Beyond the Obvious-Phil McKinney 2012-02-07 The Killer Questions Your Company Should Be Asking Generating and executing great ideas is the key to staying ahead in a rapidly changing world. It seems so basic. Why is it so hard to actually get right? According to innovation expert Phil McKinney, the real problem is that we're teaching people to ask the wrong questions about their businesses--or none at all. There has to be a better way. In Beyond the Obvious, McKinney will help you use his proven FIRE (Focus, Ideation, Rank, Execution) Method to dig deeper and get back to asking the right questions--the ones all companies must ask to survive. Full of real-world examples, this book will change the way you operate, innovate, and create, and it all begins with battle-tested questions Phil has gathered on note cards throughout his career. Shared for the first time here, these "Killer Questions" include: What are the rules and assumptions my industry operates under? What if the opposite were true? What will be the buying criteria used by my customer in 5 years? What are my unshakable beliefs about what my customers want? Who uses my product in ways I never anticipated? These questions will reframe the way you see your products, your customers, and the way the two interact. Whether you're a company of thousands or a lean startup, Beyond the Obvious will give you the skills and easy-to-follow plan you need to make both the revolutionary changes and nuanced tweaks required for success. Praise for Beyond the Obvious "Human beings are creatures of habit, so getting ourselves and our teams to think beyond the obvious is a challenge we face all the time. Phil McKinney is an innovation expert, and his killer questions and hit-the-spot anecdotes provide a great way to get out in front of opportunities we otherwise won't see." --Geoffrey Moore, author of Crossing the Chasm and Escape Velocity "I've always believed that asking the right questions is the essence of design. Phil McKinney proves that point with this wonderful set of killer questions that will jumpstart-or greatly enhance- your innovation efforts." --B. Joseph Pine II, co-author, The Experience Economy & Infinite Possibility. "Product Innovation is a prerequisite to building great brands. Phil's questions are a prerequisite to building innovative products." --Satjiv S. Chahil, former global marketing chief, Apple

That's a Very Good Question!-Dan Marler 2012-05-30 Pastors are asked lots of questions about the Christian faithin fact, they are asked some very good questions. Like these: What convinces you that there is a God? Can God do anything? Whats the difference between blind faith and reasonable faith? Whats the point of praying? Can you explain Gods timing? How can someone who has been really hurt extend Gods grace? This book provides answers to these tough questions and many others as Dan takes a look at some of the more interesting and difficult questions that he has been asked in his many years of pastoral ministry and offers answers that are biblically sound, understandable, witty, and encouraging. Youve probably asked some of these very good questions yourself.

More Good Questions-Marian Small 2015-04-26 We know that Differentiated Instruction helps all students to learn. Yet DI challenges teachers, and nowhere more than in mathematics. In this new book, written specifically for secondary mathematics teachers, the authors cut through the difficulties with two powerful and universal strategies that teachers can use across all math content: Open questions and Parallel tasks. Showing teachers how to get started and become expert with these strategies, this book also demonstrates how to use more inclusive learning conversations to promote broader student participation. Strategies and examples are organized around Big Ideas within the National Council of Teachers of Mathematics (NCTM) content strands. With particular emphasis on Algebra, chapters also address Number and Operations, Geometry, Measurement, and Data Analysis and Probability, with examples included for Pre-Calculus.

Great Answers to Difficult Questions about Sex-Linda Goldman 2010-02-15 What does sex mean? Where do babies come from? Why is my body changing? Sex is never an easy subject for discussion and adults often struggle to find the right words when talking about it with children. This book explores children's thoughts and feelings on the subject of sex and provides parents and other caring adults with guidance on how to respond to difficult questions. The author explores some of the most common questions children ask about sex and provides sensitive yet candid answers, phrased in a way that children will be able to understand and relate to. Each chapter is devoted to a particular issue, such as how babies are made, relationships, and the differences between boys and girls. The book recognizes the emotions and reactions of children and family members and includes separate conclusions for adults and children. This guide offers useful advice for parents and carers and will also be of interest to counsellors and other professionals working with children.

Who Made God?-Ravi Zacharias 2009-05-26 In the quest for the truth, you need to know what you believe and why you believe it. Who Made God? offers accessible answers to over 100 commonly asked apologetic questions. Bringing together the best in evangelical apologists, this guide is standard equipment for Christians who want to understand and talk about their faith intelligently. Part one answers tough questions about the Christian faith such as: • Who made God? • How can there be three persons in one God? • What is God's ultimate purpose in allowing evil? • Where did the universe come from? • How long are the days of creation in Genesis? • Did Jesus rise from the dead? • Are the records of Jesus' life reliable? • Does the Bible have errors in it? Part two answers tough questions about other faiths, including Islam, Mormonism, Hinduism, Transcendental Meditation, Yoga, Reincarnation, Buddhism, and Black Islam. Relevant stories, questions for reflection and discussion, and a comprehensive list of suggested resources help you dig deeper so you can be prepared to give careful answers that explain the reasons for your faith.

