Investment Protection and the Energy Charter Treaty-Graham Coop 2008

The Energy Charter Treaty:An East-West Gateway for Investment and Trade-Thomas Walde 1996-07-25 The Energy Charter Treaty, initiated by the 1991 European Energy Charter and completed in December 1994, is an innovative major multilateral investment and trade treaty. The book has an introduction by Ruud Lubbers who, as the Dutch Prime Minister, played the key role in initiating the Energy Charter negotiations. It brings together contributions on the energy/investment background, the geopolitical context, the Energy Charter negotiations and the relevant specific topics of the Treaty (focusing on investment and trade, but also environment, competition and transit) by the key specialists on the subject, ranging from countries such as the US (which in the end decided not to join the Treaty) to Russia and Kazakhstan, including energy and investment specialists, international investment and commercial lawyers and arbitrators. The contributors include noted international energy/economic law authorities, but also key participants and observers of the Treaty negotiations. This book is intended to provide the first authoritative analysis of the background, negotiations and content of the Energy Charter Treaty and to provide support and guidance for subsequent negotiations and the difficult challenges involved in interpretation and application of the Treaty. It will be an essential tool for anybody working with the Energy Charter Treaty. The book contains in its annex the major documents of the Treaty: The 1991 European Energy Charter, the 1994 Treaty and its relevant Protocols, Annexes, Understandings and Final Act Declarations.

Energy Dispute Resolution: Investment Protection, Transit and the Energy Charter Treaty-Graham Coop 2011-06-01 Energy Dispute Resolution: Investment Protection, Transit and the Energy Charter Treaty is a compilation of written contributions prepared in the context of a conference organized by the Energy Charter Secretariat, in cooperation with five other well-known legal institutions (the Arbitration Institute of the Stockholm Chamber of Commerce, the British Institute of International and Comparative Law, the International Centre for Settlement of Investment Disputes, the International Chamber of Commerce and the Permanent Court of Arbitration). This highly successful conference took place in Brussels in October 2009. Energy Dispute Resolution: Investment Protection, Transit and the Energy Charter Treaty focuses on investment arbitration under the Energy Charter Treaty (or ECT) and on transit dispute resolution under the ECT. Part I consists of a review of awards, decisions and other developments in ECT investment arbitrations, of which nearly 30 were in the public domain as of 1 January 2011. Part II deals with the relationship between bilateral investment treaties, the ECT as a multilateral investment treaty, and European Union (EU) law, and addresses the question of whether conflict between these legal systems is inevitable. In Part III, the book reviews the highly developed provisional application mechanism of the ECT, particularly in relation to Russia, which signed the ECT in 1994 but has never ratified it. Part IV deals with the energy transit provisions of the ECT and the Treaty's potential application with respect to East-West energy transit and supply disputes. The book also contains an Editor's Preface, introductory and closing remarks, a table of contents, a detailed index, and an Appendix in the form of a CD-ROM containing the rules of arbitration of the three international arbitration mechanisms provided by the ECT (ICSID, SCC and ad hoc UNCITRAL arbitration). The book is of international application, particularly within the 51-country Energy Charter constituency (Western, Central and Eastern Europe, the former Soviet Union, Japan, Turkey, Mongolia and Australia), but is relevant to energy and international arbitration lawyers worldwide.

Commentary on the Energy Charter Treaty-Rafael Leal-Arcas 2018 The Commentary on the Energy Charter Treaty (ECT) provides a unique, article-by-article, textual analysis of this important international agreement. The ECT outlines a multilateral framework for cross-border cooperation in the energy sector based on the principles of open competitive markets and sustainable development.

Trade and Energy-Lars Albath 2004

Settlement of Investment Disputes under the Energy Charter Treaty-Thomas Roe 2011-04-14 The Energy Charter Treaty has come of age, with almost 50 States parties and a small but growing body of arbitral case law. In this new study of the Treaty's investment protection provisions, Thomas Roe and Matthew Happold set out to identify and explain the Treaty's principal provisions and to suggest answers to some of the difficult problems thrown up by its drafting. They discuss in detail questions such as the standards of protection granted by the Treaty and the international responsibility of States for breaches of the Treaty, the various procedures available for the vindication of rights under the Treaty and the conditions to be satisfied before a claimant's complaint may be considered on the merits. Specific issues addressed include the impact of EU law on claims under the Treaty and the Treaty's provisions concerning taxation.

