Howling at the Moon-Walter Yetnikoff 2004-03-02 Show biz memoir at its name-dropping, bridge-burning, profane best: the music industry's most outspoken, outrageous, and phenomenally successful executive delivers a rollicking memoir of pop music's heyday. During the 1970s and '80s the music business was dominated by a few major labels and artists such as Michael Jackson, Bruce Springsteen, the Rolling Stones, Bob Dylan, Billy Joel, Paul Simon, Barbra Streisand and James Taylor. They were all under contract to CBS Records, making it the most successful label of the era. And, as the company's president, Walter Yetnikoff was the ruling monarch. He was also the most flamboyant, volatile and controversial personality to emerge from an industry and era defined by sex, drugs and debauchery. Having risen from working-class Brooklyn and the legal department of CBS, Yetnikoff, who freely admitted to being tone deaf, was an unlikely label head. But he had an uncanny knack for fostering talent and intimidating rivals with his appalling behavior—usually fueled by an explosive combination of cocaine and alcohol. His tantrums, appetite for mind-altering substances and sexual exploits were legendary. In Japan to meet the Sony executives who acquired CBS during his tenure, Walter was assigned a minder who confined him to a hotel room. True to form, Walter raided the minibar, got blasted and, seeing no other means of escape, opened a hotel window and vented his rage by literally howling at the moon. In Howling at the Moon, Yetnikoff traces his journey as he climbed the corporate mountain, danced on its summit and crashed and burned. We see how Walter became the father-confessor to Michael Jackson as the King of Pop reconstructed his face and agonized over his image while constructing Thriller (and how, after it won seven Grammys, Jackson made the preposterous demand that Walter take producer Quincy Jones's name off the album); we see Walter, in maniacal pursuit of a contract, chase the Rolling Stones around the world and nearly come to blows with Mick Jagger in the process; we get the tale of how Walter and Marvin Gaye—fresh from the success of "Sexual Healing"—share the same woman, and of how Walter bonds with Bob Dylan because of their mutual Jewishness. At the same time we witness Yetnikoff's clashes with Barry Diller, David Geffen, Tommy Mottola, Allen Grubman and a host of others. Seemingly, the more Yetnikoff feeds his cravings for power, sex, liquor and cocaine, the more profitable CBS becomes—from \$485 million to well over \$2 billion—until he finally succumbs, ironically, not to substances, but to a corporate coup. Reflecting on the sinister cycle that left his career in tatters and CBS flush with cash, Yetnikoff emerges with a hunger for redemption and a new reverence for his working-class Brooklyn roots. Ruthlessly candid, uproariously hilarious and compulsively readable, Howling at the Moon is a blistering You'll Never Eat Lunch in this Town Again of the music industry.

The Essentials of Technical Communication-Elizabeth Tebeaux 2020-11 "This is an English textbook for students taking courses in technical communication"--
Math Workbook for ISEE, SSAT & HSPT Prep-Allen Koh 2011-07-01 Cardinal Education is an educational consulting and tutoring company based in Palo Alto, CA. Guided by a philosophy of fulfilling students' academic potential in a way that boosts skills and confidence for life, we work to maximize successful middle school, high school, and college admissions outcomes. While some of our methods defy "conventional wisdom," we have a proven track record with a broad range of students: the Ivy League bound to those wishing to avoid community college, the self-motivated to the intransigently jaded, and the profoundly gifted to learning disabled. We have a passion for expanding students' dreams and helping them attain their goals. Cardinal Education believes in the social value of a strong public education system and sponsors pro bono programs to bring private sector expertise to bear. However, government fiscal policies are shortchanging public schools of opportunities: activities, sports, variety of classes, advanced classes, student: teacher ratios, and counseling departments. The "private school imperative" means that despite economic trends, admission to private school is becoming so competitive that it necessitates standardized testing excellence. The philosophy of this math workbook is rigor and drill. Because this is the first test students take that actively tries to trick students at every turn, students who sit for these standardized exams need reflexive familiarity with computation (math facts), problem types, and strategy. The entrance exams are the first standardized tests for which budgeting time is a significant issue. Students need to spend the majority of time on analysis to avoid getting tricked rather than computation. By building skills, speed, and confidence, we hope to eliminate anxiety and give students a solid foundation on which to build excellent scores. This book is intended as a supplement for our highly trained staff, so it does not include strategies. However, motivated students can use it successfully with occasional help from a teacher or parent. Each chapter is comprised of units, with each unit comprised of 4 problem sets of difficulty, increasing in a logically progressive manner. Students should do as many of the 4 problem sets for each unit as it takes to achieve a 90% accuracy rate. Students taking lower level exams should complete problems 1-10 in each set. Students competing for high school admissions should complete each problem set in its entirety. Questions or feedback: Info@CardinalEducation.com

Oxidative Stress and Chronic Degenerative Diseases-Jose Antonio Morales-Gonzalez 2013-05-22 This work responds to the need to find, in a sole document, the affect of oxidative stress at different levels, as well as treatment with antioxidants to revert and diminish the damage. Oxidative Stress and Chronic Degenerative Diseases - a Role for Antioxidants is written for health professionals by researchers at diverse educative institutions (Mexico, Brazil, USA, Spain, Australia, and Slovenia). I would like to underscore that of the 19 chapters, 14 are by Mexican researchers, which demonstrates the commitment of Mexican institutions to academic life and to the prevention and treatment of chronic degenerative diseases.