That's a Great Answer!-Nancy N. Boyles 2007 How can teachers get great answers to open-ended comprehension questions from the students who need help the most? K-3, ELL, and struggling older students. Nancy Boyles supplies the solution. She begins with the foundations of a great answer: great objectives, books, instruction, and discussions—and adds valuable guidance on assessment. Her ready-to-go student scaffolds then break down the National Assessment of Educational Progress (NAEP) objectives into 40 specific, measurable, open-ended comprehension questions that can be correlated with the literacy objectives of any state. Each question includes: teaching tips; a bibliography of fiction/nonfiction picture books aligned with the question; a worksheet with the reading and writing strategy; and an answer frame scaffold for initial response practice. Included CD has scaffolds and an extensive master bibliography

organized alphabetically that matches key fiction/nonfiction literature models with appropriate comprehension questions.

Alive and Well at the End of the Day-Paul D. Balmert 2011-09-20 Proven strategies and tactics that you can use to lead workers to safety Industrial facilities supervisors, from front-line managers to CEOs, can depend on Alive and Well at the End of the Day for tested and proven management and leadership practices that ensure the safety of their workers. With more than thirty years of hands-on experience in the chemical industry, including front-line management, author Paul Balmert understands the challenges facing supervisors in industrial facilities. His advice, based on firsthand experience, shows you how to identify and correct flaws in industrial practices. Moreover, he shows you how to lead by example, overcoming all obstacles that interfere with safety. Rather than focus on theory, this book offers concrete strategies and tactics that enable you to: Recognize and capitalize on the moments when workers are most receptive to learning safety Discover what's really going on when you tour and inspect plant operations Engage in a helpful discussion with someone who is not following safety guidelines Understand the various types of risk involved in an industrial operation Implement a comprehensive strategy to manage and minimize risk Throughout the book, plenty of case studies and examples illustrate key challenges alongside step-by-step solutions. You'll also learn how to understand and leverage the psychology and motivations of your staff in order to fully implement safety practices and procedures. In short, with this book as your guide, you will be equipped and ready to lead your staff to safety.

Clinical Simulation-Richard Kyle 2010-07-27 Simulation facilities are invaluable for training in medicine and clinical education, biomedical engineering and life sciences. They allow the practice of prevention, containment, treatment, and procedure in a risk-free setting. This book is a practical guide and reference to the latest technology, operations and opportunities presented by clinical simulation. It shows how to develop and make efficient use of resources, and provides hands-on information to those tasked with setting up and delivering simulation facilities for medical, clinical and related purposes, and the development and delivery of simulation-based education programs A step-by-step manual to developing successful simulation programs Shows how to design, construct, outfit and run simulation facilities for clinical education and research. The Residency Review Committee of the US Accreditation Council on Graduate Medical Education has begun requiring residency programs to have simulation as an integral part of their training programs.

Doing Health Anthropology-Christie W. Kiefer, PhD 2006-11-20 What is the relationship between health, human nature, and human needs? The impact of social change on communities? The processes by which communities confront and overcome their health problems? How do we study these health questions in new communities and become advocates for change? These are critical questions in confronting the social causes of ill health, yet many health students do not have the appropriate training in the anthropological methods and techniques that help answer them. Christie Kiefer has written Doing Health Anthropology to prompt students to enter the community already prepared in these methods so that they can accurately ask and solve these important questions themselves. Using this book as a guide, students learn to integrate cultural anthropology with health science and come to their own conclusions based on field research. The book includes common pitfalls to avoid when conducting interviews and observations, and ways to formulate and answer research questions, maintain field notes and other records, and correctly analyze qualitative data. With the help of this text, practitioners and students alike will be able to integrate cultural anthropology methods of research into their health science investigations and community health initiatives. For news and to learn more about how you can implement a community approach to building global health and social justice, visit

How to Live-Sarah Bakewell 2010-10-19 Winner of the 2010 National Book Critics Circle Award for Biography How to get along with people, how to deal with violence, how to adjust to losing someone you love—such questions arise in most people's lives. They are all versions of a bigger question: how do you live? How do you do the good or honorable thing, while flourishing and feeling happy? This question obsessed Renaissance writers, none more than Michel Eyquem de Montaigne, perhaps the first truly modern individual. A nobleman, public official and wine-grower, he wrote free-roaming explorations of his thought and experience, unlike anything written before. He called them "essays," meaning "attempts" or "tries." Into them, he put whatever was in his head: his tastes in wine and food, his childhood memories, the way his dog's ears twitched when it was dreaming, as well as the appalling events of the religious civil wars raging around him. The Essays was an instant bestseller and, over four hundred years later, Montaigne's honesty and charm still draw people to him. Readers come in search of companionship, wisdom and entertainment—and in search of themselves. This book, a spirited and singular biography, relates the story of his life by way of the questions he posed and the answers he explored. It traces his bizarre upbringing, youthful career and sexual adventures, his travels, and his friendships with the scholar and poet Étienne de La Boétie and with his adopted "daughter," Marie de Gournay. And we also meet his readers—who for centuries have found in Montaigne an inexhaustible source of answers to the haunting question, "how to live?"

