Feminism and the Politics of Travel After the Enlightenment-Yaël Rachel Schlick 2012-01 Taking the Enlightenment and the feminist tradition to which it gave rise as its historical and philosophical coordinates, *Feminism and the Politics of Travel After the Enlightenment* explores the coincidence of feminist vindications and travel in the late eighteenth and nineteenth centuries, the way travel's utopian dimension and feminism's utopian ideals have intermittently fed off each other in productive ways. Travel's gender politics is analyzed in the works of J.-J. Rousseau, Mary Wollstonecraft, Stéphanie-Félicité de Genlis, Germaine de Staël, Frances Burney, Flora Tristan, Suzanne Voilquin, Gustave Flaubert George Sand, Robyn Davidson, and Sara Wheeler.

R Graphics, Third Edition-Paul Murrell 2018-11-15 This third edition of Paul Murrell's classic book on using R for graphics represents a major update, with a complete overhaul in focus and scope. It focuses primarily on the two core graphics packages in R - graphics and grid - and has a new section on integrating graphics. This section includes three new chapters: importing external images in to R; integrating the graphics and grid systems; and advanced SVG graphics. The emphasis in this third edition is on having the ability to produce detailed and customised graphics in a wide variety of formats, on being able to share and reuse those graphics, and on being able to integrate graphics from multiple systems. This book is aimed at all levels of R users. For people who are new to R, this book provides an overview of the graphics facilities, which is useful for understanding what to expect from R's graphics functions and how to modify or add to the output they produce. For intermediate-level R users, this book provides all of the information necessary to perform sophisticated customizations of plots produced in R. For advanced R users, this book contains vital information for producing coherent, reusable, and extensible graphics functions.

Wood Harvesting with Hand Tools-International Labour Office 1987 In many developing countries wood harvesting with hand tools continues on a large scale. With the shift of emphasis towards trees grown by rural people rather than forestry enterprises, it will gain in importance in the years to come. This training manual provides basic information on efficient and safe equipment and methods for manual wood harvesting. At the same time, the information helps to ensure the fullest utilization of the available wood raw material. The manual updates previous ILO publications on the same subject, while taking into account progress and new developments observed in recent years. It is richly illustrated to make it easily accessible and will be ideal for forestry training and rural extension work. "This small book is a well-illustrated guide ..... simple to read, the diagrams are clear and are well described in the text ..... an excellent book dealing simply and in sufficient detail with a subject where current methods of operation often leave much to be desired."

African American Explorers & Adventurers-Joanne Randolph 2017-12-15 From the top of Everest to the deepest recesses of previously unexplored caves, from the heart of the sea to the far reaches of space, African American explorers and adventurers have helped chart the unknown, push the boundaries of the frontier, scale the heights, and shoot for the stars. With profiles of courageous and pioneering figures like Arctic explorer Matthew Alexander Henson, the Lewis and Clark corpsman York, and pilot Bessie Coleman, this inspiring collection celebrates the often unsung accomplishments of African American whalers, gold rush fortune-seekers, explorers, mountaineers, pilots, and other intrepid adventurers. They overcame injustice, prejudice, and inequality to triumph in expanding our knowledge of the world and our notions of what was possible within it.

Reuse Methodology Manual-Pierre Bricaud 2012-12-06 Silicon technology now allows us to build chips consisting of tens of millions of transistors. This technology not only promises new levels of system integration onto a single chip, but also presents significant challenges to the chip designer. As a result, many ASIC developers and silicon vendors are re-examining their design methodologies, searching for ways to make effective use of the huge numbers of gates now available. These designers see current design tools and methodologies as inadequate for developing million-gate ASICs from scratch. There is considerable pressure to keep design team size and design schedules constant even as design complexities grow. Tools are not providing the productivity gains required to keep pace with the increasing gate counts available from deep submicron technology. Design reuse - the use of pre-designed and pre-verified cores - is the most promising opportunity to bridge the gap between available gate-count and designer productivity. Reuse Methodology Manual for System-On-A-Chip Designs, Second Edition outlines an effective methodology for creating reusable designs for use in a System-on-a-Chip (SoC) design methodology. Silicon and tool technologies move so quickly that no single methodology can provide a permanent solution to this highly dynamic problem. Instead, this manual is an attempt to capture and incrementally improve on current best practices in the industry, and to give a coherent, integrated view of the design process. Reuse Methodology Manual for System-On-A-Chip Designs, Second Edition will be updated on a regular basis as a result of changing technology and improved insight into the problems of design reuse and its role in producing high-quality SoC designs.

