My Reading Challenge-Chulabula Designs 2019-06-25 Every year, schools and libraries in the UK (and around the world) encourage children to take part in a reading challenge during their summer holidays. Whether your children are taking part in this challenge or you simply want to encourage them to read more, the "My Reading Challenge" notebook has been designed as a great resource to help children stay excited about their challenge, log and track the books they've read, and show they have understood and thought about what they are reading. This pirate-themed journal is a fun activity book where they can write or draw their feelings about each book to share later with their teachers or challenge organisers and their family. The book is perfect for Key Stage 2 (KS2) children but can be used for all primary school children (ages 4-11) with parental help. Questions are generic so they can apply to fiction and non-fiction books, and ample white space means that younger children can draw - rather than write - their answers if they prefer. space for 10 books (challenges often recommend 6 books but extra space has been given for children who want to move beyond that) book log at the beginning of the notebook for children to list the books they have read, in brief book log at the end of the notebook to list books your children want to read, to get them excited about continuing to read beyond the challenge fun, full-colour illustrations featuring pirates (male & female), ships, treasure, and parrots - "Look Inside" for design and book questions 8.5"x 11" (approx. A4) workbook with a bright paperback cover featuring a fun pirate ship sailing design This is the UK version of the reading challenge workbook and uses British English spelling - such as "favourite" not "favorite". US English version COMING SOON. Also available in other designs. Please note: paper stock is good quality 100 GSM but we recommend drawings are done in coloured pencils or crayons to avoid bleed.

New Interchange Teacher's Edition 3-Jack C. Richards 1998-09-13 -- Students' Book -- Workbook.

The Book of Perfectly Perilous Math-Sean Connolly 2017-03-28 Math rocks! At least it does in the gifted hands of Sean Connolly, who blends middle school math with fantasy to create an exciting adventure in problem-solving. These word problems are perilous, do-or-die scenarios of blood-sucking vampires (How many months would it take a single vampire to completely take over a town of 500,000 people?), or a rowboat of 5 shipwrecked sailors with a single barrel of freshwater (How much can they drink, and for how long, before they go mad from thirst???) Each problem requires readers to dig deep into the tools they're learning in school to figure out how to survive. Kids will love solving these problems. Sean Connolly knows how to make tough subjects exciting and he brings that same intuitive understanding of what inspires and challenges kids' curiosity to the 24 problems in The Book of Perfectly Perilous Math. These problems are as fun to read as they are challenging to solve. They test readers on fractions, algebra, geometry, probability, expressions and equations, and more. Use geometry to fill in for the ship's navigator and make it safely to the New World. Escape an evil Duke's executioner by picking the right door—probability will save your neck.

Can't Hurt Me-David Goggins 2020-03-10 For David Goggins, childhood was a nightmare - poverty, prejudice, and physical abuse colored his days and haunted his nights. But through self-discipline, mental toughness, and hard work, Goggins transformed himself from a depressed, overweight young man with no future into a U.S. Armed Forces icon and one of the world's top endurance athletes. The only man in history to complete elite training as a Navy SEAL, Army Ranger, and Air Force Tactical Air Controller, he went on to set records in numerous endurance events, inspiring Outside magazine to name him The Fittest (Real) Man in America. In this curse-word-free edition of Can't Hurt Me, he shares his astonishing life story and reveals that most of us tap into only 40% of our capabilities. Goggins calls this The 40% Rule, and his story illuminates a path that anyone can follow to push past pain, demolish fear, and reach their full potential.

Prelude to Programming-Stewart Venit 2014 Prelude to Programming is appropriate for Pre-Programming and Introductory Programming courses in community colleges, 4-year colleges, and universities. No prior computer or programming experience is necessary although readers are expected to be familiar with college entry-level

mathematics. Prelude to Programming provides beginning students with a language-independent framework for learning core programming concepts and effective design techniques. This approach gives students the foundation they need to understand the logic behind program design and to establish effective programming skills. The Sixth Edition offers students a lively and accessible presentation as they learn core programming concepts — including data types, control structures, data files and arrays, and program design techniques such as top-down modular design and proper program documentation and style. Problem-solving skills are developed when students learn how to use basic programming tools and algorithms, which include data validation, defensive programming, calculating sums and averages, and searching and sorting lists. Teaching and Learning Experience This program presents a better teaching and learning experience—for you and your students. It provides: A Language-Independent, Flexible Presentation: The text has been designed so that instructors can use it for students at various levels. Features that Help Solidify Concepts: Examples, exercises, and programming challenges help students understand how concepts in the text apply to real-life programs. Real Programming Experience with RAPTOR: Students gain first-hand programming experience through the optional use of RAPTOR, a free flowchart-based programming environment. Support Learning: Resources are available to expand on the topics presented in the text.
