The Warthog and the Close Air Support Debate-Douglas Campbell 2003 In this story of an underdog and the interaction of the military, politics, and technology in America, Campbell leads the reader through CAS history prior to the A-10's inception and shows how Air Force history and doctrine confronted factors such as the Vietnam War and the Army's super attack helicopter, which led the Air Force to build the Warthog. Lockheed Blackbirds - Warbirdtech-Tony R. Landis 1997-08 On 26 April 1962, Lockheed test pilot Lou Schalk took the first flight in an aircraft at a classified desert test facility in Nevada. The aircraft was far more advanced than anything in the sky, and when made public several years later it would capture the world's fascination like few other aircraft ever have. Three distinct variants were eventually manufactured, but surprisingly, none of them ever had an official name. Unofficially, they have all been referred to as "Blackbirds" and "Habu," the fastest, highest flying air-breathing aircraft in the world. The Lockheed model number of the first variant was A-12, but by a sort of inspired perversity it came to be called Oxcart, a code name also applied to the program under which it was developed. The other two variants carried the Air Force designations YF-12 and SR-71. This is the story of the Lockheed Blackbirds - fifty of the fastest, highest-flying air-breathing aircraft ever developed and deployed. This book is crammed with detailed photos and illustrations and is a fantastic resource for scale model builders. Photos in this edition are black and white.

The Future of Social Psychology-Cookie Stephan 2012-12-06 Cookie White Stephan and Walter G. Stephan This is a book about the two social psychologies- psychological social psychology and sociological social psychology--written by social psychologists from both disciplines. It focuses on the benefits and costs of interchange between psychological social psychology and sociological social psychology, with the ultimate goal of encouraging interaction among scholars in the two disciplines. The primary questions addressed are: What do the two disciplines have to offer each other? What are the barriers to fruitful interchange? How can these barriers be overcome? In this introductory chapter we will first examine some historical reasons for the lack of interchange between the two social psychologies. Then we will provide a brief preview of the chapters to follow. The Development of the Two Social Psychologies The beginning of concern with the "social animal" can be traced to the ancient Greeks. However, social psychology's formal beginning is usually dated from Norman Triplett's 1897 publication of his findings on the effects of competition or from the publication in 1908 of two books including the words "Social Psychology" in their titles, one by the psychologist William McDougall and the other by the sociologist Edward Alsworth Ross. Thus, from its inception, social psychology was already divided into two distinct academic units, housed in the disciplines of sociology and psychology.