Mapping the Women's Movement-Monica Threlfall 1996 Second-wave feminism is now in its third decade.

Mary Wollstonecraft-Janet Todd 2013-03-12 First published in 1976, this was the first comprehensive annotated bibliography of Mary Wollstonecraft's works and most of the critical and biographical comments on her in English written between 1788 and 1975. It is designed both as a research tool for scholars and students and as a revelation of the quantity and variety of comment. The book is divided into three main chronological time periods of publication date and suggests the vagaries of Wollstonecraft's posthumous reputation and indicates the peaks and troughs of interest. Known as an eighteenth-century British writer, philosopher, and advocate of women's rights, Mary Wollstonecraft has received much critical attention with particular interest in her unorthodox lifestyle of the time and is now regarded as one of the founding feminist philosophers.

Fast Feminism-Shannon Bell 2010 FAST FEMINISM is a new-old feminism grounded in politics, performance and philosophy. It is in close proximity to postfeminisms of the poststructuralist variety--third-wave feminism, queer feminism, cyberfeminism and feminism 3.0. While FAST FEMINISM operates in proximity to other feminisms, its 'natural' home is in queer theory. Queer gets its meaning and its politics from its oppositional relationship to hegemonic norms. To queer something is to disrupt it, to put it under scrutiny and to attempt to change it. FAST FEMINISM takes the hypermasculine speed of Paul Virilio and makes it feminist. FAST FEMINISM is the bastard offspring and the happy accident of speed theory. FAST FEMINISM is a philo-porno-political practice--a pragmatic philosophy and politics--enacted by the pornographic sage who moves through the text as "FF." Fast feminist event sites include female ejaculation, drag-kinging, an infamous child-pornography trial, Bataillean fucking at a women's bathhouse, posthuman-humachine seduction and sex organ tissue-engineering. FF is a post-gender provocateur, not so much a gender terrorist as a gender risk-taker going the distance with her body. FF's philosophy is lived. Actions count. One resists with one's body.

Mary Wollstonecraft and the Rights of Women-Calvin Craig Miller 1999 Traces the life and career of the eighteenth-century feminist and author who referred to marriage as "legal prostitution"

Jayne Cortez, Adrienne Rich, and the Feminist Superhero-Laura Hinton 2016-03-25 One a lyric "confessional" poet and essayist, the other a jazz "spoken-word" performance artist, Adrienne Rich and Jayne Cortez were American feminist superheroes who produced extensive bodies of poetic work that reveal strangely overlapping visions, but in radically different voices and poetic styles. This book reconsiders the poetry activism of Cortez and Rich side-by-side, engaging poetics theory, cultural studies, and popular media in its literary analyses. A collection of eight integrated chapters by multiple poetry critics, as well as an artist-statement narrative by Wonder Woman sculptor Linda Stein, the book focuses upon the voice of bravado, the various calls for global justice, and Third Wave feminist "intersectional" critiques all embodied within these two women's poetic texts. The book also examines the twentieth-century figure of the American superhero, particularly Wonder Woman, bringing popular-culture studies into conversation with literary criticism, as well as visual art through the inclusion of Stein's commentary and illustrations. This beautiful and compelling book experiments with the festschrift concept by inviting multiple and competing disciplinary views on U.S. feminist poetics, women's art and aesthetics, racial and sexual identities, as well as politics and performance—all in tribute to the power of poetry by Cortez and Rich.

Ethnographic Sorcery-Harry G. West 2008-09-15 According to the people of the Mueda plateau in northern Mozambique, sorcerers remake the world by asserting the authority of their own imaginative visions of it. While conducting research among these Muedans, anthropologist Harry G. West made a revealing discovery—for many of them, West's efforts to elaborate an ethnographic vision of their world was itself a form of sorcery. In *Ethnographic Sorcery*, West explores the fascinating issues provoked by this equation. A key theme of West's research into sorcery is that one sorcerer's claims can be challenged or reversed by other sorcerers. After West's attempt to construct a metaphorical interpretation of Muedan assertions that the lions prowling their villages are fabricated by sorcerers is disputed by his Muedan research collaborators, West realized that ethnography and sorcery indeed have much in common. Rather than abandoning ethnography, West draws inspiration from this connection, arguing that anthropologists, along with the people they study, can scarcely avoid interpreting the world they inhabit, and that we are all, inescapably, ethnographic sorcerers.

