Encyclopedia of Distributed Learning-Anna DiStefano 2003-11-06 In today's fast-paced world, with multiple demands on time and resources as well as pressures for career advancement and productivity, self-directed learning is an increasingly popular and practical alternative in continuing education. The Encyclopedia of Distributed Learning defines and applies the best practices of contemporary continuing education designed for adults in corporate settings, Open University settings, graduate coursework, and in similar learning environments. Written for a wide audience in the distance and continuing education field, the Encyclopedia is a valuable resource for deans and administrators at universities and colleges, reference librarians in academic and public institutions, HR officials involved with continuing education/training programs in corporate settings, and those involved in the academic disciplines of Education, Psychology, Information Technology, and Library Science. Sponsored by The Fielding Graduate Institute, this extensive reference work is edited by long-time institute members, bringing with them the philosophy and authoritative background of this premier institution. The Fielding Graduate Institute is well known for offering mid-career professionals opportunities for self-directed, mentored study with the flexibility of time and location that enables students to maintain commitments to family, work, and community. The Encyclopedia of Distributed Learning includes over 275 entries, each written by a specialist in that area, giving the reader comprehensive coverage of all aspects of distributed learning, including use of group processes, self-assessment, the life line experience, and developing a learning contract. Topics Covered Administrative Processes Policy, Finance and Governance Social and Cultural Perspectives Student and Faculty Issues Teaching and Learning Processes and Technologies Technical Tools and Supports Key Features A-to-Z organization plus Reader's Guide groups entries by broad topic areas Over 275 entries, each written by a specialist in that area Comprehensive index and cross-references between entries add to the encyclopedia's ease of use Annotated listings for additional resources, including distance learning programs, print and non-print resources, and conferences Directory of Research Grants 2008-Schoolhouse Partners Llc 2008-05 It was the 50s and life was simple, until September 25, 1954. That was the night that would be etched in the memory of the citizens of Stanfield, Massachusetts. The Chief of Police described the brutal savagery of the double homicide as "the most atrocious crime in the history of the city." A fourteen-year-old girl, and the four-year-old boy in her care were murdered at the hands of a deranged, depraved killer. A Thread of Evidence places the reader at the scene of the crime, an eye witness to the senseless stabbing of two innocent children. With a piece of crochet thread as their only clue, the entire police department, lead by detectives Steven Logan and Raymond Gage, scour the city in search of a maniacal savage. When all tips and leads have been exhausted, they review all evidence. They come back to the thread. The only real evidence. With tenacity and perseverance of Logan and Gage the killer is apprehended. The reader experiences the twists and turns of the investigation, and ultimately occupies a reserved seat in the Superior Court as the trial proceedings commence. A Thread of Evidence has been written as fiction, but inspired by an actual event. Fifty years later, it remains etched in the minds of all who had lived in the area. The author has researched court records, newspapers, interviewed neighbors, police and has drawn on personal

recollections of the crime. The story has been recounted over and over and to this day, it continues to be discussed. *A Thread of Evidence* is a compelling account of superb detective work, and unprecedented dedication of an entire police department.

How to Write a Successful Research Grant Application-Willo Pequegnat 2013-03-09 The Department of Health and Human Services has identified Acquired Immunodeficiency Syndrome (AIDS) as the foremost public health problem in the United States. The Centers for Disease Control (CDC) report that, as of December 31, 1994, there were 441,528 documented cases of AIDS in this country, and the number is increasing. AIDS is an illness characterized by a defect in natural immunity against disease. Many more individuals are known to be infected with Human Immunodeficiency Virus (HIV) but do not have symptoms or the defining characteristics of AIDS. The incubation period for AIDS may range from 1 to 10 or more years in adults and 6 months to several years in children. Infected persons appear to be capable of transmitting infection indefinitely, even if they remain asymptomatic. In order to increase the number of minority investigators conducting research on HIV infection and AIDS, NIMH conducted a 3h-day technical workshop for minority investigators on July 24-27, 1990, in Fairlakes, Virginia. University-based research programs were asked to nominate investigators who were selected on the basis of a referred 10-page prospectus for a proposed research project. This procedure was used because NIMH wanted to be sure that the prospective investigators were established in a research environment that would provide a practical guide to academic research-Graham Birley 1998 Covering the practical aspects of research in a user-friendly and comprehensive manner, this research tool has valuable advice for researchers and academics on: obtaining funding and access to conduct research, research methodologies, using literature sources, researching within organizations, and getting published. This practical book will prove ideal for all research students and academic staff - especially those researching in the fields of education and the social sciences.

