Social Media in Northern Chile-Nell Haynes 2016-06-06 Based on 15 months of ethnographic research in the city of Alto Hospicio in northern Chile, this book describes how the residents use social media, and the consequences of this use in their daily lives. Nell Haynes argues that social media is a place where Alto Hospicio's residents - or Hospiceños - express their feelings of marginalisation that result from living in city far from the national capital, and with a notoriously low quality of life compared to other urban areas in Chile. In actively distancing themselves from residents in cities such as Santiago, Hospiceños identify as marginalised citizens, and express a new kind of social norm. Yet Haynes finds that by contrasting their own lived experiences with those of people in metropolitan areas, Hospiceños are strengthening their own sense of community and the sense of normativity that shapes their daily lives. This exciting conclusion is illustrated by the range of social media posts about personal relationships, politics and national citizenship, particularly on Facebook

From the Ground Up-Colleen Whitley 2006-09-14 Despite mining's multidimensional role in the history of Utah since Euro-american settlement, there has never been a book that surveyed and contextualized its impact. From the Ground Up fill that gap with a collection of essays by leading Utah historians and geologists. Essays here address the geology of the state, the economic history of mining in Utah, and the lore of mines and miners. Additionally, the book reviews a handful of particularly significant mineral industries--saline, coal, uranium, and beryllium--and surveys important hard-rock mining regions of the state.

Fabrics of Freedom-C. k. Little 2007-01-01 "Fabrics of Freedom" is the saga of a family whose origins are in the Marches of Scotland. Tragedy, born of the desire to live free, gives birth to one desperate challenge after another as Robbie Liddle is swept toward his destiny on the battlegrounds of America's War for Independence. The deaths of his father and maternal grandfather conspire to send his mother, grandmother, and uncle on the perilous journey across the Atlantic in hopes of founding a tailor shop. This dream was inspired by the contents in his grandfather's chest of tools of the trade. Through shipwreck and financial hardship, they are led to the possibility of freedom in the Township of Leacock, County of Lancaster, Proprietorship of Pennsylvania. In spite of physical challenges, Robbie displays hereditary skills in the demands of tailoring. Bondage to his uncle, however, arouses in him the first yearning for freedom. With his best friend, Robbie flees northeastward to West Jersey. His wit and charm, inherited from the father he never knew, combined with the skills learned at his mother's knee, enable Robbie to find a new kind of freedom in the arms of the maiden who captured his heart--Miss Isabella Barclay. The Jerseys, however, are directly in the path of the coming conflict for a national freedom. Back and forth across what would become the third State among the United States, the forces of the British and the Continentals bloody the soils of this tiny colony. For the sake of freedom from such bondage to England, Robbie enlists in the New Jersey Militia. His military experiences in places like Brandywine and Monmouth and Valley Forge provide fodder for the tales he will spin throughout the rest of his long life.The tailor becomes the teller of tales. Heroes of such world-changing conflicts are not entirely the general officers, but the citizens who answer the call to risk their lives in the cause of freedom. Every chapter of Robbie Liddle's story is loosely connected with the various fabrics and materials with which he worked and in which he and his family dressed. Together they create that wonderful quilt of a life that rejoices in a liberty that is never free.

Transnational Organized Crime-Heinrich-Böll-Stiftung 2014-03-31 Transnational organized crime interferes with the everyday lives of more and more people - and represents a serious threat to democracy. By now, organized crime has become an inherent feature of economic globalization, and the fine line between the legal and illegal operation of business networks is blurred. Additionally, few experts could claim to have comprehensive knowledge and understanding of the laws and regulations governing the international flow of trade, and hence of the borderline towards criminal transactions. This book offers contributions from 12 countries around the world authored by 25 experts from a wide range of academic disciplines, representatives from civil society organizations and private industry, journalists, as well as activists. Recognizing the complexity of the issue, this publication provides a cross cultural and multi-disciplinary analysis of transnational organized crime including a historical approach from different regional and cultural contexts.

The Cultural Cold War-Frances Stonor Saunders 2013-11-05 During the Cold War, freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In The Cultural Cold War, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA's] activities between 1947 and 1967" by the New York Times, the book presents shocking evidence of the CIA's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is "a real contribution to popular understanding of the postwar period" (The Wall Street Journal), and its story of covert cultural efforts to win hearts and minds continues to be relevant today.

Articulating Design Thinking-Paul Rodgers 2012 Articulating Design Thinking contains a collection of thought-provoking papers from researchers based in eight different countries around the world Sweden, Italy, Denmark, Israel, UK, USA, Australia and Turkey that all deal with articulations of design thinking from a variety of disciplinary perspectives. These include: architecture, inclusive design, industrial design and interaction design. The phrase design thinking has become cemented in our everyday lexicon. Design thinking now routinely extends, so it is claimed, to contemporary forms of design, engineering, business and management practice. Often viewed as a particular style of creative thinking-in-action design thinking, we are told, can transform the way we develop products, services, processes and even strategy. A lot of work has been published in recent years on the subject of design thinking and how designers think and act. A frequently held consensus across this work is the notion that design thinking has a number of common features that are typified and manifested in strong commitment and personal motivation of the individual. It is widely suggested that designers possess the courage to take risks, they are prepared to fail and that they are motivated and committed to work hard. Designers, during their design thinking activities, regularly (re)define and/or frame problems; they adopt holistic thinking and they sketch, visualise and model possible ideas throughout their design processes. This book examines the many facets of design thinking across a range of different design domains through comparing and contrasting the processes, methods and approaches contained within this thought-provoking collection of papers.
