Land Rover Emergency Vehicles-James Taylor 2018-09-18 This book is both an historic and nostalgic look at the role of the Land Rover in the emergency services over the last 70 years. Land Rover products have been used by the emergency services almost from the moment the first Land Rover left the factory in 1948. Their agility and size made them an immediate hit with fire services, where they initially became popular as factory fire tenders. Their cross-country ability and versatility then attracted police forces, especially outside Britain, and when long-wheelbase models provided extra space, they also became favourites for ambulance conversions. Some emergency-service conversions required very little adaptation, and were carried out in the workshops of the end-users. Others - such as six-wheel Range Rover fire tenders - required major alterations from the factory-standard vehicle. Meanwhile, specialist companies developed dedicated ambulance and fire tender bodywork, creating a fascinating variety of different types. Some of these conversions, such as police patrol vehicles, went on to become part of the background to everyday life. Others are much less well known, and have their own special interest. All of them help to illustrate the versatility and adaptability of Land Rovers and their more modern SUV siblings. Land Rover Emergency Vehicles will interest Land Rover enthusiasts and emergency-vehicle enthusiasts alike, and many of the types illustrated will evoke nostalgic memories of these vehicles in their heyday.

Report on the Affairs of Phoenix Venture Holdings Limited, MG Rover Group Limited and 33 Other Companies-Gervase MacGregor 2009 MG Rover Group Limited (MGRG) went into administration on 8 April 2005. On 31 May 2005 inspectors were appointed by the Secretary of State for Trade and Industry to investigate the affairs of Phoenix Venture Holdings (MGRG's ultimate parent company), MGRG, 32 other companies in the Group and MGR Capital Limited. This report addresses the period between the acquisition of MGRG by Techtronic Limited in 2000 and MGRG's entry into administration in 2005. It pays particular reference to the events leading up to the appointment of administrators of MGRG in April 2005 and the matters raised in a review of financial statements by the Financial Reporting Review Council (the FRRP review is included in the report as an exhibit). The inspectors criticise the unreasonably large financial awards to the four members of the Phoenix Consortium and the chief executive of MGRG. This report has been informed by documentary and computer evidence from numerous sources, including data from the Group's Longbridge site and national sales companies. 95 individuals were interviewed formally and 20 witness statements provided; all of these responses have been considered in this report.

Support to High Intensity Operations-Great Britain. National Audit Office 2009 The provision of support for troops in Iraq and Afghanistan is made more difficult because they operate in remote locations and harsh conditions. Despite the challenging operational environments, the Ministry of Defence (MOD) has successfully delivered around 300,000 personnel and 90,000 tonnes of freight to Iraq and Afghanistan over the last two years. However, it has not consistently met its targets for delivering supplies in a timely fashion. The MOD is taking measures to improve the effectiveness of its supply chain; and the amount of time a unit waits for items to be delivered has reduced by half in Afghanistan and a third in Iraq. £4.2 billion has been approved to upgrade or buy new equipment to meet urgent requirements in the two theatres. The NAO found that the availability of this equipment has generally met or exceeded targets, though there have been spares shortages with some fleets particularly when the vehicle is used for a different purpose than intended. The availability and serviceability of helicopters has exceeded MOD targets, although prioritisation of spare parts for operations has led to reduced availability in the UK. There are also shortages of equipment for Service personnel in the UK to train with, prior to deployment overseas. Accommodation, medical and welfare services to Service personnel on operations are generally satisfactory although provision at the smaller patrol bases is more basic. The helicopter borne Medical Emergency Response Teams provide quick, life-saving medical support to casualties and evacuate them speedily to hospital.
