Catalysts for Nitrogen Fixation-Barry E. Smith 2013-03-20 Biological nitrogen fixation provides more than 50% of the total annual input of the essential element nitrogen to world agriculture. Thus, it is of immense agronomic importance and critical to food supplies, particularly in developing countries. This book, with chapters authored by internationally renowned experts, provides a comprehensive and detailed account of the fascinating history of the process - including the surprising discoveries of molybdenum-independent nitrogenases and superoxide-dependent nitrogenase; a review of Man's attempts to emulate the biological process - most successfully with the commercially dominant Haber-Bosch process; and the current state of the understanding art with respect to the enzymes - called nitrogenases - responsible for biological nitrogen fixation. The initial chapters use a historical approach to the biological and industrial processes, followed by an overview of assay methodologies. The next set of chapters focuses on the classical enzyme, the molybdenum nitrogenase, and details its biosynthesis, structure, composition, and mechanism of action as well as detailing both how variants of its two component proteins are constructed by recombinant DNA technology and how computational techniques are being applied. The sophisticated chemical modelling of the metal-containing clusters in the enzyme is reviewed next, followed by a description of the two molybdenum-independent nitrogenases - first, the vanadium-containing enzyme and then the iron-only nitrogenase - together with some thoughts as to why they exist! Then follows an up-to-date treatment of the clearly "non-classical" properties of the superoxide-dependent nitrogenase, which more closely resembles molybdenum-containing hydroxylases and related enzymes, like nitrate reductase, that it does the other nitrogenases. Each chapter contains an extensive list of references. This book is the self-contained first volume of a comprehensive seven-volume series. No other available work provides the up-to-date and in-depth coverage of this series and this volume. This book is intended to serve as an indispensable reference work for all scientists working in this area, including agriculture and the closely related metals-in-biology area; to assist students to enter this challenging area of research; and to provide science administrators easy access to vital relevant information. Citroen BX Service and Repair Manual-Ian Coomber 1996-11-30 Microeconomics-Robert S. Pindyck 2006 Clarkson on Cars-Jeremy Clarkson 2007-06-20 Jeremy Clarkson gets under the bonnet in Clarkson on Cars - a collection of his motoring journalism. Jeremy Clarkson has been driving cars, writing about them and occasionally voicing his opinions on the BBC's Top Gear for twenty years. No one in the business is taller. In this collection of classic Clarkson, stretching back to the mid-1980s, he's pulled together the car columns and stories with which he made his name. As coal mines closed and house prices exploded to a soundtrack of men in make-up playing synthesizers, Jeremy was already waxing lyrical on topics as useful and diverse as: * The perils of bicycle ownership * Why Australians - not Brits - need bull bars * Why soon only geriatrics will be driving BMWs * The difficulty of deciding on the best car for your wedding * Why Jesus's dad would have owned a Nissan Bluebird * And why it is that bus lanes cause traffic jams Irreverent, damn funny and offensive to almost everyone, this is writing with its foot to the floor, the brake lines cut and the speed limit smashed to smithereens. Sit back and enjoy the ride. Praise for Jeremy Clarkson: "Brilliant . . . laugh-out-loud" Daily Telegraph "Outrageously funny . . . will have you in stitches" Time Out "Very funny . . . I cracked up laughing on the tube" Evening Standard Figuratively Speaking-Delana Heidrich 2004-04-01 "This book is organized into ""Figurative Language,"" ""Poetic Language,"" and ""Literary Techniques."" Approaching Literature-Peter Schakel 2007-12-24 Developed by authors with more than 50 years of teaching experience between them, Approaching Literature has been designed as a true alternative to more traditional literature anthologies. The authors conceived this anthology with three principles in mind: (1) that exposing students to the widest array of literature can help every one find common ground with that literature; (2) that contemporary literary works can serve as entry points to reading and appreciating the canonical literature that students often find unfamiliar, intimidating, and sometimes irrelevant; and (3) that the instruction in reading and writing about literature should be accessible and jargon-free to all students, not just potential English majors. With its streamlined and student-friendly instructional text, and its ongoing commitment to showcasing the most engaging and diverse literary works publishing right now, Approaching Literature is built from the ground up with today's students in mind.
