Someone Who Will Love You in All Your Damaged Glory-Raphael Bob-Waksberg 2019-06-11 From the creator of the beloved and universally acclaimed television series BoJack Horseman, a fabulously off-beat collection of short stories about love—the best and worst thing in the universe. “Complex, daring, emotional, and unique, with notes of melancholic brilliance and an aftertaste of subtle elation: it is hard to describe the writing of Raphael Bob-Waksberg without sounding like Frasier discussing wine.” —B. J. Novak, author of One More Thing Written with all the scathing dark humor that is a hallmark of BoJack Horseman, Raphael Bob-Waksberg's stories will make you laugh, weep, and shiver in uncomfortably delicious recognition. In “A Most Blessed and Auspicious Occasion,” a young couple engaged to be married is forced to deal with interfering relatives dictating the appropriate number of ritual goat sacrifices for their wedding. “Missed Connection—m4w” is the tragicomic tale of a pair of lonely commuters eternally failing to make that longed-for contact. And in “More of the You That You Already Are,” a struggling employee at a theme park of dead presidents finds that love can't be genetically modified. Equally at home with the surreal and the painfully relatable (and both at once), Bob-Waksberg delivers a killer combination of humor, romance, whimsy, cultural commentary, and crushing emotional vulnerability.

The Short-Term Impact of Product Market Reforms-Peter N. Gal 2016-09-22 This paper analyzes the effects of product market reforms in the short and medium term across 10 regulated industries and 18 advanced economies for the period 1998-2013 using internationally comparable firm-level data based on Orbis. It provides four key insights. First, product market reforms have positive effects on capital, output and employment and their effects increase over time. After two years, they raise capital by 4%, output by 3% and employment by 1.5%. Second, differences in production technology and the nature of product market regulations across sectors generate important differences in the mechanisms through which reforms operate. In network industries, reforms tend to benefit small firms, while the opposite is observed in retail trade. Product market reforms also promote firm entry, particularly those that reduce entry barriers. Third, credit constraints can play an important role in weakening the positive impact of product market reform on investment. Fourth, product market reforms also tend to have positive effects on firms in downstream sectors—both at home and abroad—that make intensive use of intermediate inputs from deregulated sectors.

Theory of Evolution - Simple Guides-John Scotney 2009-11-01 Today the theory of evolution by natural selection and the science of genetics are the twin keys to our understanding of how life on earth came about. Yet when an English naturalist called Charles Darwin first published his ideas in 1859 in a book called On the Origin of Species the world was horrified at the notion of a changing creation without the intervention a Creator. By contrast, when a few years later an obscure Moravian monk, Gregor Mendel, published the results of his experiments in genetics the world failed to notice John Scotney's new book explains just what these two great men had discovered and follows the amazing development of this seminal idea from the decade when it turned the world on its head to the present time and the unravelling of the human genome. It describes how the first dinosaur fossils were believed to be the bones of giants and how little by little the ongoing story of living creatures has been assembled until we can see the thread of life running from single-cell microorganisms to primates like ourselves, and why most ancient creatures died out and some survive to this day. Indeed we still carry vestiges of former life forms in our bodies and it is said that ancient seas flow in our blood. Anatomy, taxonomy, chemistry, geology, archaeology, and embryology have all had a part in this remarkable detective story, and even the Cold War became involved when the followers of Mendel in the West were confronted by those of Lamarck in China and Russia. Modern evolutionary theory is shown to be a synthesis of many scientific fields and the product both of years of tireless work and of sudden imaginative leaps. The Theory of Evolution conveys the excitement of this fundamental discovery and gives an insight into the way scientific enquiry and debate continue to shape our world. Murder by Injection-Eustace Clarence Mullins 2016-04-21 The present work, the result of some forty years of investigative research, is a logical progression from my previous books: the expose of the international control of monetary issue and banking practices in the United States; a later work revealing the secret network of organizations through which these alien forces wield political power-the secret committees, foundations, and political parties through which their hidden plans are implemented; and now; to the most vital issue of all, the manner in which these depredations affect the daily lives and health of American citizens. Despite the great power of the hidden rulers, I found that only one group has the power to issue life or death sentences to any American-our nation's physicians. I discovered that these physicians, despite their great power, were themselves subjected to very strict controls over every aspect of their professional lives. These controls, surprisingly enough, were not wielded by any state or federal agency, although almost every other aspect of American life is now under the absolute control of the bureaucracy. The physicians have their own autocracy, a private trade association, the American Medical Association. This group, which is headquartered in Chicago, Illinois, had gradually built up its power until it assumed total control over medical schools and the accreditation of physicians. The trail of these manipulators led me straight to the same lairs of the international conspirators whom I had exposed in previous books. I knew that they had already looted America, reduced its military power to a dangerously low level, and imposed bureaucratic controls on every American. I now discovered that their conspiracies also directly affected the health of every American. This conspiracy has resulted in a documented decline in the health of our citizens. We now rank far down the list of civilized nations in infant mortality and other significant medical statistics. I was able to document the shocking record of these cold-blooded tycoons who not only plan and carry out famines, economic depressions, revolutions and wars, but who also find their greatest profits in their manipulations of our medical care. The cynicism and malice of these conspirators is something beyond the imagination of most Americans. They deliberately mulct our people of millions of dollars each year through "charitable" organizations and then use these same organizations as key groups to bolster their Medical Monopoly. Fear and intimidation are the basic techniques by which the conspirators maintain their control over all aspects of our health care, as they ruthlessly crush any competitor who challenges their profits. As in other aspects of their "behavioural control" over the American people, their most constantly used weapon against us is their employment of federal agents and federal agencies to carry out their intrigues. The proof of this operation may be the most disturbing revelation of my work.
