Dieter Rams: As Little Design as Possible-Sophie Lovell 2011-06-22 " "Indifference towards people and the reality in which they live is actually the one and only cardinal sin in design" - Dieter Rams. Dieter Rams' life and work are indelibly linked to his thoughts about how people live, and how they can live better. Products he designed in the 1960s are still being produced and sold today - only one demonstration of the strength of his work. This comprehensive monograph covers both Rams' life and his work, as well as his ideas on good design, which continue to inspire designers and consumers today. A personal foreword by Jonathan Ive evokes the influence that Rams has had on his own work and, by extention, the objects with

which so many of us share our everyday lives. An introduction and an essay by Klaus Kemp tell the story of Rams' early life, his training as an architect, and the intellectual context in which his ideas were developed. The next four chapters examine Rams' work and his life - which are more or less synonymous - in depth. This includes his role at Braun as well as the work he did for the furniture company Vitsoe. Each chapter includes sketches, prototypes, finished products and the marketing for those products, giving a complete picture of Rams' work and its context. Two other chapters in this section present Rams' own house, the only work of architecture that he completed, and examine the products he designed at the level of detail, a crucial aspect to his work. A further chapter examines Rams' "ten commandments" of good design and his credo, "less but better", in the context of his role as head of design at Braun, and a final chapter explores his legacy in the work of contemporary designers including Naoto Fukasawa, Jonathan Ive, Sam Hecht, and Konstantin Grcic. This beautifully designed book includes a wide variety of visual material, including sketches and technical drawings, photographs of Rams' work as well as his life, archival material from both Braun and Vitsoe, Ingeborg Rams' subtle photographs and Vitsoe's playful graphic design and advertising. This book will appeal not only to fans of Dieter Rams' work, but to everyone drawn to the message behind his "ten commandments" of good design - which are really ideas about how we can all live better and more sustainable lives. "

Limited Edition-Sophie Lovell 2009-01-01 Limited Edition is the new buzzword in furniture design. The demand for unique pieces is steadily increasing. With prototypes, one-offs and limited product lines, designers are celebrating a cult of individuality for all price classes. Furniture prototypes have always been an element of the industrial design process, but now they are being brought from the workshops and presented to the public as embodiments of one of the most exciting creative fields of our age. In the global village with its standardized commodities, exclusive one-offs with an artisanal flavor are turning into coveted objects. Limited furniture series satisfy the collector's thirst for objects that dissolve the boundary between art and design. Limited Edition pursues this new phenomenon and uncovers its background in

meticulous investigative essays based on the author's ongoing interchange with key designers, gallery owners, auctioneers and manufacturers. With a rich selection of magnificent images and an attractive layout, it presents the best and most breathtaking pieces by the leading designers.

Ronan and Erwan Bouroullec-Ronan Bouroullec 2012-05-01 This book will look at the entire career of the French brothers Ronan and Erwan Bouroullec, widely regarded as two of the most exciting young European designers to have emerged in the last twenty years. The book will feature all of their work to date, a collection which includes commissions for Vitra, Alessi, and Cappellini amongst others and will open with an introduction by Anniina Koivu, editor of Abitare magazine. There will be ten themed chapters, each exploring a different aspect of the Bouroullecs' career, an illustrated catalogue detailing all their designs and interviews with key figures and collaborators discussing their work.

Less and More-Dieter Rams 2011 This book contains images of hundreds of designer Dieter Rams's products as well as his sketches and models from Braun stereo systems and electric shavers to the chairs and shelving systems that he created for Vitsoe and his own company sdr+. In addition to the rich visual presentation of his designs, this book contains new texts by international design experts that explain how the work was created, describe its timeless quality, and put it into current context.

Otl Aicher-Markus Rathgeb 2015-05-25 German designer and educator, Otl Aicher, was a pioneer of twentieth century graphic design, renowned for creating visual identities for numerous corporations (including Lufthansa, FSB, and ERCO) and his work on symbol systems. Aicher, inspired by his design system for the Munich Olympics in 1972, worked for over twenty years to create a completely visual language and is often referred to as the "father of modern pictograms." Born after World War I and raised during the takeover of the Nazi party in Germany, Aicher often used design as a method of political resistance and tool of social equality. He is known as much for his design philosophies as his completed work. He educated a generation future designers at the Hochschule für Gestaltung (HfG) in Ulm, Germany, the school he helped found in the 1950s and 60s. Late in life, Aicher collaborated repeatedly

with British architect Norman Foster on designs for public buildings, integrating his interest in design with public planning. Aicher died in a car crash in 1991.