Alpha Teach Yourself Business Plans in 24 Hours-Michael Miller 2001 A step-by-step guide to researching, creating, writing and presenting a successful business plan.

The Right to Justification-Rainer Forst 2011-12-27 Contemporary philosophical pluralism recognizes the inevitability and legitimacy of multiple ethical perspectives and values, making it difficult to isolate the higher-order principles on which to base a theory of justice. Rising up to meet this challenge, Rainer Forst, a leading member of the Frankfurt School's newest generation of philosophers, conceives of an "autonomous" construction of justice founded on what he calls the basic moral right to justification. Forst begins by identifying this right from the perspective of moral philosophy. Then, through an innovative, detailed critical analysis, he ties together the central components of social and political justice freedom, democracy, equality, and toleration and joins them to the right to justification. The resulting theory treats "justificatory power" as the central question of justice, and by adopting this approach, Forst argues, we can discursively work out, or "construct," principles of justice, especially with respect to transnational justice and human rights issues. As he builds his theory, Forst engages with the work of Anglo-American philosophers such as John Rawls, Ronald Dworkin, and Amartya Sen, and critical theorists such as Jürgen Habermas, Nancy Fraser, and Axel Honneth. Straddling multiple subjects, from politics and law to social protest and philosophical conceptions of practical reason, Forst brilliantly gathers contesting claims around a single, elastic theory of justice.

e-Learning by Design-William Horton 2011-12-14 Since the first edition of E-learning by Design, e-learning has evolved rapidly and fringe techniques have moved into the mainstream. Underlying and underwriting these changes in e-learning are advances in technology and changes in society. The second edition of the bestselling book E-Learning by Design offers a comprehensive look at the concepts and processes of developing, creating, and implementing a successful e-learning program. This practical, down-to-earth resource is filled with clear information and instruction without oversimplification. The book helps instructors build customized e-learning programs from scratch—building on core principles of instructional design to: develop meaningful activities and lessons; create and administer online tests and assessments; design learning games and simulations; and implement an individualized program. "Every newcomer to the field will find this edition indispensable, while professionals will find much needed contemporary information to manage the rapid changes happening in our field. Even if you own the first edition, buy this update as soon as possible." —Michael W. Allen, CEO of Allen Interactions, Inc.; author, Michael Allen's e-Learning Library Series "Covers the full range of options for presenting learning materials online—including designing useful topics, engaging activities, and reliable tests—and it takes into account the realities and issues of today's instructional designers, such as social learning and mobile learning." —Saul Carliner, associate professor, Concordia University; author, The E-Learning Handbook "Horton nails it! Perfectly timed, robust, and practical, this second edition of brings together the latest strategies for learning without losing its critical premise—technology enables e-learning, but great design makes it work." —Marc J. Rosenberg, e-learning strategist; author, Beyond E-Learning "An e-learning encyclopedia loaded with detailed guidelines and examples ranging from basic instructional design techniques to the latest applications in games, social media, and mobile-learning. A essential reference for anyone involved in e-learning design, development, or evaluation" —Ruth Colvin Clark, author, e-Learning and the Science of Instruction

The Other Side of Suicide-Robert Colacurcio 2015-01-21 I write this book in a social milieu where telecommunications can make a very private act globally public in a moment. A question I don't consider is whether and to what extent the publicity attendant on a potential suicide inclines one toward or against the follow through. I suspect that it figures in, but what it amounts to in the end differs widely in each case. What I do have in mind is a rather full discussion and consideration of a host of questions I don't hear being asked in the discussion of suicide today. In fact, I find the comments from most media talking heads to be either sincerely trite or politely banal. But then, one shouldn't expect an in depth exploration of any side of the suicide question from the popular media. Where one should expect a more thorough investigation, however, is from the spokespeople representing our culture's philosophical and theological traditions. What I hear most often has been said before, often in a context where the authoritative spokesmen for the Church issue blanket condemnations backed up by the written codes of civil law, canon law, moral law or natural law. Authorization for this outright condemnation of suicide, ipso facto, has always been backed up by law of some kind and its interpretation to the people in the pew or the public at large.
