Construction Project Management Handbook- 2009  
Demobilization Planning and Operation in the Quartermaster Corps-United States. Army. Quartermaster Corps 1948 This monograph is based primarily on data maintained in the main files of the Office of the Quartermaster General by the Mail and Records Branch. Demobilization activities cut across all functions of the Quartermaster Corps, and these files were supplemented by data obtained in particular branches, such as the Requirements Branch of the Military Planning Division, the Contract Termination Branch of the Procurement Division, and the Stock Control Branch of the Storage and Distribution Division. To correlate activities at the Office of the Quartermaster General and at the depots use was made of several monographs on depot activities prepared by historians at these installations. The depot record was further supplemented by interviews with key personnel, both military and civilian, at the major procuring depots.  
Handbook of Construction Management-Abdul Razzak Rumane 2016-08-05 The book is developed to provide significant information and guidelines to construction and project management professionals (owners, designers, consultants, construction managers, project managers, supervisors, contractors, builders, developers, and many others from the construction-related industry) involved in construction projects (mainly civil construction projects, commercial-A/E projects) and construction-related industries. It covers the importance of construction management principles, procedures, concepts, methods, and tools, and their applications to various activities/components/subsystems of different phases of the life cycle of a construction project. These applications will improve the construction process in order to conveniently manage the project and make the project most qualitative, competitive, and economical. It also discuss the interaction and/or combination among some of the activities/elements of management functions, management processes, and their effective implementation and applications that are essential throughout the life cycle of project to conveniently manage the project. This handbook will: Focus on the construction management system to manage construction projects Include a number of figures and tables which will enhance reader comprehension Provide all related topics/areas of construction management Be of interest to all those involved in construction management and project management Provide information about Building Information Modeling (BIM), and ISO Certification in Construction Industry Offer a chapter on Lean construction The construction project life cycle phases and its activities/elements/subsystems are comprehensively developed and take into consideration Henri Fayol's Management Function concept which was subsequently modified by Koontz and O'Donnel and Management Processes Knowledge Areas described in PMBOK® published by Project Management Institute (PMI). The information available in the book will also prove valuable for academics/instructors to provide construction management/project management students with in-depth knowledge and guidelines followed in the construction projects and familiarize them with construction management practices.

Military personnel DOD needs to address longterm Reserve force availability and related mobilization and demobilization issues : report to the Subcommittee on Personnel, Committee on Armed Services, U.S. Senate.-  
Military Personnel-Derek B. Stewart 2004-12 Over 335,000 reserve members have been involuntarily called to active duty since 9/11. This report reviews DoD's mobilization & demobilization (M&D) process. Examines the extent to which: (1) DoD's implementation of a key mobilization authority & personnel policies affect reserve force availability, (2) the Army was able to execute its M&D plans efficiently, & (3) DoD can manage the health of its mobilized reserve forces. DoD should develop a strategic framework with personnel policies linked to human capital goals, update planning assumptions, determine the most efficient mobilization support options, update health guidance, set a timeline for submitting health assessments electronically, & improve medical oversight. Building American Submarines, 1914-1940-Gary E. Weir 2000-04-01 In this volume, Gary E. Weir assesses the Navy's efforts between 1914 and 1940 to develop effective submarines. In particular, the author describes the work of the Navy and private industry that allowed the relatively primitive submersible of the First World War period to be replaced by the fleet submarine that fought in the Second World War.Building American Submarines argues that there was a fundamental shift in the relationship between the Navy and its submarine suppliers during this period. After being completely dependent upon private industry in 1914, the Navy - not industry - controlled the design and construction process by the eve of the Second World War.. As a result, the Navy was able to acquire high-quality submarines to fulfill the nation's strategic requirements. When we entered the Second World War, these new submarines were ready to undertake prolonged and effective antishipping operations in distant waters. That capability was of enormous importance in the ensuing triumph of American sea power over Imperial Japan.In tracing these developments, the author provides insights into the goals of the naval submarine submarine leaders, the evolution of the American submarine industry, the influence of German underseas technology, and strategic requirements foreseen by naval planners. The Navy's historians hope that this case study of the problems and successes involved in a major weapons acquisition program will be of particular interest to naval personnel involved in that process today, as well as to representatives of the industrial firms that supply the needs of the modern Navy.

