A Pen Named Man: Our Destiny-John W. Newton 2013-07-01 Important goals of mankind, such as eliminating injustice and attaining a higher quality of life, are achievable. To achieve them, however, requires a will and a way. God provides the will. The focus of A Pen Named Man: Our Destiny is to illustrate the way. The route to social fulfillment is through the establishment of universal institutions designed to enable man to serve as God's representative on Earth and "automatically" satisfy his purpose in life. Family is the most important institution of mankind. It forms the nucleus of social living and fosters a deep sense of love and commitment among biologically related people who live together in an emotionally secure environment. Religion ties human behavior to morality and serves as the pathway between an individual and his God. Government establishes a standardized code of equality and fairness. Where the goal of the institution of religion is a moral world, the role of government is a just world. Employment is the institution that opens the door to attaining one's purpose in life. A restructured universal institution of employment provides every individual with the opportunity to contribute his time and resources toward the betterment of mankind. By working in an occupation that makes a product or provides a service useful to society, a person is able to earn the necessities of life for himself, attain

LINEAR ALGEBRA-S. KUMARESAN 2000-01-01 This clear, concise and highly readable text is designed for a first course in linear algebra and is intended for undergraduate courses in mathematics. It focusses throughout on geometric explanations to make the student perceive that linear algebra is nothing but analytic geometry of  $n$  dimensions. From the very start, linear algebra is presented as an extension of the theory of simultaneous linear equations and their geometric interpretation is shown to be a recurring theme of the subject. The integration of abstract algebraic concepts with the underlying geometric notions is one of the most distinguishing features of this book — designed to help students in the pursuit of multivariable calculus and differential geometry in subsequent courses. Explanations and concepts are logically presented in a conversational tone and well-constructed writing style so that students at a variety of levels can understand the material and acquire a solid foundation in the basic skills of linear algebra.
