Problems in Breast Surgery-Jack Fisher 2014-05-28 Problems in Breast Surgery: A Repair Manual is destined to become a valued part of every plastic surgeon and breast surgeon's library. This unique book provides a virtual lifeline for addressing the challenges encountered in aesthetic and reconstructive breast surgery and avoiding possible problems and complications. This is not a traditional technique-oriented textbook; rather, it has a problem focus and provides different solutions for solving complex problems associated with secondary breast surgery. The book begins with chapters on the basic principles of corrective breast surgery and the key anatomic factors and mechanisms of failure that are key to accurate analysis. With this foundation in place, it proceeds to address the spectrum of potential problems that can occur with each of the different procedures, ranging from breast augmentation, reduction, and mastopexy to breast and nipple-areola reconstruction. Each chapter is introduced with a specific problem presented by Drs. Fisher and Handel. Then the second portion of the chapter features a variety of solutions from different experts for treating the problem. These experts provide case examples of similar problems with a step-by-step explanation of how they solved these problems and why they took the approach that they used. The book covers both aesthetic and reconstructive breast surgery. The goal of this text is not to judge which solution is the best (that decision is left to the reader). Rather, it is designed to provide a detailed road map explaining how to move from point A, the problem, to point B, the solution. Beautifully Illustrated

color illustrations and numerous preoperative, intraoperative, and postoperative images help readers visualize the steps of each operative solution. Unique Features This book's approach is unique and should be of great educational value to surgeons—both residents and practitioners—in solving challenging problems and complications. Even more important, it will help them avoid problems and complications in future cases.

Hobbies-Otto C. Lightner 1954

The Author Training Manual-Nina Amir 2014-02-18 If you want to write a book that's going to sell to both publishers and readers, you need to know how to produce a marketable work and help it become successful. It starts the moment you have an idea. That's when you begin thinking about the first elements of the business plan that will make your project the best it can be. The reality is that you don't want to spend time and energy writing a book that will never get read. The way to avoid that is to create a business plan for your book, and evaluate it (and yourself) through the same lens that an agent or acquisitions editor would. The Author Training Manual will show you how to get more creative and start looking at your work with those high standards in mind. Whether you're writing fiction or non-fiction, or intend to publish traditionally or self-publish, author Nina Amir will teach you how to conduct an effective competitive analysis for your work and do a better job at delivering the goods to readers than similar books that are already on the shelf. Packed with step-by-step instructions, idea evaluations, sample business plans, editor and agent commentaries, and much more, The Author Training Manual provides the information you need to transform from aspiring writer to career author.