Less but Better-Dieter Rams 2014 The new edition of the benchmark work originally published by the Dieter and Ingeborg Rams Foundation and Jo Klatt. Less but Better does not set out to be a complete documentation of Dieter Rams's body of work, nor does it claim to tell the full story of the company Braun. Rather, the book explores the ideas, criteria, and methods behind Rams's creations and reveals how a shifting culture of product manufacturing gave rise to universal design benchmarks.

The Kinfolk Garden-John Burns 2020-10-27 “In this gorgeous, aspirational work, Burns, editor-in-chief of Kinfolk magazine, collects ‘stories about nature as nourishment’ along with photographs from homes across the globe to inspire people to bring more nature into their own abodes. . . . Expertly evoking a mood of understated luxury, this stunning spread will have design junkies drooling.” —Publishers Weekly
A gardener with a secret oasis on a Parisian rooftop. An artist making faux flowers to brighten Manhattan apartments. A family of ranchers rewilding the American outback. Anchored around the idea of nature as nourishment, The Kinfolk Garden explores lush gardens and plantfilled homes around the world and introduces the inspiring people who coax them into bloom. Through visits to friends old and new, the Kinfolk team learns the secrets to a good garden, and what good a garden can do for our self-care, creativity and communities. Though many of the people we meet along the way champion the idea of following natural instincts rather than a set of prescriptive garden rules, there are practical tips throughout the book that offer advice on everything from growing your own produce to foraging for artful arrangements to simply keeping your houseplants alive a little longer than usual. The Kinfolk Garden is an invitation to engage with nature—to care for it, create with its beauty and cultivate new relationships around it—and offers inspiration and guidance to anyone looking to bring a little more greenery into their life.

Design Discourse-Victor Margolin 1989-09-15 The editor has gathered together a body of writing in the emerging field of design studies. The contributors argue in different ways for a rethinking of design in the light of its cultural significance and its powerful position in today's society. The collection begins with a discussion of the various expressions of opposition to the modernists' purist approach toward design. Drawing on postmodernist theory and other critical strategies, the writers examine the relations among design, technology, and social organization to show how design has become a complex and

multidisciplinary activity. The second section provides examples of new methods of interpreting and analysing design, ranging from rhetoric and semiotics to phenomenology, demonstrating how meaning is created visually. A final section related to design history shifts its emphasis to ideological frameworks such as capitalism and patriarchy that establish boundaries for the production and use of design.

Legacy-Lukas Feireiss 2018-09-13 Generational dialogues between 40 world-renowned creatives exploring how the creative legacy of previous generations is being reinterpreted over time. Description What is this phenomenon we call 'legacy'? This intangible inheritance that we eventually leave for our posterity? Is it the creative and intellectual heritage that one generation passes on to the next? Conceived by Lukas Feireiss, the book at hand tries to probe this open question by engaging in critical dialogue different generations of creatives, connectors and thinkers alike. In some cases, between inherent legacy of parent and child, in many cases between mentor and students, or simply between friends. The more than 40 illustrious contributors to this dialogue derive from an array of fields of knowledge and experience. Their stories often provide very personal insights into their work and life. They also reveal a broader perspective on the overall realms of art, design, architecture, music, literature, photography and curation in the 20th and 21st century. With contributions by Olafur Eliasson and Einar Thorsteinn, Lukas Feireiss and Ai Weiwei, Charlie and Rem Koolhaas, Francesca Gavin and Kerry James Marshall, Sophie Lovell and Dieter Rams, Hans-Ulrich Obrist and Yona Friedman, Shumon Basar and Ken Adam, Carson Chan and Phyllis Lambert, Rachel and Daniel Libeskind, Andres Ramirez and Denise Scott Brown, Aric Chen and Arata Isozaki, Ahmir Questlove Thompson and George Clinton and many more.

