Packets with Deadlines-I-Hong Hou 2013-05-30 With the explosive increase in the number of mobile devices and applications, it is anticipated that wireless traffic will increase exponentially in the coming years. Moreover, future wireless networks all carry a wide variety of flows, such as video streaming, online gaming, and VoIP, which have various quality of service (QoS) requirements. Therefore, a new mechanism that can provide satisfactory performance to the complete variety of all kinds of flows, in a coherent and unified framework, is needed. In this book, we introduce a framework for real-time wireless networks. This consists of a model that jointly addresses several practical concerns for real-time wireless networks, including per-packet delay bounds, throughput requirements, and heterogeneity of wireless channels. We detail how this framework can be employed to address a wide range of problems, including admission control, packet scheduling, and utility maximization. Table of Contents: Preface / Introduction / A Study of the Base Case / Admission Control / Scheduling Policies / Utility Maximization without Rate Adaptation / Utility Maximization with Rate Adaptation / Systems with Both Real-Time Flows and Non-Real-Time Flows / Broadcasting and Network Coding / Bibliography / Authors' Biographies

Exposure and Understanding the Histogram-Andrew S. Gibson 2014-09-10 What's the best way to determine exposure? How do you know which settings to use for various lighting scenarios? Why does exposure differ for digital photography versus film photography? In this ebook, photographer Andrew S. Gibson answers these questions and more, showing how to use the histogram to obtain optimum exposure in your images. Going beyond simply focusing on how to achieve the "right" exposure for a given situation, he examines how the question of exposure is as open to creative interpretation as any other aspect of photography. By the end of this guide, you'll understand how to take a photo that is correctly exposed using the tools provided by your DSLR camera. In this updated edition, he provides in-depth coverage of using Manual mode, including how to use Live View with a filter to make adjustments to composition and focus, and using manual lens attachments to ensure proper metering for correct exposure. In addition, he provides greatly expanded coverage of three key scenarios: the subject brightness matches the dynamic range of the sensor; the subject brightness is less than the dynamic range of the sensor; and the subject brightness is greater than the dynamic range of the sensor. This coverage includes details on how to use diffusers, portable flash, reflectors—and much more.