Putting a Price on Energy- 2007

Investment Arbitration and the Energy Charter Treaty-Clarisse Ribeiro 2006

The Energy Charter Treaty-Julia Doré 1995 "The Energy Charter Treaty was launched with great fanfare to lay out the ground rules for massive investment in the energy resources and structures of central and eastern Europe. A general political statement was readily agreed upon, but negotiations on the Basic Agreement took several years before it was finally signed in December 1994. A follow-up treaty and protocols have yet to be negotiated." "This report examines the origins and evolution of the Energy Charter, summarizes the main elements of the Basic Agreement, and assesses the strengths, weaknesses and ultimate significance of the Charter."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Regulation of Energy in International Trade Law-Julia Selivanova 2011-01-01 Starting from the premise that a multilateral legal framework is the surest way to achieve predictability and transparency under conditions of increasing reliance on internationally traded energy, the essays gathered in this book treat the many complex interlocking issues raised by examining that desideratum in the light of current reality. Concentrating on the application of WTO agreements to energy trade - as well as energy-related issues addressed in the current WTO negotiations - the authors offer in-depth discussion and analysis of such issues as the following: the effectiveness of existing WTO agreements in addressing issues pertinent to energy trade how restrictive practices of energy endowed countries can be tackled under existing international trade rules; existing frameworks for investment in highly capital-intensive energy infrastructure projects;and conditions for access to pipelines and transmission grids; regulation of energy services; bioenergy development and trade; energy issues addressed in the WTO accession negotiations of energy endowed

countries; international instruments of resolution of energy-related disputes.

Law and Practice of Investment Treaties-Andrew Paul Newcombe 2009-01-01 The book focuses on the substantive protections accorded to investors and investments and on the variations among jurisdictions. Among the many specific issues and topics that arise in the course of the discussion are the following: - problems of transparency and conflict of interest; - the recent growth in IIAs between and among developing nations; - the effect of new model bilateral investment treaties (BITs); - the ability of non-disputing parties to participate in investor-state arbitration; - theories of the interaction of foreign direct investment (FDI) and BITs; - investor-state arbitration as an evasion of public regulatory authority; - the role of investment funds in international investment; - 'fork in the road' provisions; and - institutional versus ad hoc arbitration. International business and other investors will greatly appreciate the in-depth information and insightful guidance in this solidly useful book. It will also be welcomed by jurists and students as a significant milestone in the development of principles in a quickly growing field of practice that is still plagued with inconsistencies.

Energy Security-Sanam S. Haghighi 2007-08-31 This book offers the first comprehensive assessment of the various internal and external measures undertaken by the European Union to guarantee security of oil and gas supply. It sets out and analyses in a coherent and thorough manner those aspects of EU external policy that are relevant in establishing a framework for guaranteeing energy security for the Union. What makes the book unique is that it is the first of its kind to bridge the gap between EU energy and EU external policy. The book discusses EU policy towards the major oil and gas producing countries of Russia, the Mediterranean and the Persian Gulf at the bilateral as well as regional and multilateral level. It brings together not only the dimensions of trade and investment but also other important aspects of external policy, namely development and foreign policy. The author argues that the EU's energy security cannot be achieved through adopting a purely internal approach to energy issues, but that it is necessary to adopt a holistic approach to external policy, covering efficient economic relations as well as development co-operation and foreign policies towards energy producing countries. The book will be a valuable resource for students of EU law, WTO law or international energy law, as well as scholars and practitioners dealing with energy issues.

Arbitration Under International Investment Agreements-Katia Yannaca-Small 2010 Investor-state arbitration is a relatively new dispute settlement mechanism that allows foreign investors the opportunity to seek redress for damages arising out of breaches of investment-related treaty obligations by the governments of host countries. Claims are submitted to independent, international arbitration tribunals, which are called upon to interpret the treaty at hand. Because of the public interest involved in these cases, the awards of these tribunals are subject to much scrutiny and debate. Thus, it has already generated hundreds of cases and created new legal disciplines, inspiring a continuous string of legal writings. This book provides a comprehensive analysis of the main issues that arise in investor-state arbitration. It accompanies the reader through the phases of such a procedure, starting with an examination of the instruments, which provide, in the overwhelming majority of the cases, the legal basis for the requests for such arbitration. It then continues with the launching of the arbitration procedure, followed by the analysis of the main jurisdictional and substantive issues that the tribunals are confronted with, and the review procedures, when there is a request for setting aside of the award. It finally looks at the post-award phase and concludes with a reflection on the role of precedent in investment arbitration. Arbitration under International Investment Agreements: a Guide to the Key Issues contains in one volume what everybody needs to know on this evolving topic. Calling on the most renowned experts in this field, private practitioners, academics, government and international organization officials, it describes the process in all its phases from A to Z, providing a comprehensive insight in the way investor-state arbitration works from the perspective of the main actors involved. Its analyses of all key aspects of the topic are pragmatic and reliable.