Mickey Mouse and Spongebob Squarepants with cauliflower ears and X'ed-out eyes, KAWS employs a sophisticated dark humor throughout his work, exploring the relationship between art and consumerism. This publication documents the artist's first exhibit in the Middle East, with more than 40 key pieces in sculpture and painting from the last two decades. The exhibit in Doha, Qatar, and its accompanying catalog also feature a number of KAWS' commercial collaborations alongside his 5-meter-tall sculpture Companion (Passing Through) and his inflatable 40-meter-tall piece Holiday. Bound in cloth, this volume is a gorgeous collection of KAWS' most exciting work. Brian Donnelly (born 1974), known professionally by his graffiti tag KAWS, is the mastermind behind one of today's most recognizable artistic brands. A graffiti artist since adolescence, Donnelly received his BFA in illustration from the School of Visual Arts in 1996. He then worked as a background artist for animated TV programs before becoming an independent designer. He has worked with artists like Kanye West and collaborated with brands such as Supreme, Nike and Comme des Garçons. He is currently represented by Perrotin in New York.

A Slow Death-Maho Harada 2008 Japan's worst nuclear radiation accident took place at a uranium reprocessing facility in Tokaimura, northeast of Tokyo, on 30 September 1999. The direct cause of the accident was cited as the depositing of a uranyl nitrate solution--containing about 16.6 kg of uranium, which exceeded the critical mass--into a precipitation tank. Three workers were exposed to extreme doses of radiation. Hiroshi Ouchi, one of these workers, was transferred to the University of Tokyo Hospital Emergency Room, three days after the accident. Dr. Maekawa and his staff initially thought that Ouchi looked relatively well for a person exposed to such radiation levels. He could talk, and only his right hand was a little swollen with redness. However, his condition gradually weakened as the radioactivity broke down the chromosomes in his cells. The doctors were at a loss as to what to do. There were very few precedents and proven medical treatments for the victims of radiation poisoning. Less than 20 nuclear

Typographie-Emil Ruder 2001 ""Typographie" se prend comme un manuel d'enseignement, mais aussi, se lit comme l'œuvre d'un grand typographe. Celui d'Emil Ruder, né en 1914 à Zurich et mort à Bâle en 1970 et qui fut notamment fondateur associé de l' " International Center for Typographic Arts " (ICTA) de New-York. Avant même la nouvelle ère de la typographie ouverte par les formidables virtualités et virtuosités qu'offrent l'ordinateur, la question fondamentale transparaisait dans son ouvrage : quand le travail sur les caractères, les polices et la mise en page de texte devient un art où le texte lui-même importe moins que l'interprétation visuelle du texte?

The Taylorized Beauty of the Mechanical-Mauro F. Guillén 2020-11-10 The dream of scientific management was a rationalized machine world where life would approach the perfection of an assembly line. But since its early twentieth-century peak this dream has come to seem a dehumanizing nightmare. Henry Ford's assembly lines turned out a quarter of a million cars in 1914, but all of them were black. Forgotten has been the unparalleled new aesthetic beauty once seen in the ideas of Ford and scientific management pioneer Frederick Winslow Taylor. In The Taylorized Beauty of the Mechanical, Mauro Guillén recovers this history and retells the story of the emergence of modernist architecture as a

romance with the ideas of scientific management--one that permanently reshaped the profession of architecture. Modernist architecture's pioneers, Guillén shows, found in scientific management the promise of a new, functional, machine-like--and beautiful--architecture, and the prospect of a new role for the architect as technical professional and social reformer. Taylor and Ford had a signal influence on Bauhaus founder Walter Gropius and on Le Corbusier and his *Towards a New Architecture*, the most important manifesto of modernist architecture. Architects were so enamored with the ideas of scientific management that they adopted them even when there was no functional advantage to do so. Not a traditional architectural history but rather a sociological study of the profession of architecture during its early modernist period, *The Taylorized Beauty of the Mechanical* provides a new understanding of the degree to which modernist architecture emerged from a tradition of engineering and industrial management.