The Research Funding Guidebook-Joanne B. Ries 1997-09-09 This hands-on guide begins at the point many grant seekers can identify with - rejection. Part One emphasizes how to resubmit unfunded applications to make them more competitive. The material contained in this section is invaluable, especially since funding sources are now limiting the number of times the same application can be

resubmitted. Part Two highlights the practical issues of a project after funding has been obtained. The authors provide a map of the people and places that must become part of a researcher's daily and weekly routine, a checklist to aid the newly funded researcher's progress, and guidance on the essential but often overlooked feature of research funding, time management. Intervention Research-Bernadette Mazurek Melnyk, PhD, RN, CPNP/ PMHNP, FNAP, FAAN 2012-04-23

2012 First Place AJN Book of the Year Award Winner in Nursing Research! "This is a resource for success and should be a part of any researcher's library."--Doody's Medical Reviews This book is a practical, user-friendly guide for health care researchers across multiple disciplines who are involved in intervention research. It provides all of the essential elements needed for understanding how to design, conduct, analyze, and fund intervention studies that are replicable and can withstand the scrutiny of the Institutional Review Board and peer review. Developed from an annual continuing education workshop on intervention studies conducted by Dr. Melnyk, this text is the most comprehensive body of information available on this topic. Contributors address the design of interventions that are ethically considerate and sensitive to culture, race/ethnicity, and gender, minimizing threats to external and internal validity, measurement, and budgeting. The guide explores such implementation issues as subject recruitment and retention, data management, and specialized settings, cost analysis, and explaining intervention effects. The text also guides readers in writing grant applications that fund , and addresses how to move intervention study findings into the real world. A unique addition to the book is the availability of digital examples of progress reports, final reports, and research grant applications that have received funding from the National Institutes of Health and other relevant organizations. This text is a valuable resource for all health care professionals conducting research and for doctoral students in health care studies. Key Features: Presents the essential tools for designing, conducting, analyzing, and funding intervention studies Designed for use by health care professionals conducting intervention research Provides comprehensive, accessible guidelines for doctoral students across all health care disciplines Instructs readers on writing grant applications that fund Includes digital examples of funded research grants, progress reports, and final reports

A Guide to Starting Your Hedge Fund-Erik Serrano Berntsen 2015-05-04 Successful hedge fund investing begins with well-informed strategy A Guide to Starting Your Hedge Fund is a practical, definitive "how-to" guide, designed to help managers design and launch their own funds, and to help investors select and diligence new funds. The first book to examine the practical aspects of setting up and operating funds with a focus on energy commodity markets, this book scrutinises the due diligence process and comprehensively reviews the opportunities and risks of all energy commodity markets as hedge fund investments. Extensive planning and strategy advice prove invaluable to prospective fund managers and investors alike, and detailed discussion of the markets' constraints help inform procedural decisions. Readers gain insight into practical matters including legal and commercial structures, due diligence, fund raising, operations, and more, allowing them to construct a concrete investment plan before ever touching a penny. Asset managers are looking to energy commodities to provide attractive uncorrelated - if volatile - returns. These high returns, however, are accompanied by high risk. Few investors have experience evaluating these investment opportunities, and few prospective fund managers understand the market fundamentals and their associated risks. This book provides the answers sorely lacking in hedge fund literature, giving investors and fund managers the background they need to make smarter decisions. Understand the markets' structures, opportunities, and risks Develop a comprehensive, well-informed investment strategy Conduct thorough due diligence with a detailed plan Examine the practical aspects of fund raising, legal and tax structure, and more Oil has long been traded by hedge funds, but electricity, the fuels that generate electricity, and the environmental products like emissions allowances and weather derivatives have become the new "hot" investment strategies. These high returns come with higher risk, but A Guide to Starting Your Hedge Fund ensures participants have essential information at their disposal. Research funding as an investment--can we measure the returns?-

Community-Based Participatory Health Research, Second Edition-Daniel S. Blumenthal, MD, MPH 2013-02-01

Community-Based Participatory Research (CBPR) has become the preferred model for conducting research in communities. Most scientists who conduct such research now recognize that working in partnership with the community is preferable, and more ethical, than conducting research on a community. As Surgeon General of the United States, I direct a number of programs aimed at encouraging Americans to avoid tobacco, engage in physical activity, consume more nutritious diets, and protect their health in other ways. We need more effective methods to persuade, motivate, and enable individuals and communities to adopt these healthier lifestyles, and it is through CBPR that we will be able to discover these methods.

From the Foreword by Regina M. Benjamin, MD, MBA, U.S. Surgeon General

The editors of this book bring together in one place both a description of epidemiological methods and a discussion of community-level issues. It is a volume that will prove useful to those who wish to conduct contemporary community-based research.