Annual Review of United Nations Affairs-Joachim Muller 2010-03 Since the publication of its first edition in 1950, the Annual Review of United Nations Affairs has stood as the authoritative resource for scholars, students, and practitioners researching the latest developments of that august body. From the insightful introduction, prepared each year by a distinguished expert on UN affairs, to the full-text presentation of reports and resolutions and the helpful subject index, ARUNA provides a practical tour of each year's U.N. actions and debates. Theexpert selection of documents by Joachim Muller and Karl Sauvant and the topic-based organization of those documents make any researcher's task much easier than the vast searching, sorting, and pruning required by the U.N.'s website. The series' topic-based organization of the materials and subject index lend invaluable guidance to all researchers. ARUNA presents a comprehensive documentation of the work of the UN on an annual basis, starting in September of each year with the beginning of the regular sessions of the General Assembly. Coverage of the UN's key organs is provided, including the General Assembly, the Security Council, the Economic and Social Council (ECOSOC), the International Court of Justice, and the UN Secretariat. In addition, selected reports of intergovernmental bodies and expert groups are included. Solely official UN documentation is used. ARUNA occupies a special place in the publications on the work of the UN - it allows readers to obtain an overview ofthe principal developments in its key organs. This makes it an important reference source for policy-makers and academic researchers. The highlight of this year's edition is the introductory essay written by the highly esteemed Jose Antonio Ocampo, who is Professor of Professional Practice in International and Public Affairs, Director of the Program in Economic and Political Development at the School of International and Public Affairs, and Fellow of the Committee on Global Thought, ColumbiaUniversity. Professor Ocampo previously held the positions of Under-Secretary-General of the United Nations for Economic and Social Affairs, Executive Secretary of the United Nations Economic Commission for Latin America and the Caribbean, and Minister of Finance of Colombia. In 2009, he was a member of the Commission of Experts of the President of the United Nations General Assembly on Reforms of the International Monetary and Financial System. Professor Ocampo is also the author of numerousbooks and articles on macroeconomics policy and theory, economic development, international trade, and economic history. His recent publications include Stability with Growth: Macroeconomics, Liberalization and Development, with Joseph E. Stiglitz, Shari Spiegel, Ricardo Ffrench-Davis and Deepak Nayyar (New York: Oxford University Press, 2006). Professor Ocampo, relying on his expertise as a policy economist and his own considerable experience working on economic issues at the United Nations, has written an incisive introductory essay focusing on the United Nations and the global economic crisis. Professor Ocampo's essay examines the history of the economic policy recommendations of UN institutions and concludes that they have often been more far-sighted and accurate than those of the Bretton Woods Institutions, including the World Bank and the International Monetary Fund. He applies this analysis in particular to the recent global financial crisis, and shows how the Monterrey Consensus of 2002, which once again made the UN a forum for global economic issues, gave serious consideration to the concerns of developing countries and set many goals that might have helped to stave off the global financial crisis if they had been more actively pursued. Professor Ocampo also examines the UN's role in the wake of the global financial meltdown, particularly with regard to the Doha follow-up Conference and the Commission of Experts on Reforms of the International Monetary and Financial System, convened by the General Assembly and led by Joseph Stiglitz. In spite of some resistance to these initiatives from the United States and other developed countries, Professor Ocampo advocates in this essay for a more influential role for the UN's institutions in global financial reform, especially in light of their superior track record in anticipating economic problems resulting from "the inherent tendency of financial markets to experience boom-bust cycles." The 2008-2009 volumes of ARUNA therefore also devote considerable attention to the financial crisis as well as other international crises. Among the documents in the 2008-2009 volumes are the complete General