Research Methods for Organizational Studies-Donald P. Schwab 2007-07-10 Beautifully written and thoroughly class-tested, this practical text provides students of management and organizational studies with clear guidelines for conducting real-world research. Unusually applied, it provides tools with which to do research (data sets and statistical software) and discusses application issues typically missing from other research texts--for example, cleaning data, addressing missing data, coding data, and transforming data. It also provides numerous exercises for solving applied research problems. Among the more notable features are the following: Organizing Model-Two organizing figures (carried throughout the text) imbue discussions with an unusual degree of clarity and coherence. The first illustrates the mutual relationship between the three main research activities--design, measurement, and analysis. The second illustrates how conceptual validity is the major criterion for evaluating empirical research outcomes and procedures. Flexibility-This book accommodates the wide variation in background that students bring into this course. In addition to the first 15 chapters which introduce basic research topics, the final section contains four chapters that extend the discussion of some basic topic. These extension chapters make the text adaptable for doctoral level students. Statistics-In addition to an entire section on data analysis, discussions throughout take an applied data analysis perspective rather than a statistical one. Also, statistics is separated from statistical inference. Supplements-An instructor's manual contains the following elements for each chapter: chapter outlines, teaching objectives and ideas, answers to chapter questions, and additional questions and answers that can be used for tests. Many chapters also have exercises to reinforce material covered. A disk is available that contains cases and data for chapter exercises and for course projects. The disk also contains all of the Exhibits in the book in PowerPoint slides.

South Eastern Europe- 2003 Educational work is a key element for both human capital formation and the promotion of peace and democratic values. It has therefore been identified as one of the priorities of Working Table I of the Stability Pact. The OECD was asked to be Co-ordinator for "General Education Policy and System Change" within the Education and Youth Task Force, and to carry out "Thematic Reviews of Education Policy" in the countries of the region. The main outcome of this project is a series of reports which provide both country overviews and a regional overview. These reports offer an analysis of the education system and address issues and barriers to reform and recommendations. The recommendations are designed to be of use for national policy-makers and to assist Stability Pact partner countries and institutions target regional assistance in order to achieve the goal of supporting South Eastern Europe towards European integration.
