The Fifth Discipline-Peter M. Senge 2010-03-31 Completely Updated and Revised This revised edition of Peter Senge's bestselling classic, The Fifth Discipline, is based on fifteen years of experience in putting the book's ideas into practice. As Senge makes clear, in the long run the only sustainable competitive advantage is your organization's ability to learn faster than the competition. The leadership stories in the book demonstrate the many ways that the core ideas in The Fifth Discipline, many of which seemed radical when first published in 1990, have become deeply integrated into people's ways of seeing the world and their managerial practices. In The Fifth Discipline, Senge describes how companies can rid themselves of the learning "disabilities" that threaten their productivity and success by adopting the strategies of learning organizations—ones in which new and expansive patterns of thinking are nurtured, collective aspiration is set free, and people are continually learning how to create results they truly desire. The updated and revised Currency edition of this business classic contains over one hundred pages of new material based on interviews with dozens of practitioners at companies like BP, Unilever, Intel, Ford, HP, Saudi Aramco, and organizations like Roca, Oxfam, and The World Bank. It features a new Foreword about the success Peter Senge has achieved with learning organizations since the book's inception, as well as new chapters on Impetus (getting started), Strategies, Leaders' New Work, Systems Citizens, and Frontiers for the Future. Mastering the disciplines Senge outlines in the book will: • Reignite the spark of genuine learning driven by people focused on what truly matters to them • Bridge teamwork into macro-creativity • Free you of confining assumptions and mindsets • Teach you to see the forest and the trees • End the struggle between work and personal time

The Fourth Industrial Revolution-Klaus Schwab 2017 In the bestselling tradition of The Fred Factorand What the CEO Wants You to Know, bestselling author and quality guru Subir Chowdhury (The Power of Six Sigma), tackles a question that has haunted him in his consulting work with companies for years. Why is it that some companies improve 50x, while others improve only incrementally? The ideas and training, after all, is the same. What is the difference? That is the question he tackles in this compelling and empowering new book. In The Difference, Subir Chowdhury looks at what distinguishes a company that adopts his quality training processes, and improves 5x, versus a company that adopts the same training and consulting, but increases their profits and quality 50x. The difference, he claims, is this short, engaging, and insightful book, is the people in your workplace, on your staff, in your executive offices. The best processes and training programs in the world will not lead to world-class operations, unless a company first looks to the people who make up their workforce. Only by creating a "caring mindset" -- a culture built upon straightforwardness, honest and openness; a management structure that thinks about the concerns of their people; a workplace that inspires accountability and engagement; and managers and employees who tackle the challenges they face with perseverance and resolve, can companies flourish and excel.
