identifies two essential components of effective rubrics: (1) criteria that relate to the learning (not the "tasks") that students are being asked to demonstrate and (2) clear descriptions of performance across a continuum of quality. She outlines the difference between various kinds of rubrics (for example, general versus task-specific, and analytic versus holistic), explains when using each type of rubric is appropriate, and highlights examples from all grade levels and assorted content areas. In addition, Brookhart addresses * Common misconceptions about rubrics; * Important differences between rubrics and other assessment tools such as checklists and rating scales, and when such alternatives can be useful; and * How to use rubrics for formative assessment and grading, including standards-based grading and report card grades. Intended for educators who are already familiar with rubrics as well as those who are not, this book is a complete resource for writing effective rubrics and for choosing wisely from among the many rubrics that are available on the Internet and from other sources. And it makes the case that rubrics, when used appropriately, can improve outcomes by helping teachers teach and helping students learn.

Discussing Modernity.-Dorota Koczanowicz 2013 Martin Jay is one of America's leading intellectual historians. His work spans almost all important questions concerning the subject of modernity. Outstanding Polish scholars engage in a dialogue with Jay's work, discussing significant problems of modernity and postmodernity. The book offers a broad panorama of contemporary thought approached from various angles. It is also a unique exercise of intercultural intellectual dialogue covering many areas from literature to politics. The book also includes an essay on photography by Martin Jay and his detailed response to the other contributors, which has the character of an extended conversation with them. The book can serve as an assessment of the uptake of Jay's ideas, and equally well as a general introduction to the genealogy of modernity and postmodernity.

Digital Image Collections-Michael Ester 1996 The Commission on Preservation and Access has published a number of reports on the preservation and access implications of scanning text and microfilm. This report focuses on what sets the digitization of visual collections apart from other scanning projects. Projects to digitize visual collections present their own unique set of questions and concerns, as well as issues that overlap with digital capture of text. The report provides basic suggestions about planning digitization projects, practical guidelines for working with images, and some final thoughts about the future systems and infrastructure needed to provide collections of images over the long-term. To use digitization as a tool to provide worthwhile, enduring access to treasured cultural and historical resources, one must become informed, establish guidelines, and proceed in rational, measured steps to assure that such reformatting of visual matter is accomplished as well and as cost-effectively as possible. The paper includes the following sections: (1) Introduction (Digital Images as a Reproduction Medium and Of Letters, Lines and Images: Reproductions in Print Publications); (2) The Original Object and Its Reproduction; (3) A Framework for Assessing Image Quality; (4) Color Matching for Image Collections (Color Management, Transformation and Image Output and Controlling Images in Distribution Environments); (5) Documentation and the Integration of Image and Text (Production and Management Documentation); (6) Building Image Collections; and (7) Image Access and User Environments (Rights To Image Collections, Electronic Publications and Use of Visual Materials, and How Will Collections of Digital Images Be Created?). (Contains 45 references.) (SWC)
