Designing Motion-Markus Caspers 2016-09-26 The chaise-longue by Le Corbusier, the radio by Rams, the chair by Eames – designers make things into cult objects and become icons themselves. But who knows which coupé was designed by Frua, which limousine by Engel, which station wagon by Opron? For a long time, car design was considered to be anonymous, the designers stood in the shadow of the perception of the design, even though their designs can be found on the roads in millions. This richly illustrated book captures the origin of a profession and maps the development of car design based on a comprehensive introduction and the career biographies of over 200 selected designers who contributed to the design of cars and many different associated products in the USA, Europe, and Japan between 1900 and 2000.

The Discourse of Kingship in Classical Greece-Carol Attack 2019 This book examines how ancient authors explored ideas of kingship as a political role fundamental to the construction of civic unity, the use of kingship stories to explain the past and present unity of the polis and the distinctive function or status attributed to kings in such accounts. It explores the notion of kingship offered by historians such as Herodotus, as well as dramatists writing for the Athenian stage, paying particular attention to dramatic depictions of the unique capabilities of Theseus in uniting the city in the figure of the 'democratic king'. It also discusses kingship in Greek philosophy: the Socratics' identification of an 'art of kingship', and Xenophon and Isocrates' model of 'virtue monarchy'. In turn, these allow a rereading of explorations of kingship and excellence in Plato's later political thought, seen as a critique of these models, and also in Aristotle's account of total kingship or pambasileia, treated here as a counterfactual device developed to explore the epistemic benefits of democracy. This book offers a fascinating insight into the institution of monarchy in classical Greek thought and society, both for those working on Greek philosophy and politics, and also for students of the history of political thought.

"Remember Those Great Volkswagen Ads?"-Alfredo Marcantonio 2000 In 1959, Doyle Dane Bernbach, the New York advertising agency was appointed to handle the Volkswagen account in the USA. The advertisements they produced through the sixties and early seventies changed the face of advertising, not just in America but across the world. Remember those great Volkswagen ads? looks briefly at the events surrounding the birth of the campaign and the car, and shows many of the highly acclaimed advertisements produced by the agency. This book has been written and compiled by Alfredo Marcantonio, Copywriter and one-time Advertising Manager of VWGB Ltd, John O'Driscoll, Art Director of many British Volkswagen ads, and David Abott, an ex-Creative and Managing Director of DDB's London office. They decided to put the book together some 20 years ago as "to let the Beetle and its advertising pass on without a permanent record seemed a crying shame". This book is a story of the car and its advertising. In a unique way the two were indistinguishable ? the charming, honest advertising became part of the charm and honesty of the car. If you ever owned a Beetle, if you've ever chuckled at a Volkswagen advertisement, or if you simply appreciate wit and style, you will enjoy this book. It's the tale of an ugly duckling that became an office pin-up.

For longtime fans of the celebrated humorist, the collection features a host of O’Rourke’s classic pieces on driving, including “How to Drive Fast on Drugs While Getting Your Wing-Wang Squeezed and Not Spill Your Drink,” about the potential misdeeds one might perform in the front (and back) seat of an automobile; “The Rolling Organ Donors Motorcycle Club,” which chronicles a seven-hundred-mile weekend trip