Symbol Sourcebook-Henry Dreyfuss 1984-05-15 "A ready reference aid and an inspiration to designers . All in all the best book now available on symbols." --Library Journal This unparalleled reference represents a major achievement in the field of graphic design. Famed industrial designer Henry Dreyfuss recognized the importance of symbols in communicating more quickly and effectively; for many years he and his staff collected and codified graphic symbols as they are used in all walks of life throughout the world. The result is this "dictionary" of universally used graphic symbols. Henry Dreyfuss designed this sourcebook to be as practical and easy to use as possible by arranging the symbol information within ingeniously devised sections: Basic Symbols represents a concise and highly selective grouping of symbols common to all disciplines (on-off, up-down, etc.). Disciplines provides symbols used in accommodations and travel, agriculture, architecture, business, communications, engineering, photography, sports, safety, traffic controls, and many other areas. Color lists the meanings of each of the colors in various worldwide applications and cultures. Graphic Form displays symbols from all disciplines grouped according to form (squares, circles, arrows, human figures, etc.) creating a unique way to identify a symbol out of context, as well as giving designers a frame of reference for developing new symbols. To make the sourcebook truly universal, the Table of Contents contains translations of each of the section titles and discipline areas into 17 languages in addition to English.

In the Spirit of Miami Beach-David Leddick 2015-07-22 What Venice was to the world during the Renaissance era, so Miami is to the world today. An active melting pot of cultures; where Art Deco contends with Spanish Baroque; where artists mingle with athletes, models, and socialites; where South Americans and Eastern Europeans sit together for espressos on Ocean Drive. This book explores Miami Beach style, from the mythical Lincoln Road to Art Basel Miami, one of the leading international art fairs. With an in-depth look at its historical past as well as its present-day glamour, In The Spirit of Miami Beach elegantly captures the city's vibrant personality and cultural jubilation. With an exuberant text by noted author, entertainer, and bon vivant David Leddick, this rich volume brings one of the world's hottest destinations to colorful life. The book concludes with a selective guide on the hotels, restaurants, bars, nightclubs, and spas to experience "stylish Miami".

Behind the Image-Federico Zeri 1990

Zdravím, světe-Alice Rawsthornová 2014-10-20 Design je jedním z nejmocnějších hybatelů našich životů. Když se užívá moudře, přináší člověku potěšení, možnost volby, sílu, důstojnost a mnoho dalšího. Ale když se jeho moc zneužije, výsledky mohou být matoucí, ponižující, příliš nákladné a někdy i nebezpečné. Nikdo z nás se účinkům designu neubrání. Je natolik všudypřítomný, že ovlivňuje naše pocity i jednání, často aniž bychom si to uvědomili. Kniha Zdravím, světe zkoumá vliv designu na náš život. Od strašidelného symbolu, jímž piráti v osmnáctém století nutili své oběti, aby se vzdaly, přes tažení jedné ženy za nejlepšími možnými protézami nohou až po vývoj míče, s nímž se hraje mistrovství světa ve fotbale, popisuje, jak v průběhu historie vojenští diktátoři, vědci, zemědělci, hackeri, aktivisté a profesionální designéři využívali komplexní a často těžko postižitelný proces designu k nejrůznějším účelům. V době, kdy stojíme před kolosálními změnami, probíhajícími s nebyvalou rychlostí a intenzitou a v neslýchaném rozsahu - od prohlubující se krize životního prostředí po obrovské pokroky ve vědě a technologii - vysvětluje kniha Zdravím, světe, jak nám design může pomoci se s nimi vyrovnat a využít je k našemu prospěchu.

Convertible City, Modes of Densification and Dissolving Boundaries-Armand Grüntuch 2006 The catalogue accompanying the German contribution at the 10th International Architecture Exhibition 2006 in Venice is published as an issue of archplus, the German magazine for architecture and urbanism. archplus 180 takes us into the heart of Germany's big cities, to places where the oldest traces of the past overlap with the newest thrusts into the future. Convertible City tells of stimulating transformations of existing buildings and urban situations and makes the city as lived in and felt a central issue. The selected projects exemplify various approaches to sustainable conversion, densification and transformation of architecture and the urban tissue for new urban worlds of living and working. These adaptations express the need for a reinterpretation of the quality of life today; they also represent a new sense of life and of relishing the city. These projects also give an insight into the great variety of creative transformation in Germany's urban space, and identify new opportunities for architecture and urbanism through flexible thinking and sustainable concepts.