Trade, the WTO and Energy Security-Sajal Mathur 2014-07-10 The linkages between WTO rules governing trade and energy security with a certain degree of focus on India are the main subject of this book. The edited volume brings together the views of academics, policymakers and experts with extensive experience covering WTO and international trade issues. The issues examined include mapping the linkages between trade and energy security in the WTO agreements, case law, accession and Doha negotiations; assessing the issues that could be raised by energy deficit or energy surplus countries at the WTO; analyzing the provisions of the ECT and NAFTA vis-à-vis the Indian policy framework and examining the trade regimes of selected OPEC members and other major suppliers of fossil fuels to India. While the Indian perspective is evident in the contributions, this book will also be of interest to an international audience, as trade, the WTO and energy security are global concerns and of relevance to all practitioners and academics working on these issues.

The Energy Charter Treaty-Crina Baltag 2012-01-01 The Energy Charter Treaty (ECT) is a multilateral treaty in the energy sector, entered into force in April 1998, which gained worldwide recognition mainly because of its provisions on the promotion and protection of investments. The ECT currently has over 45 contracting parties. Its popularity increased significantly in the last few years following the proliferation of disputes submitted to arbitration under Article 26 of the ECT, while investors became more familiarized with the rights granted by the ECT in respect of their investments. At present, more than 20 disputes between investors and contracting parties have been submitted to arbitration. The requirements of 'investor' and 'investment' are essential for the benefit of the protection offered by the ECT. The book suggests a comprehensive approach to the notion of 'investor'. It analyzes the notion of 'investor' in an inclusive manner, starting with the concept of Contracting Party to the ECT and its implications in respect of the notion of 'investor', going through nationality, permanent residency, dual nationality, companies and other legal entities and shareholders, to the notion of 'investment' and its role in defining the concept of 'investor' under the ECT. The aim of the book is to shed light on the proper meaning of the notion of 'investor' under the ECT, considering the close relationship between the ECT and other treaties such as the ICSID Convention and arbitration rules.

The Energy Charter Treaty-Kaj Hobér 2020-03-05 The Energy Charter Treaty (ECT) is unique under international law, providing a multilateral framework for energy cooperation through the operation of more open and competitive energy markets, while respecting the principles of sustainable development and sovereignty over energy resources. With 29 arbitrations currently under its provisions, a growing number of investors are resorting to the protection of the ECT. This is the first in-depth, article-by-article commentary on all aspects of the Treaty. It provides clear and comprehensive discussion of all provisions, analysing them against the background of other relevant writings such as case law and academic papers. It also considers relevant arbitral awards. It also offers insightful coverage and analysis of the history and background, as well as discussion of its relationships with other treaties. As energy investors and the legal community become more aware of the Treaty, the number of disputes relating to it is rapidly increasing, and the book considers the growing volume of case law concerning the interpretation or application of the provisions of the treaty. This is an invaluable reference tool for practitioners and investors.

The World Trading System-Robert Howse 1998 Volume 1 = Historical and conceptual foundations ; Volume 2 = Dispute settlement in the world ; Volume 3 = Administered protection ; Volume 4 = The Uruguay round and beyond.

A Manual of International Dispute Resolution-Anthony Connerty 2006 A practical guide to international dispute resolution and settlement, especially in the fields of trade and commerce, investment, and intellectual property. The book will be of interest to readers worldwide who need to understand international dispute resolution processes and institutions.