Assembly resolutions, as well as the Report and Resolutions of the Security Council and the Economic and Social Council (ECOSOC). Annual Reports of note include reports of the United Nations Children's Fund (UNICEF), the UN Development Programme and UN Population Fund, the UN High Commissioner for HumanRights, the UN High Commissioner for Refugees, the UN Relief and Works Agency for Palestine Refugee in the Near East, and the World Food Programme. Mr. Muller and Dr. Sauvant have also selected progress reports on key peacekeeping, peace-building, and political missions, including those for Afghanistan, the Democratic Republic of the Congo, Haiti, Iraq, Kosovo, the Middle East, Somalia, Sudan, and West Africa. Each annual edition of ARUNA is introduced by a Guest Author, a distinguished expert on UN affairs, who highlights the outstanding themes of the year in review. Together with an overview provided by the editors, this introduction is intended to facilitate access to the material and, above all, to make it easier for users of ARUNA to "see the forest for the trees". As has been mentioned above, ARUNA is fortunate this year to have Jose Antonio Ocampo as the author of its introduction, but the roster of distinguished experts who have contributed this introduction in the past is also worthy of mention: Jeffrey D. Sachs: ARUNA 2007/2008 edition Professor Jeffrey D. Sachs is Director of the Earth Institute at Columbia University and Special Advisor to the Secretary-General of the UN on the Millennium Development Goals. Professor Sachs's introduction to ARUNA 2007/2008 was titled "Towards a New Global Protocol on Climate Change", in which he argued that solving the climate change problem will demand four steps: scientific consensus, public awareness, the development of alternative technologies, and a global framework for action. He dealt, in particular, with the science underpinning the negotiations for a new global protocol on climate change, as a successor to the Kyoto Protocol. Professor Sachs argued that climate change crises can only be solved through the goals, leadership, and treaty mechanisms of the UN. Edward C. Luck: ARUNA 2006/2007 edition Professor Edward C. Luck is UN Special Advisor on the Responsibility to Protect and Vice President and Director of Studies at the International Peace Academy. From 1984 to 1994, he served as President and Chief Executive Officer of the UN Association of the USA (UNA-USA). Professor Luck's introduction to ARUNA 2006/2007 covered "The responsible sovereign and the responsibility to protect", in which he addressed the scope and content of what was agreed at the 2005 World Summit, the implications of the responsibility to protect (RtoP) for notions of state sovereignty, and some of the conceptual, architectural, and policy challenges then facing UN Secretary-General Ban Ki-moon's commitment to "operationalizing" the responsibility to protect and translating it "from words to deeds". Louise Frechette: ARUNA 2005/2006 edition Ms Louise Frechette is Distinguished Fellow at the Centre for International Governance Innovation, Waterloo, Ontario. Until March 2006, she was the first Deputy Secretary-General of the UN; before that, she was Permanent Representative of Canada to the UN. Ms Frechette's introduction to ARUNA 2005/2006 covered "United Nations reform: an unfinished story". As the first Deputy Secretary-General of the UN, Ms Frechette was uniquely positioned to undertake a personal assessment of what has changed and what has not changed in the past decade at the UN and why. She examined if the UN is functioning better than it was 15 years ago, why reform is so difficult to achieve and what the future holds for the institutions. Rubens Ricupero: ARUNA 2004/2005 edition Mr Rubens Ricupero is Dean of the Fundacno Armando Alvares Penteado (FAAP), Sao Paulo and was formerly Secretary-General of UN Conference on Trade and Development (UNCTAD) and Minister of Finance of Brazil. Mr Ricupero's introduction to ARUNA 2004/2005 covered "The difficulty of building consensus in an age of extremes" and examined the mysteries of the negotiating process leading to the outcome of the 2005 World Summit. Rather than a "Grand Bargain" of a comprehensive UN reformin the areas of development, security and human rights, it is argued that the Summit ended more on a note of lamentation and regret over a missed opportunity. Mr Ricupero concludes that contrary to the daring proclamation at the outset by the Secretary-General, the conditions indispensable to succeed were not in place. Indeed, it was hard to imagine that an ambitious and balanced reform package for the UN could have had any real chance of succeeding.