A Contemporary Nursing Process-Dr. Rozzano C. Locsin, RN, PhD, FAAN 2009-04-10 "[This book] speaks against thinking [that] we can only understand nursing from a traditional, logical, empirical approach, suggesting we need a contemporary process for exploring nursing. I can't agree more." --Journal of Christian Nursing "Nurse scholars from across the globe contribute essays to this unique philosophical exploration of today's nursing. This book presents an emerging view that requires nursing to look at its work through a broader and less structured lens. Challenging the structure of the traditional nursing process, the book considers nursing as reflective and thoughtful." --Doody's A Contemporary Nursing Process re-envision the practice of nursing by configuring caring in terms of the person the nurse cares for. Locsin and Purnell stress the importance of knowing the patient, and differentiating the person from the disease. This text addresses this highly relevant issue, and provides a wealth of insight on how to care for the patient on a personal level, while still professionally administering clinical treatment. Chapters discuss: How to appreciate persons as participants in their care, rather than as objects of care The ideal of care versus the practical demands of care Technological advancements shaping human life and nursing The consequences of "not knowing" the patient on a personal level

The Godfather of Tabloid-Jack Vitek 2010-03-01 They're hard to miss at grocery stores and newsstands in America -- the colorful, heavily illustrated tabloid newspapers with headlines promising shocking, unlikely, and sometimes impossible stories within. Although the papers are now ubiquitous, the supermarket tabloid's origin can be traced to one man: Generoso Pope Jr., an eccentric, domineering chain-smoker who died of a heart attack at age sixty-one. In The Godfather of Tabloid, Jack Vitek explores the life and remarkable career of Pope and the founding of the most famous tabloid of all -- the National Enquirer. Upon graduating from MIT, Pope worked briefly for the CIA until he purchased the New York Enquirer with dubious financial help from mob boss Frank Costello. Working tirelessly and cultivating a mix of American journalists (some of whom, surprisingly, were Pulitzer prize winners) and buccaneering Brits from Fleet Street who would do anything to get a story, Pope changed the name, format, and content of the modest weekly newspaper until it resembled nothing America had ever seen before. At its height, the National Enquirer boasted a circulation of more than five million, equivalent to the numbers of the Hearst newspaper empire. Pope measured the success of his paper by the mail it received from readers, and eventually the volume of reader feedback was such that the post office assigned the Enquirer offices their own zip code. Pope was skeptical about including too much celebrity coverage in the tabloid because he thought it wouldn't hold people's interest, and he shied away from political stories or stances. He wanted the paper to reflect the middlebrow tastes of America and connect with the widest possible readership. Pope was a man of contradictions: he would fire someone for merely disagreeing with him in a meeting (once firing an one editor in the middle of his birthday party), and yet he spent upwards of a million dollars a year to bring the world's tallest Christmas tree to the Enquirer offices in Lantana, Florida, for the enjoyment of the local citizens. Driven, tyrannical, and ruthless in his pursuit of creating an empire, Pope changed the look and content of supermarket tabloid media, and the industry still bears his stamp. Grounded in interviews with many of Pope's supporters, detractors, and associates, The Godfather of Tabloid is the first comprehensive biography of the man who created a genre and changed the world of publishing forever.

Readings in Wood-John Leland 2015-01 Award-winning nature writer John Leland offers a collection of twenty-seven short, poetic essays that marry science and the humanities as the author seeks meaning in trees. Readings in Wood is an investigation of trees and forests and also of wood as a material that people have found essential in the creation of society and culture. Leland views with wit and erudition the natural world and the curious place of human beings as saviors and destroyers of this world. At once personal memoir, natural history, and cultural criticism, the book reflects Leland's idiosyncratic vision. In one essay Leland asks the trees, "Do you, like us, rejoice in sunny days, dance with the wind, and blush to have your sexual desires known by prurient passersby? Why, like us, do you torture yourselves reaching for a heaven beyond your grasp? Why twist yourselves so that your grain becomes a record of your grief? What mystic patterns of science, math, and religion hide in your whirls of leaf and branch?" As vast as a forest, topics range from tree grain and leaf shape to economic theories, mathematics, and engineering. Readings in Wood is a hybrid testament of science, faith, superstition, and disbelief learned from sitting on tree trunks and peering at leaves and fungi. Leland hopes others will join him in nature's classroom. Quite aware of the irony, he reminds us, "These leaves you desultorily turn over once hung in a green wood gone to make this book. Touching a book, you touch a tree. I pray that Readings in Wood's essays, touching you, may justify in some small way the trees who died in their making."

