La protección constitucional del medio ambiente sano en Colombia-MELÓN VELÁSQUEZ, Herbert Giobán 2016-10-01 Teniendo como referente la Constitución Política de 1991, el derecho al medio ambiente sano, se distingue al ser considerado como un derecho colectivo de “tercera generación” pues fue el interés del constituyente derivado, en incorporar el aspecto ambiental de manera transversal en el ordenamiento superior, al estar relegado este tema en la Constitución de 1886, siendo indispensable en acatar el compromiso del reconocimiento y protección al derecho a gozar de un medio ambiente sano, asumido en la Conferencia de Estocolmo y posteriormente devino en la Declaración de Río, la necesidad de incluir un modelo de desarrollo sostenible, efectivamente, Colombia entró a la vanguardia de las otras constituciones del mundo al insertar este “nuevo derecho” en más de treinta y cuatro artículos constitucionales lo que según la Sentencia T-411/92, la ha denominado como una “Constitución ecológica, verde o ambiental”, además de ser progresista en sus pronunciamientos. Así las cosas, transitamos dentro del estudio investigativo en un análisis de temas trascendentales como: las categorías de los derechos, aspectos jurídicos legales del desarrollo del medio ambiente, las acciones constitucionales, el activismo judicial de la Corte Constitucional colombiana y luego concluir, con la jurisprudencia constitucional sobre medio ambiente sano en Colombia. Es en este contexto, donde surge el planteamiento: ¿Cómo puede un derecho de tercera generación que ha sido vulnerado y cuya vía procesal son las acciones populares, acudir a través de la acción de tutela para buscar su protección en sede judicial?. Así las cosas, el estado de la cuestión del presente estudio investigativo, se centró en analizar las diferentes tendencias adoptadas en la protección ambiental por la Corte Constitucional desde el periodo comprendido entre el 4 de julio de 1991 hasta el día 4 de agosto 2014, iniciando con la Sentencia T-403/92, y finalizando con la Sentencia T-197/14, dada la delimitación del problema de estudio elegido, que permite identificar los supuestos teóricos y jurídicos directamente relacionados con el objeto de investigación, allí se tomó una muestra representativa de 359 pronunciamientos de esa alta Corporación, enfocando nuestro análisis específicamente en las acciones de tutela, sin dejar de lado, las Sentencias de Constitucionalidad, Sentencias de Unificación y Autos, para lograr identificar cinco líneas jurisprudenciales dentro del medio ambiente sano, cuya fluctuación se dio inicialmente como un derecho fundamental, transitó a la teoría de la conexidad, siguió a tener una doble titularidad de los derechos subjetivos y colectivos, posteriormente acogió de nuevo la fundamentalidad pero bajo la preceptiva de instrumentos internacionales y finalmente indicar, la equivalencia en fundamentalidad de derechos y la transversalidad del medio ambiente con los demás derechos prestacionales.

Heritage Sites of Astronomy and Archaeoastronomy in the Context of the UNESCO World Heritage Convention-Clive L. N. Ruggles 2012-05-10 This Thematic Study is a joint venture between ICOMOS, the advisory body to UNESCO on cultural sites, and the International Astronomical Union. It presents an overall vision on astronomical heritage, attempts to identify what constitutes "outstanding universal significance to humankind" in relation to astronomy, and identifies broad issues that could arise in the assessment of cultural properties relating to astronomy. This is the first Thematic Study in any field of science heritage. It is elaborated using examples of properties from around the world, including some already on the World Heritage List or national Tentative Lists. The subject matter ranges from early prehistory to modern astrophysics and space heritage, and also prominently includes dark sky issues and modern observatory sites. An e-version of the Thematic Study was published in June 2010 in time to be presented to the 2010 meeting of UNESCO's World Heritage Committee, where it was duly approved. It has been circulated officially by the WHC to all of UNESCO's National Commissions. This full-colour paperback edition with some updates, and reformatted to new ICOMOS standards, was published in 2011 and is now offered for public sale.

