The main objective of IJEBS is to provide an intellectual platform for researchers, in which research in alternative paradigms for business and economic inquiry could be analysed and discussed. The journal provides opportunities for economists and business related professionals in a global realm to publish their paper in one source. The International Journal of Economics and Business Studies is also indented to bring together academicians and professionals from all related business and economics fields to interact with academics inside and outside their own particular disciplines.

Business Studies-David Floyd 2006-07 This volume covers the 2006 subject specifications for all exam boards. The text is laid out in 'sound bite' boxes to aid recollection, with clearly labelled diagrams to add visual clarity and further demonstrate the subject matter.
Business Valuation and Federal Taxes-David Laro 2011-03-25 Praise for Business Valuation and Federal Taxes Procedure, Law, and Perspective Second Edition "The Honorable David Laro and Dr. Shannon Pratt present a comprehensive primer on federal tax valuation controversies that will benefit both tax practitioners (attorneys and CPAs) and valuation practitioners. . . . It serves as a valued reference source and an introductory text for legal and valuation training." —Roger J. Grabowski, Duff & Phelps Corp. from the Foreword "[I]t is refreshing to see these two close observers of valuation issues collaborate on this intriguing volume. What the reader gets is something like a mural—depicting the life of a business appraisal from conception to preparation to the occasional ultimate use by a trier of fact." —Ronald D. Aucutt, Esq.,McGuireWoods LLP, from the Foreword "This offering from Judge David Laro and Dr. Shannon Pratt fills in some persistent gaps in the business valuation literature, as well as a surprisingly fresh treatment of perennial themes." —John A. Bogdanski, Professor of LawLewis & Clark Law School, from the Foreword Straightforward guidance and perspective on business valuation from two of the nation's top authorities Written by Senior Judge David Laro and Shannon Pratt, both leading experts on the subject, Business Valuation and Federal Taxes, Second Edition provides a comprehensive overview of business valuation procedures. The new edition offers: Insightful perspectives of personal versus enterprise goodwill New materials on transfer pricing and customs valuations and how recent markets have affected both the income and market approaches Timely coverage of FAS 157 and its many changes to penalties and sanctions affecting both taxpayers and appraisers Exploration of new court cases Presenting knowledge and guidance to those who perform valuations as well as those who are affected by them, Business Valuation and Federal Taxes, Second Edition is the essential guide to federal taxes and valuation, and specifically valuations relating to business interests.

Competitive Advantage of Nations-Michael E. Porter 2011-05-31 Now beyond its eleventh printing and translated into twelve languages, Michael Porter's The Competitive Advantage of Nations has changed completely our conception of how prosperity is created and sustained in the modern global economy. Porter's groundbreaking study of international competitiveness has shaped national policy in countries around the world. It has also transformed thinking and action in states, cities, companies, and even entire regions such as Central America. Based on research in ten leading trading nations, The Competitive Advantage of Nations offers the first theory of competitiveness based on the causes of the productivity with which companies compete. Porter shows how traditional comparative advantages such as natural resources and pools of labor have been superseded as sources of prosperity, and how broad macroeconomic accounts of competitiveness are insufficient. The book introduces Porter's "diamond," a whole new way to understand the competitive position of a nation (or other locations) in global competition that is now an integral part of international business thinking. Porter's concept of "clusters," or groups of interconnected firms, suppliers, related industries, and institutions that arise in particular locations, has become a new way for companies and governments to think about economies, assess the competitive advantage of locations, and set public policy. Even before publication of the book, Porter's theory had guided national reassessments in New Zealand and elsewhere. His ideas and personal involvement have shaped strategy in countries as diverse as the Netherlands, Portugal, Taiwan, Costa Rica, and India, and regions such as Massachusetts, California, and the Basque country. Hundreds of cluster initiatives have flourished throughout the world. In an era of intensifying global competition, this pathbreaking book on the new wealth of nations has become the standard by which all future work must be measured.

Consumer Credit and the American Economy-Thomas A. Durkin 2014-07-16 Consumer Credit and the American Economy examines the economics, behavioral science, sociology, history, institutions, law, and regulation of consumer credit in the United States. After discussing the origins and various kinds of consumer credit available in today's marketplace, this book reviews at some length the long run growth of consumer credit to explore the widely held belief that somehow consumer credit has risen "too fast for too long." It then turns to demand and supply with chapters discussing neoclassical theories of demand, new behavioral economics, and evidence on production costs and why consumer credit might seem expensive compared to some other kinds of credit like government finance. This discussion includes review of the economics of risk management and funding sources, as well discussion of the economic theory of why some people might be limited in their credit search, the phenomenon of credit rationing. This examination includes review of issues of risk management through mathematical methods of borrower screening known as credit scoring and financial market sources of funding for offerings of consumer credit. The book then discusses technological change in credit granting. It examines how modern automated information systems called credit reporting agencies, or more popularly "credit bureaus," reduce the costs of information acquisition and permit greater credit availability at less cost. This discussion is followed by examination of the logical offspring of technology, the ubiquitous credit card that permits consumers access to both payments and credit services worldwide virtually instantly. After a chapter on institutions that have arisen to supply credit to individuals for whom mainstream credit is often unavailable, including "payday loans" and other small dollar sources of loans, discussion turns to legal structure and the regulation of consumer credit. There are separate chapters on the theories behind the two main thrusts of federal regulation to this point, fairness for all and financial disclosure. Following these chapters, there is another on state regulation that has long focused on marketplace access and pricing. Before a final concluding chapter, another chapter focuses on two noncredit marketplace products that are closely related to credit. The first of them, debt protection including credit insurance and other forms of credit protection, is economically a complement. The second product, consumer leasing, is a substitute for credit use in many situations, especially involving acquisition of automobiles. This chapter is followed by a full review of consumer bankruptcy, what happens in the worst of cases when consumers find themselves unable to repay their loans. Because of the importance of consumer credit in consumers' financial affairs, the intended audience includes anyone interested in these issues, not only specialists who spend much of their time focused on them. For this reason, the authors have carefully avoided academic jargon and the mathematics that is the modern language of economics. It also examines the psychological, sociological, historical, and especially legal traditions that go into fully understanding what has led to the demand for consumer credit and to what the markets and institutions that provide these products have become today.

The Convergence of Corporate Governance-Abdul Rasheed 2012-06-12 Takes readers through an in-depth examination of many leading industrialized nations and identifies both the drivers that propel corporations towards convergence and the major impediments that stand in the way of convergence. Also examines many mechanisms of convergence such as governance codes, MNCs, and IPOs.
Globalistics and Globalization Studies-Leonid Grinin 2012-08-30 Today globalization can be treated as the most important global process. It is a multi-faceted phenomenon and in every country it has its own image. One can get a truly objective picture of the rapidly changing and integrating world only through a synthesis of all those particular visions. In the present anthology one can find perceptions of globalization by a number of famous scholars from different countries of the world (Ervin Laszlo, Roland Robertson, Shmuel N. Eisenstadt, Randall Collins, Christopher Chase-Dunn, William Thompson and others), but one can also get to know rather peculiar visions of globalization by the Russian scientists. The volume is entitled Globalistics and Globalization Studies. Globalistics may be regarded as a sort of systemic and more or less integrated 'core' within Global Studies. The anthology consists of four parts presenting a wide range of views on the meaning of the contemporary epoch, the past and the future of some important global processes. Part 1. Historical Dimension. Part 2. Globalistics, Global Studies and Models. Part 3. Trends, Risks, and Problems. Part 4. Perspectives and the New World Order.