Praise for the First Edition from the Foreword David Satcher, Former Surgeon General of the United States

This second edition of a highly regarded textbook on the foundations of and strategies for achieving fertile community-based health care research has been completely revised and updated. It now includes new chapters on translating research into practice, evaluating research, and applying community-based participatory research (CBPR) principles to service, education, and evaluation. The book also updates a crucial chapter on the voices of community stakeholders and an important study of the ethical issues surrounding the Tuskegee Syphilis Study. Edited by renowned professors of community-based research, the text is distinguished by its how-to approach and focus on practical research methods. The text discusses the unique challenges of conducting CBPR and addresses ways to build and sustain community partnerships. It explores ethical issues regarding health care research, includes input from community stakeholders, and describes national and international support for CBPR. Research methods covered include qualitative studies, surveys, and intervention trials. Applications of CBPR illustrate how to translate research into practice and community-based participatory approaches to service, education, and evaluation. The second edition includes new chapters on: Building and sustaining researcher/community partnerships National and international investments in and support for CBPR Surveys and methods for conducting CBPR Translating research into practice Community-based participatory approaches to service, education, and evaluation

Black Holes & Time Warps: Einstein's Outrageous Legacy (Commonwealth Fund Book Program)-Kip Thorne 1995-01-17

Winner of the 2017 Nobel Prize in Physics Ever since Albert Einstein's general theory of relativity burst upon the world in 1915 some of the most brilliant minds of our century have sought to decipher the mysteries bequeathed by that theory, a legacy so unthinkable in some respects that even Einstein himself rejected them. Which of these bizarre phenomena, if any, can really exist in our universe? Black holes, down which anything can fall but from which nothing can return; wormholes, short spacewarps connecting regions of the cosmos; singularities, where space and time are so violently warped that time ceases to exist and space becomes a kind of foam; gravitational waves, which carry symphonic accounts of collisions of black holes billions of years ago; and time machines, for traveling backward and forward in time. Kip Thorne, along with fellow theorists Stephen Hawking and Roger Penrose, a cadre of Russians, and earlier scientists such as Oppenheimer, Wheeler and Chandrasekhar, has been in the thick of the quest to secure answers. In this masterfully written and brilliantly informed work of scientific history and explanation, Dr. Thorne, a Nobel Prize-winning physicist and the Feynman Professor of Theoretical Physics Emeritus at Caltech, leads his readers through an elegant, always human, tapestry of interlocking themes, coming finally to a uniquely informed answer to the great question: what principles control our universe and why do physicists think they know the things they think they know? Stephen

Hawking's A Brief History of Time has been one of the greatest best-sellers in publishing history. Anyone who struggled with that book will find here a more slowly paced but equally mind-stretching experience, with the added fascination of a rich historical and human component. Winner of the Phi Beta Kappa Award in Science.

The Psychology Research Handbook-Frederick T. L. Leong 2006 A comprehensive, easy-to-understand guide to the entire research process, this book quickly and efficiently equips advanced students and research assistants to conduct a full-scale investigation. The book is organized around the idea of a 'research script' that is, it follows the standard mode of research planning and design, data collection and analysis, and results writing. The volume contains 35 chapters, some co-authored by advanced graduate students who give their fellow students a touch of the 'real world' adding to the clarity and practicality of many chapters.

DFID's contribution to the Global Fund to Fight AIDS, Tuberculosis and Malaria-Great Britain: Parliament: House of Commons: International Development Committee 2012-05-22 The Global Fund to Fight AIDS, Tuberculosis and Malaria was created in 2001 to increase funding to tackle three of the world's most devastating diseases. It has approved £14.1 billion for programmes in 150 countries, provided AIDS treatment for 3.3 million people, anti-tuberculosis treatment for 8.6 million people and 230 million insecticide-treated nets for the prevention of malaria. The UK is the Global Fund's third highest donor and Ministers had committed over a year ago to increase funds to it but this money has not yet been delivered nor the amount of the increase confirmed. The Committee is concerned by the delay in delivering funds and is calling for the UK to increase its contribution to the Global Fund significantly - over and above the current £384m pledge for 2012 to 2015 - subject to reform. The Committee says that the G20 meeting in Mexico provides a good opportunity for the UK to announce new funds, but only if conditions are met and UK taxpayers' money is adequately safeguarded. The Global Fund has had a difficult year, with financial problems, corruption scandals and the resignation of its director. Confidence in the Fund was affected with some countries temporarily suspending payments and the Global Fund had to cancel a round of grants totalling some £930m. However, the MPs say that the Global Fund has made good progress under its new management to reform the organisation's structures and financial risk monitoring. In May 2012 the Global Fund announced some £630 million in new funds
