B747-400 ISD Training Questionnaire- 2016-01-29 This questionnaire is addressed to pilots operating the B747-400. It is based on the Flight Crew Operations Manual (FCOM) 747-509, and theFlight Crew Training Manual (FCTM) B747-400, both published by Air Atlanta Icelandic. It is not substituting any approved bibliography and it is not covering all topics. It is organized in 26 chapters, in order to be compatible with the bibliography of origin. It is configured under the ISD method, used in the Air Force of many states (i.e. USAF). As such, it serves for studying and better understanding, instead of assessing. In an ISD questionnaire: □ There are no statements about equally True or False. □ It is usually very easy to identify the True answer. Remember that the question serves as an excuse to provide an information, not for assessing knowledge. □ The False answers serve to increase the contrast between True and False, and not to confuse the trainee and increase the level of difficulty. □ Whenever there is a choice of True or False, the answer is always the True. This is to prevent for a False information to be adopted. □ Whenever is asked to "Mark the True statements", expect almost all statements to be valid. This serves as an excuse to provide information, not for assessing knowledge. Note that due to the bibliography of origin, some company limitations or procedures may be incorporated in the questionnaire.

How to Land a Plane-Mark Vanhoenacker 2019-04-30 Take a seat—the captain's seat, that is—and relax. You're about to land a Boeing 747. The mystery of flight is magical; the reality, still more so—from the physics that keeps a 450-ton vehicle aloft, to the symphony of technology and teamwork that safely sets it down again. Take it from Mark Vanhoenacker—British Airways pilot, internationally bestselling author, and your new flight instructor. This is How to Land a Plane. Vanhoenacker covers every step—from approach to touchdown— with precision, wit, and infectious enthusiasm. Aided by dozens of illustrations, you'll learn all the tools and rules of his craft: altimeters, glidepaths, alignment, and more. Before you know it, you'll be on the ground, exiting the aircraft with a whole new appreciation for the art and science of flying.
