Commercial Motor Vehicle Driver Fatigue, Long-Term Health, and Highway Safety-National Academies of Sciences, Engineering, and Medicine 2016-08-12 There are approximately 4,000 fatalities in crashes involving trucks and buses in the United States each year. Though estimates are wide-ranging, possibly 10 to 20 percent of these crashes might have involved fatigued drivers. The stresses associated with their particular jobs (irregular schedules, etc.) and the lifestyle that many truck and bus drivers lead, puts them at substantial risk for insufficient sleep and for developing short- and long-term health problems.

Commercial Motor Vehicle Driver Fatigue, Long-Term Health and Highway Safety assesses the state of knowledge about the relationship of such factors as hours of driving, hours on duty, and periods of rest to the fatigue experienced by truck and bus drivers while driving and the implications for the safe operation of their vehicles. This report evaluates the relationship of these factors to drivers' health over the longer term, and identifies improvements in data and research methods that can lead to better understanding in both areas.

Driving with Confidence-Eli Peli 2002-01-08 Millions of people, in the US and other parts of the world, face the grim prospect of losing their driving privileges, their mobility, and to a great extent their freedom, due to a deterioration in their eyesight or a disabling eye disease. Driving with Confidence is an empowering tool. Its message is simple: In many cases, people with low vision can and do receive, retain and safely exercise their driving privileges. The book presents a clear, no-nonsense discussion on the realities of low vision conditions, together with a practical program designed to help low vision individuals maximize their chances of retaining and/or extending their driving privileges. It also provides a detailed description of driving vision regulations in every state in the US. Site of interest: www.BiopicDriving.org which is a non profit group concerned with advocating the use of bioptics for driving. Contents: The Freedom to Drive Vision and Driving — Facts and Fiction The Medical Side of Low Vision Thinking about Driving Getting Ready to Drive Learning to Drive On the Road — Driving with Low Vision If All Else Fails — How to Get Where You Want Without a Car Conclusion — Daring to Succeed Appendices: Federal Legislation Information/Aid Sources Terms You Should Know Low Vision Driving Aids State Vision Requirements Bibliography Index Readership: Visually impaired people and their families, optometrists, ophthalmologists, low vision researchers, legislators, DMV administrators and laypersons. Keywords: Low Vision; AMD; Biopic; Vision Aids; Driving and Vision; US Driving; Aging and Driving; Driving in America; Safe Driving Reviews: "... Local researcher, Dr Eli Peli, wrote 'Driving With Confidence' to help people with impaired vision stay on the road." NewsCenter 5's Heather Unruh Boston ABC affiliate WCVB Channel 5 "... we have found your book, 'Driving with Confidence: A Practical Guide to Driving with Low Vision', to be a wonderful resource." Joanne Schwartzberg, MD Director Aging and Community Health, American Medical Association's Older Drivers Project "This helpful book, printed in LARGE TYPE, contains facts, information, advice and reference materials that will enable those facing deterioration in their vision to make informed decisions about their ability to continue driving." Visionlink Newsletter of International Library, Archives & Museum of Optometry "Driving with Confidence fills a large gap in the low vision literature and provides a clearly written discussion of viable options and alternatives for driving with low vision ... because countries outside the US are also dealing with these same issues regarding drivers with low vision and the use of optical enhancement devices, I believe the material contained in Peli and Peli would be of strong interest internationally." Visual Impairment Research "The book is clearly written and well structured ... it will inform and empower its intended audience." CE Optometry "I will be enthusiastically recommending this book to my more astute patients (and their families) if they have a reasonable chance of being able to drive safely and legally and are trying to gain greater perspective than I can offer in a clinic visit. I will also recommend this book as a reference for any eye doctors, rehabilitation specialists, and driving instructors who work with a lot of partially sighted patients." Optometry and Vision Science "I strongly support the Peli's main advocacy theme, which is that visually impaired individuals should be afforded more opportunities to demonstrate their potential for safe driving ... I recommend this book to eye care practitioners as a useful source of information, and a resource to share with their visually-impaired patients." Ian L Bailey Professor of Optometry and Vision Science University of California, Berkeley, California, USA