Contemporary Carioca-Frederick Moehn 2012-04-23 The ethnomusicologist Frederick Moehn introduces a generation of Rio-based musicians who build on the música popular brasileira (MPB) of previous decades, but who have yet to receive scholarly attention. Narcoland-Anabel Hernandez 2013-09-10 The product of five years' investigative reporting, the subject of intense national controversy, and the source of death threats that forced the National Human Rights Commission to assign two full-time bodyguards to its author, Anabel Hernández, Narcoland has been a publishing and political sensation in Mexico. The definitive history of the drug cartels, Narcoland takes readers to the front lines of the "war on drugs," which has so far cost more than 60,000 lives in just six years. Hernández explains in riveting detail how Mexico became a base for the mega-cartels of Latin America and one of the most violent places on the planet. At every turn, Hernández names names - not just the narcos, but also the politicians, functionaries, judges and entrepreneurs who have collaborated with them. In doing so, she reveals the mind-boggling depth of corruption in Mexico's government and business elite. Hernández became a journalist after her father was kidnapped and killed and the police refused to investigate without a bribe. She gained national prominence in 2001 with her exposure of excess and misconduct at the presidential palace, and previous books have focused on criminality at the summit of power, under presidents Vicente Fox and Felipe Calderón. In awarding Hernández the 2012 Golden Pen of Freedom, the World Association of Newspapers and News Publishers noted, "Mexico has become one of the most dangerous countries in the world for journalists, with violence and impunity remaining major challenges in terms of press freedom. In making this award, we recognize the strong stance Ms. Hernández has taken, at great personal risk, against drug cartels." From the Hardcover edition.

Improving Complex Systems Today-Daniel D. Frey 2011-07-09 As the main theme of Improving Complex Systems Today implies, this book is intended to provide readers with a new perspective on concurrent engineering from the standpoint of systems engineering. It can serve as a versatile tool to help readers to navigate the ever-changing state of this particular field. The primary focus of concurrent engineering was, at first, on bringing downstream information as far upstream as possible by introducing parallel processing in order to reduce time to market and to prevent errors at a later stage which would sometimes cause irrevocable damage. Up to now, numerous new concepts, methodologies and tools have been developed, but over concurrent engineering's 20-year history the

situation has changed extensively. Now, industry has to work in the global marketplace and to cope with diversifying requirements and increasing complexities. Such globalization and diversification necessitate collaboration across different fields and across national boundaries. Thus, the new concurrent engineering calls for a systems approach to gain global market competitiveness. Improving Complex Systems Today provides a new insight into concurrent engineering today.

L'idea costruita-Alberto Campo Baeza 2014-04-16 L'idea costruita è il manifesto teorico di Alberto Campo Baeza; una raccolta di testi di varia provenienza che manifesta la chiarezza del suo pensiero e la straordinaria coerenza della sua opera. Concentrandosi sui fondamenti della disciplina (la luce, il confronto con la gravità, il valore delle idee, il flusso incessante della storia) l'autore redige un testo colto ma volontariamente antiaccademico, aperto alle suggestioni delle altre discipline artistiche ma con una evidente passione didattica. I testi sui grandi maestri dell'architettura spagnola (Fisac, De la Sota, Sáenz de Oíza, Coderch, Carvajal), mondiale (Mies van der Rohe, Utzon), o sui colleghi della scena internazionale (Ando, Chipperfield, Ilinás, Vicens e Ramos) mettono in luce il suo percorso culturale e la sua idea di architettura, basata sul suo rigoroso «más con menos». «La storia dell'architettura, lungi dall'essere solo una storia delle forme, è fondamentalmente una storia delle idee costruite. Le forme si disgregano col tempo ma le idee rimangono, sono eterne». «Un'architettura che ha nell'idea la sua origine, nella luce il suo primo materiale, nello spazio essenziale la volontà di ottenere il più con meno».