Why Brilliant People Believe Nonsense-J. Steve Miller 2015-08-01 The passing of time reveals much expert opinion to be nonsense. How can we evaluate expert opinion and learn to think for ourselves? "In the midst of an information explosion, we face a wisdom deficit," notes author J. Steve Miller. This book, in a remarkably accessible and entertaining way, equips readers to think more clearly, innovate more creatively, see through the deceptions of clever advertisers and salesmen, simplify complex and convoluted arguments, manage life's decisions with more confidence, and express convictions more powerfully. This book is designed to be read by all individuals interested in learning critical and creative thinking skills. It can also be used as a text targeting high school seniors and

college freshmen. An accompanying website offers free lesson plans and teaching tips.

Grow Your Business with Desktop Marketing-Steve Morgenstern 1996 Outlines strategies and techniques for developing an effective marketing plan using a desktop computer.

Technical Communication in the Twenty-first Century-Sidney I. Dobrin 2009-01 Technical Communication in the Twenty-First Century (TTC) prepares readers to be successful writers and readers of technical communication, regardless of their career path. Featuring a wealth of examples and cases, it emphasizes problem-solving, collaboration, visual rhetoric and usability. Its approach analyzes why something worked or did not work, as well as how to produce the appropriate communication. Now available with the MyTechCommLab online learning tool, this edition features more focus on transnational communication, forty-five new case studies, and new information on the relationship between technology and communication.

Ethics in Technical Communication-Paul M. Dombrowski 2000 The purpose of this textbook is to get you thinking and talking and doing ethics as a part of your professional life. It aims to stimulate class discussion and reflection about and to increase your awareness of the ethical dimension of technical communication. You will be introduced to several different ethical theories or perspectives. For the most part, no one particular ethical theory will be urged over any others, nor any one particular direction of judgment over others, though we will see that most ethical theories are in general agreement in their application to most cases.

Tapping the Healer Within-Roger Callahan 2001-01-01 The first book on "TFT" by its founder Thought Field Therapy (TFT) has already changed the way thousands of people have overcome emotional problems. Now, in Tapping the Healer Within, the founder of TFT shows readers how to harness its healing power on their own, to overcome phobias, anxieties, addictions, and other common psychological problems. The process combines principles of Western and Eastern healing methods, using energy points in the body to release emotional distress.

Soil Mechanics Lab Manual, 2nd Edition-Michael E. Kalinski 2011-01-14 Soil Mechanics Lab Manual prepares readers to enter the field with a collection of the most common soil mechanics tests. The procedures for all of these tests are written in accordance with applicable American Society for Testing and Materials (ASTM) standards. Video demonstrations for each experiment available on the website prepare readers before going into the lab, so they know what to expect and will be able to complete the tests with more confidence and efficiency. Laboratory exercises and data sheets for each test are included in the Soil Mechanics Lab Manual.

The House on the Gulf-Margaret Peterson Haddix 2011-01-04 [If only] Bran would stop acting weird....Probably he had a perfectly reasonable explanation for everything. I just couldn't imagine what it would be. When Britt's older brother, Bran, lands a summer job house-sitting for the Marquises, an elderly couple, it seems like a great opportunity. Britt and Bran have moved to Florida so their mother can finish college, and the house-sitting income will allow their mom to quit her job and take classes full-time. Having never lived in a real house before, Britt is thrilled. There's only one problem: Britt starts to suspect her family isn't supposed to be there. She's been noticing that Bran is acting weird and defensive -- he hides the Marquises' mail, won't let anyone touch the thermostat, and discourages Britt from meeting any of the neighbors. Determined to get to the bottom of things, Britt starts investigating and makes a startling discovery -- the Marquises aren't who Bran has led her and their mom to believe. So whose house are they staying in, and why has Bran brought them there? With unexpected twists and turns, award winner Margaret Peterson Haddix has again crafted a thriller that will grip readers until its stunning conclusion.