Getting to Zero Alcohol-Impaired Driving Fatalities-National Academies of Sciences, Engineering, and Medicine 2018-05-25 Alcohol-impaired driving is an important health and social issue as it remains a major risk to Americans' health today, surpassing deaths per year of certain cancers, HIV/AIDS, and drownings, among others, and contributing to long-term disabilities from head and spinal injuries. Progress has been made over the past decades towards reducing these trends, but that progress has been incremental and has stagnated more recently. Getting to Zero Alcohol-Impaired Driving Fatalities examines which interventions (programs, systems, and policies) are most promising to prevent injuries and death from alcohol-impaired driving, the barriers to action and approaches to overcome them, and which interventions need to be changed or adopted. This report makes broad-reaching recommendations that will serve as a blueprint for the nation to accelerate the progress in reducing alcohol-impaired driving fatalities.

Core Curriculum for Occupational & Environmental Health Nursing-American Association of Occupational Health Nurses 2006 A comprehensive overview of occupational and environmental health nursing, this book is AAOHN's statement of the scope of practice for this nursing specialty. It represents the latest body of knowledge significant to this field. Written in an outline format, it can be used as a textbook for an occupational and environmental health nursing course, as a clinical reference in a variety of occupational settings, and as a certification review tool. This new edition is based on recent revisions to the AAOHN's Code of Ethics and Standards of Practice. Written by experts in the field of occupational health nursing. Consistent outline format allows ease of access to information. Addresses the foundational sciences of occupational health: epidemiology, toxicology, industrial hygiene, ergonomics, and injury prevention to provide a comprehensive basis of knowledge. Incorporates trends in the legal, ethical, economic, political, and business climates as they relate to occupational and environmental health and safety, staying current with all areas that affect the occupational health nurse's roles and responsibilities. New chapter on

disaster planning and management addresses responsibilities of occupational health nurses in hazard situations in both the workplace and in the larger community. The latest government initiatives and guidelines are covered, such as OSHA's Strategic Management Plan to reduce workplace fatalities, injuries, and illnesses, plus other new workplace-related government programs and legislation. Revised competencies of practice, with performance criteria, present the current practice expectations at each level of practice. Revised Code of Ethics is a guide for nurses to maintain and pursue professionally recognized ethical behavior in providing occupational and environmental health services. Revised Standards of Practice define the practice of this specialty and provide a framework for evaluation. Expanded content in the environmental, research, and health promotion chapters highlights the latest information in these areas.

Level Up Your Law Practice-Jeremy W Richter 2020-03-17 Level Up Your Law Practice lays the foundation for grounding a healthy mindset in practical business realities, so you can apply these principles to your law practice and build a vibrant business that serves both you and your clients. A healthy mindset gives you defensive measures to absorb criticism and manage your fears, and provides the foundation on which you can build a successful law practice. Progressive and sustainable business practices enable you to go on the offensive and build the practice you want. And having strong relationships with your clients gives you the leverage to take your practice to the next level. Level Up Your Law Practices gives you tools in each of these areas to become the lawyer you want to be and have a successful law practice. "Success begins with a success-oriented mindset. Jeremy understands and explains that successful lawyers are first and foremost confident, self-possessed, driven, and have grit and hustle. Anyone can teach you how to take a better deposition. Some can teach you how to be a better lawyer. Jeremy teaches you to have gravitas." - Frank Ramos, author of The Practice and Process of Law

Assessing the Reliability of Computer-Processed Data-Nancy Kingsbury 2011-04 Computer-processed data (CPD) from outside sources are often central to audit reports. Because assessing CPD requires more technical tests, it may seem that such data are subject to a higher standard of testing than other evidence. This is not the case. For ex., we apply the same tests of sufficiency and appropriateness that we apply to other types of evidence, but in assessing CPD, we focus on one test in the evidence standard -- appropriateness -- which includes validity and reliability, which in turn includes the completeness and accuracy of the data. This guide provides a flexible, risk-based framework for data reliability assessments that can be geared to the circumstances of each audit. Illus. This is a print on demand edition of an important, hard-to-find report.
