Beyond the Label-Karen L. Schiltz PhD 2011-09-29 When a child is struggling with a learning disability or behavioral disorder, it can be overwhelming for their parents, who often do not know what to do or where to turn for help. This groundbreaking book is a "must have" for any parent, educator, or person who cares for and wants to help children who face challenges in school. It will help you to recognize the warning signs that may indicate a potential problem with a child and explain how to find the best help. This superb guide shows you how to obtain the necessary assessment(s) that will help you to better understand a child's strengths and weaknesses. It also describes what an educational "accommodation" is and how it can serve as a bridge to learning. Every child has the legal right to fully access the learning environment and to show what they truly know when taking tests. The authors describe how accommodations specifically target a child's weaknesses in order to level the playing field in the classroom and during test taking situations. Accommodations can be as simple as giving the child extra time to finish a test or allowing them to take a test in a smaller group to minimize distractions. In addition, this handbook outlines the relevant research to help you understand the big picture of a child's learning and emotional needs. The authors offer extensive discussion of issues such as attention and concentration, memory, executive functioning, language, visual perception and processing, emotional functioning, and social skills. Throughout, they stress that, by focusing on behaviors and not labels, you will be able to better understand the whats, whys, and hows of a child's learning and emotional challenges.

Ace the GMAT-Brandon Royal 2016-01-01 ACE THE GMAT is based on a simple but powerful observation: Test-takers who score high on the GMAT exam do so primarily by understanding how to solve a finite number of the most important, recurring problems that appear on the GMAT. What are these important, recurring problems? The answer to this question is the basis of this book. This manual provides in-depth analysis of over 200 all-star problems that are key to mastering the seven major GMAT problem types including Problem Solving, Data Sufficiency, Sentence Correction, Critical Reasoning, Reading Comprehension, Analytical Writing, and Integrated Reasoning. Apart from providing readers with answers and full explanations, a special feature of this book is that each problem is categorized by type ("classification"), rated by difficulty level ("chili rating"), and supplemented with a problem-solving strategy ("snapshot"). "Chance favors the prepared mind." Whether you're a candidate already enrolled in a test-prep course or are undertaking self-study, this guidebook will serve as a rigorous skill-building study guide to help you conquer the math, verbal, analytical writing, and integrated reasoning sections of the exam. Studying for the math and verbal sections of the GMAT exam requires some 100 hours of study time. This book's content is conveniently divided into topics, which require two to three hours of study time per day. Total study time will vary between 80 to 120 hours for the entire 40 days.