Home Theater Design- New in Paperback! Technical tips for how to achieve a "movie theater" experience in your own home.Home Theater Design is the comprehensive guide to planning all types of entertainment spaces in the home. Author Krissy Rushing reveals how to choose and place acoustic and audio/visual systems to the best advantage; how to plan a home theater or music room; and how to display, store, and care for all types of media formats. This book looks at the aesthetics, too with a "whole interior" approach to home entertaining. The book offers information on a variety of design considerations - furnishings, comfort, setting up entertainment spaces, hosting get-togethers, accommodating guests - while factoring in style, functionality, new technology, acoustic planning, soundproofing, lighting, and environmental and personal health considerations.

healthy eating.

Heat Convection-Latif M. Jiji 2009-11-09 Jiji's extensive understanding of how students think and learn, what they find difficult, and which elements need to be stressed is integrated in this work. He employs an organization and methodology derived from his experience and presents the material in an easy to follow form, using graphical illustrations and examples for maximum effect. The second, enlarged edition provides the reader with a thorough introduction to external turbulent flows, written by Glen Thorncraft. Additional highlights of note: Illustrative examples are used to demonstrate the application of principles and the construction of solutions, solutions follow an orderly approach used in all examples, systematic problem-solving methodology emphasizes logical thinking, assumptions, approximations, application of principles and verification of results. Chapter summaries help students review the material. Guidelines for solving each problem can be selectively given to students.

Seawifs Technical Report Series. Volume 38; Seawifs Calibration and Validation Quality Control Procedures-National Aeronautics and Space Adm Nasa 2018-11-10 This document provides five brief reports that address several quality control procedures under the auspices of the Calibration and Validation Element (CVE) within the Sea-viewing Wide Field-of-view Sensor (SeaWiFS) Project. Chapter 1 describes analyses of the 32 sensor engineering telemetry streams. Anomalies in any of the values may impact sensor performance in direct or indirect ways. The analyses are primarily examinations of parameter time series combined with statistical methods such as auto- and cross-correlation functions. Chapter 2 describes how the various onboard (solar and lunar) and vicarious (in situ) calibration data will be analyzed to quantify sensor degradation, if present. The analyses also include methods for detecting the influence of charged particles on sensor performance such as might be expected in the South Atlantic Anomaly (SAA). Chapter 3 discusses the quality control of the ancillary environmental data that are routinely received from other agencies or projects which are used in the atmospheric correction algorithm (total ozone, surface wind velocity, and surface pressure; surface relative humidity is also obtained, but is not used in the initial operational algorithm). Chapter 4 explains the procedures for screening level-1, level-2, and level-3 products. These quality control operations incorporate both automated and interactive procedures which check for file format errors (all levels), navigation offsets (level-1), mask and flag performance (level-2), and product anomalies (all levels). Finally, Chapter 5 discusses the match-up data set development for comparing SeaWiFS level-2 derived products with in situ observations, as well as the subsequent outlier analyses that will be used for evaluating error sources. Everyday Pictures-Bing Wright 2009 American photographer Bing Wright (born 1958) marries modernist and conceptual leanings, creating highly formal work that explores the many roles of the photograph--as window or magnifying glass, marker of time or space for illusion. Known for his wide-ranging philosophical investigations and the stripped-down purity of his imagery, Wright can be simultaneously figurative and gorgeously abstract in his work, often calling on the gray light and rainy climate of his native Pacific Northwest. For example, in the Wet Windows series, part of his first body of work begun in 1988, random patterns of raindrops appear to pockmark the photographic surfaces. Deeply engaged with the technological and aesthetic history of the medium, Wright frequently references the work of other photographers from Edward Steichen's roses to Man Ray's tears. Bing Wright: Everyday Pictures surveys the artist's work from 1989 to 2006 and includes a conversation between the artist and renowned art historian Hal Foster.

Eskimo Drawings-Suzi Jones 2003 Originally published in conjunction with a 2003 exhibition organized by the Anchorage Museum of History and Art and co-curated by Suzi Jones and Walter Van Horn, Eskimo Drawings marks the first time that Alaska Eskimo artwork has been the exclusive subject of a major exhibition and publication. Accompanied by full-color illustrations, as well as black-and-white photographic reproductions, Eskimo Drawings features only a few works that have ever been exhibited previously while showcasing the work of previously undiscovered Eskimo artists. Covering topics as diverse as artistic considerations in the Eskimo graphic arts and an analysis of the work of Happy Jack and Guy Kakarook, this remarkable volume includes contributions by Susan W. Fair, Russell Hartman, Herbert O. Anungazuk, Steve Henrikson, Molly Lee, Mary Jane Anuqsraq Melovidov, Patrick Minock, David Mollett, Dorothy Jean Ray, Susie Silook, Birgitte Sonne, and David P. Sweeney. Not to be missed by any art historian with an interest in Alaska Eskimo and Alaska Native art, this fascinating and fully illustrated collection is an unsurpassed survey of the field.