Emerging Issues in Sustainable Development-Mitsuo Matsushita 2016-10-05 This book seeks to answer the questions: how do the rules of international treaties on trade and investment apply to the new laws and policies relating to energy-related trade, and do the rules of the multilateral system contribute to or detract from sustainable development? An emerging set of new problems in the law of international trade is how to reconcile the rules of the multilateral trading system with shortages of certain natural resources and the necessity to develop renewable energy resources. The chapters in this book provide a comprehensive analysis of the international trade issues presented by national trade laws and policies with regard to natural resources and energy. This book is about the extent to which we are interpreting existing rules to cover emerging problems and how the rules of the multilateral trading system can be adapted to achieve sustainable development in natural resources and energy. The book begins with a survey of selected national laws relating to recent restrictions on the export of natural resources, both resources used to produce energy as well as natural resources essential for industrial production. After examining the range of such laws in selected important countries, we turn to the application of the rules of the multilateral trading system to such export restrictions. We discuss the major rules of the World Trade Organization (WTO) as well as the natural resources rules in selected regional preferential free trade agreements. While there is not a comprehensive global legal regime on competition law, we believe it is also important to examine how selected national competition laws impact export restrictions on natural resources. This book will be a major contribution to the international dialogue on international economic law issues with respect to trade in natural resources and energy.

Developing Countries and the Multilateral Trade Regime-Donatella Alessandrini 2010-08-10 This book explores the way in which 'development' has functioned within the multilateral trade regime since de-colonisation. In particular, it investigates the shift from early approaches to development under the GATT to current approaches to development under the WTO. It argues that a focus on the creation and transformation of a scientific apparatus that links forms of knowledge about the so-called Third World with forms of power and intervention is crucial for understanding the six decades long development enterprise of both the GATT and the WTO. The book is both topical and necessary given the emphasis on the current round of negotiations of the WTO. The Doha 'Development' Round has been premised on two assumptions. Firstly, that the international community has undertaken an unprecedented effort to address the imbalances of the multilateral trading regime with respect to the position of its developing country members. Secondly, that its successful conclusion represents an historic imperative and a political necessity for developing countries. Through a sustained analysis of the interaction between development thinking and trade practices, the book questions both assumptions by showing how development has always occupied a central position within the multilateral trading regime. Thus, rather than asking the question of what needs to be done in order to achieve 'development', the book examines the way in which development has operated and still operates to produce important, and often unacknowledged, power relations. "Intense controversy surrounds the issue of the relationship between trade and development. This book is novel in examining the emergence of the international trade regime in the context of the history of the concept of development that may be traced back at least to the time of the League of Nations. This is a very welcome and original contribution to the field that should generate new discussions and understanding about the law of international trade." Antony Anghie, University of Utah

European Yearbook of International Economic Law 2012-Christoph Herrmann 2011-12-20 The third volume of the European Yearbook of International Economic law focuses on two major topics of current academic and political interest. Firstly, it addresses the 10th anniversary of China's accession to the WTO and its implications; secondly, it deals with different legal aspects of global energy markets.

Energy Economy, Finance and Geostrategy-André B. Dorsman 2018-07-02 This volume investigates the impact of energy issues on geostrategy. The crucial importance of energy and the fact that fossil fuels are not equally distributed among countries means that decisions are not only based on financial arguments, but also on the political impact. It can be said that "Energy is Politics". In three parts - 1) Energy Economy; 2) Finance; and 3) Geostrategy - academics and practitioners address both economic and political questions and present cases from several countries. This is the sixth volume in a series on energy organized by the Centre for Energy and Value Issues (CEVI). The previous volumes in the series were: Financial Aspects in Energy (2011), Energy Economics and Financial Markets (2012), Perspectives on Energy Risk (2014), Energy Technology and Valuation Issues (2015) and Energy and Finance (2016).

Prospects in International Investment Law and Policy-Roberto Echarri 2013-04-18 Addresses the most central debates in contemporary investment law and policy.

Nations, Conglomerates, and Empires- 1996

South Asia and Multilateral Trade Regime-C. S. Sundaresan 2007 Contents Include : Multilateral Trade And Food Security In The South Asian Quadrangle; Multilateral Agricultural Trade And The Us Farm Policies; Impact Of Multilateral Trade On Dairy Commodity Markets In Ldcs; Embedding Local Development To Global Markets; Dilemma Of South Asian Monetary Integration; Towards A Competitive Electricity Market In The South Asia; Understanding Global Oil Market For Development Implications In South Asia; Wto And The Global Oil Markets; Annexures.

Standards of Investment Protection-August Reinisch 2008 This book provides a guide to the application of substantive standards of treatment, routinely included in investment treaties. Leading practitioners and academics analyse the interpretation of core standards in arbitration proceedings, presenting the emerging consensus shaping how they should be applied in practice.