2666-Roberto Bolaño 2013-07-09 THE POSTHUMOUS MASTERWORK FROM "ONE OF THE GREATEST AND MOST INFLUENTIAL MODERN WRITERS" (JAMES WOOD, THE NEW YORK TIMES BOOK REVIEW) Composed in the last years of Roberto Bolaño's life, 2666 was greeted across Europe and Latin America as his highest achievement, surpassing even his previous work in its strangeness, beauty, and scope. Its throng of unforgettable characters includes academics and convicts, an American sportswriter, an elusive German novelist, and a teenage student and her widowed, mentally unstable father. Their lives

intersect in the urban sprawl of SantaTeresa—a fictional Juárez—on the U.S.-Mexico border, where hundreds of young factory workers, in the novel as in life, have disappeared.

A Neotropical Companion-John C. Kricher 1999 A Neotropical Companion is an extraordinarily readable introduction to the American tropics, the lands of Central and South America, their remarkable rainforests and other ecosystems, and the creatures that live there. It is the most comprehensive one-volume guide to the Neotropics available today. Widely praised in its first edition, it remains a book of unparalleled value to tourists, students, and scientists alike. This second edition has been substantially revised and expanded to incorporate the abundance of new scientific information that has been produced since it was first published in 1989. Major additions have been made to every chapter, and new chapters have been added on Neotropical ecosystems, human ecology, and the effects of deforestation. Biodiversity and its preservation are discussed throughout the book, and Neotropical evolution is described in detail. This new edition offers all new drawings and photographs, many of them in color. As enthusiastic readers of the first edition will attest, this is a charming book. Wearing his learning lightly and writing with ease and humor, John Kricher presents the complexities of tropical ecology as accessible and nonintimidating. Kricher is so thoroughly knowledgeable and the book is so complete in its coverage that general readers and ecotourists will not need any other book to help them identify and understand the plants and animals, from birds to bugs, that they will encounter in their travels to the New World tropics. At the same time, it will fascinate armchair travelers and students who may get no closer to the Neotropics than this engagingly written book.

Stress Challenges and Immunity in Space-Alexander Chouker 2011-12-20 Stress of either psychological or physical nature can activate and/or paralyse humans' innate and adaptive immunity. However, adequate immunity is crucial to the maintenance of health on earth and in space. During space flight, human physiology and health are challenged by complex environmental stressors which might be at their most pronounced during lunar or interplanetary missions. While previous publications have addressed the physiological changes that occur during space flight, this book goes further, by adopting an interdisciplinary approach to analyze the complex interaction of living conditions in space, the immune system, and astronauts' health. It is explained how such analysis of the consequences of stress for the immune system may help in preventing, diagnosing, and counteracting immune-related alterations in health on earth as well as in space

The Demon-Haunted World-Carl Sagan 2011-07-06 A prescient warning of a future we now inhabit, where fake news stories and Internet conspiracy theories play to a disaffected American populace "A glorious book . . . A spirited defense of science . . . From the first page to the last, this book is a manifesto for clear thought."—Los Angeles Times How can we make intelligent decisions about our increasingly technology-driven lives if we don't understand the difference between the myths of pseudoscience and the testable hypotheses of science? Pulitzer Prize-winning author and distinguished astronomer Carl Sagan argues that scientific thinking is critical not only to the pursuit of truth but to the very well-being of our democratic institutions. Casting a wide net through history and culture, Sagan examines and authoritatively debunks such celebrated fallacies of the past as witchcraft, faith healing, demons, and UFOs. And yet, disturbingly, in today's so-called information age, pseudoscience is burgeoning with stories of alien abduction, channeling past lives, and communal hallucinations commanding growing attention and respect. As Sagan demonstrates with lucid eloquence, the siren song of unreason is not just a cultural wrong turn but a

dangerous plunge into darkness that threatens our most basic freedoms. Praise for *The Demon-Haunted World* "Powerful . . . A stirring defense of informed rationality. . . Rich in surprising information and beautiful writing."—*The Washington Post Book World* "Compelling."—*USA Today* "A clear vision of what good science means and why it makes a difference. . . . A testimonial to the power of science and a warning of the dangers of unrestrained credulity."—*The Sciences* "Passionate."—*San Francisco Examiner-Chronicle*