International Handbook of Adolescent Pregnancy-Andrew L. Cherry 2014-01-13 The rates are on the decline worldwide. But adolescent pregnancies still occur, placing millions of girls each year at risk for medical complications and social isolation and their babies for severe health problems-especially when prenatal care is inadequate or nonexistent. But as the opportunity for young women and girls increases around the world, adolescent pregnancy will continue to decline. Featuring reports from countries across the developed and developing worlds, the International Handbook of Adolescent Pregnancy analyzes the scope of the problem and the diversity of social and professional responses. Its biological/ecological perspective identifies factors influencing childhood pregnancy, as well as outcomes, challenges and needs of very young mothers as they differ across nations and regions. Salient comparisons are made as cultural contexts and community support vary widely and attention is paid to issues such as child marriage, LGBT concerns and the impact of religion and politics on health care, particularly access to contraception, abortion and other services. This global coverage heightens the understanding of readers involved in care, education and prevention programs and otherwise concerned with the psychosocial development, reproductive health and general well-being of girls. Included in the Handbook: Biological influences of adolescent pregnancy. Adolescent maternal health and childbearing. Adolescent pregnancy and mental health. International perspectives on adolescent fathers. Adolescent pregnancy as a feminist issue. Adolescent pregnancy as a social problem. Plus viewpoints from more than thirty countries. As a unique source of up-to-date findings and clear-headed analysis, the International Handbook of Adolescent Pregnancy is a go-to reference for practitioners and researchers in maternal and child health, pediatrics, adolescent medicine and global health.

Causality in Macroeconomics-Kevin D. Hoover 2001-08-13 These ideas help to clarify philosophical as well as economic issues. The structural approach to causality is then used to evaluate more familiar approaches to causality developed by Granger, by LeRoy, and by Glymour, Spirtes, Scheines, and Kelly, as well as vector autoregressions, the Lucas critique, and the exogeneity concepts of Engle, Hendry, and Richard. A constructive approach to causal inference based on patterns of stability and instability in the face of identified regime changes is developed and illustrated in two empirical case studies of the causal direction between money and prices and between taxes and spending."-Jacket.

Alice in the Know-Phyllis Reynolds Naylor 2012-06-19 It's the summer before junior year, and Alice is looking forward to three months of excitement, passion, and drama. But what does she find? A summer working in a local department store, trying to stop shoplifters, and more "real life" problems than she could have ever imagined: A good friend becomes seriously ill, Lester has more romance problems than even Alice knows what to do with, and the gang from Mark Stedmeister's pool is starting to grow up a bit faster than Alice is comfortable with....Fortunately for Alice her family and friends are with her through it all, and by the end of the summer, Alice finds she knows a whole lot more than she had in June.

FORENSIC INTERVIEWING IN CRIMINAL COURT MATTERS-Marc Nesca 2013-06-01 Forensic mental health assessment has essentially become synonymous with forensic psychological assessment. This necessary shift toward empirically grounded procedures has had the unfortunate by-product of diminishing the importance of the clinical interview in favor of procedures biased in the direction of rigid structure and statistical formulas. In contrast, the authors' approach to forensic mental health places the individual front and center in the assessment process. The need to treat the interviewee as an individual rather than a member of some statistically defined group is the recurring theme of this book. As much as possible, the text is focused on the interview proper. Issues related to the broader topic of forensic assessment are discussed as necessary to provide context. Although the issues discussed apply equally in civil and family court settings, the focus is on the criminal justice system. This is not a "how to" book but rather focuses primarily on the interview process and on general areas of inquiry. The text is organized into three sections: (1) general issues, (2) specific applications, and (3) special populations. Section 1 provides a conceptual foundation for the book by comparing and contrasting clinical and forensic interview strategies. Further, it introduces the concept of idiographic model construction central to the authors' approach to interviewing and also addresses the thorny issues of malingering and response bias. The section closes with a discussion of practical considerations and technical issues applicable to forensic interviews. In section 2, the focus is narrowed to three criminal justice settings: retrospective insanity offenses, here and now adjudicative competency assessments, and forward-looking predisposition assessments. The final section further narrows its focus with chapters on interviewing sexual, violent, and adolescent offenders, as well as a chapter on third-party sources of information in forensic mental health evaluations. The book will serve as a valuable resource for a variety of mental health professionals as well as criminal justice administrators.