The Reading Environment-Aidan Chambers 1996 "Reading is a provocative act; it makes things happen." "It is a fact of our psychological make-up that we cannot read anything without experiencing some kind of response." "If we are forced to read as a duty, expecting no delight, we are likely to find it a boring business." "We cannot easily read for ourselves what we haven't heard said." "Some people say they don't like reading stories, but I've never come across anyone who doesn't like hearing one." With such forthright statements Aidan Chambers ensures that *The Reading Environment* will make things happen about the ways reading is presented in schools. For Chambers, reading is a life-enhancing occupation, not a pastime. Drawing memorably on his own experience as a teacher and a reader, he offers a multitude of stimulating ideas for opening the rewards of thoughtful reading to all children. Concerned with the practical aspects of creating an environment that supports children as they become readers, he provides suggestions on school book fairs and displays, reading areas, author visits, and book selection. But having enabled children to become readers is only part of the issue, and he also addresses ways of keeping track of children's reading and helping them develop responses to what they read. Concise and elegantly written, *The Reading Environment* will be a valuable book for preservice and inservice teachers, and its distinctive blend of reflective and active comment make it an enlightening reminder to parents, media specialists, and librarians. *Tell Me: Children, Reading, and Talk* is the companion volume to *The Reading Environment*.

Inverted Utopias-Mari Carmen Ramírez 2004 In the twentieth century, avant-garde artists from Mexico, Central and South America, and the Caribbean created extraordinary and highly innovative paintings, sculptures, assemblages, mixed-media works, and installations. This innovative book presents more than 250 works by some seventy of these artists (including Gego, Joaquin Torres-Garcia, Xul Solar, and Jose Clemente Orozco) and artists' groups, along with interpretive essays by leading authorities and newly translated manifestoes and other theoretical documents written by the artists. Together the images and texts showcase the astonishing artistic achievements of the Latin American avant-garde. The book focuses on two decisive periods: the return from Europe in the 1920s of Latin American avant-garde pioneers; and the expansion of avant-garde activities throughout Latin America after World War II as artists expressed their independence from developments in Europe and the United States. As the authors explain, during these periods Latin American art was fueled by the belief that

artistic creations could present a form of utopia - an inversion of the original premise that drove the European avant-garde - and serve as a model for How to See and Read the Aura-Ted Andrews 2006 "Anyone can learn to see and experience the aura more effectively." -Ted Andrews If you've ever felt immediately comfortable-or uncomfortable-around someone you've just met, you've probably sensed a person's aura. Enduring Seeds-Gary Paul Nabhan 2016-10-01 As biological diversity continues to shrink at an alarming rate, the loss of plant species poses a threat seemingly less visible than the loss of animals but in many ways more critical. In this book, one of America's leading ethnobotanists warns about our loss of natural vegetation and plant diversity while providing insights into traditional Native agricultural practices in the Americas. Gary Paul Nabhan here reveals the rich diversity of plants found in tropical forests and their contribution to modern crops, then tells how this diversity is being lost to agriculture and lumbering. He then relates "local parables" of Native American agriculture—from wild rice in the Great Lakes region to wild gourds in Florida—that convey the urgency of this situation and demonstrate the need for saving the seeds of endangered plants. Nabhan stresses the need for maintaining a wide gene pool, not only for the survival of these species but also for the preservation of genetic strains that can help scientists breed more resilient varieties of other plants. Enduring Seeds is a book that no one concerned with our environment can afford to ignore. It clearly shows us that, as agribusiness increasingly limits the food on our table, a richer harvest can be had by preserving ancient ways. This edition features a new foreword by Miguel Altieri, one of today's leading spokesmen for sustainable agriculture and the preservation of indigenous farming methods.
