Nothing More Dangerous-Allen Eskens 2019-11-12 Missouri native Allen Eskens' "stunning small-town mystery" (New York Times Book Review) is a necessary exploration of family, loyalty, and racial tension in America and "a coming-of-age book to rival some of the best, such as Ordinary Grace" (Library Journal, starred review). In a small Southern town where loyalty to family and to "your people" carries the weight of a sacred oath, defying those unspoken rules can be a deadly proposition. After fifteen years of growing up in the Ozark hills with his widowed mother, high-school freshman Boady Sanden is beyond ready to move on. He dreams of glass towers and cityscapes, driven by his desire to be anywhere other than Jessup, Missouri. The new kid at St. Ignatius High School, if he isn't being pushed around, he is being completely ignored. Even his beloved woods, his playground as a child and his sanctuary as he grew older, seem to be closing in on him, suffocating him. Then Thomas Elgin moves in across the road, and Boady's life begins to twist and turn. Coming to know the Elgins -- a black family settling into a community where notions of "us" and "them" carry the weight of history -- forces Boady to rethink his understanding of the world he's taken for granted. Secrets hidden in plain sight begin to unfold: the mother who wraps herself in the loss of her husband, the neighbor who carries the wounds of a mysterious past that he holds close, the quiet boss who is fighting his own hidden battle. But the biggest secret of all is the disappearance of Lida Poe, the African-American woman who keeps the books at the local plastics factory. Word has it that Ms. Poe left town, along with a hundred thousand dollars of company money. Although Boady has never met the missing woman, he discovers that the threads of her life are woven into the deepest fabric of his world. As the mystery of her fate plays out, Boady begins to see the stark lines of race and class that both bind and divide this small town -- and he will be forced to choose sides. Education for Global Leadership-Committee for Economic Development. Research and Policy Committee 2006 As we begin the twenty-first century, technological, economic, political, and social forces have created a new era. Technological advancements and lower trade barriers have paved the way for the globalization of markets, bringing intense competition to the U.S. economy. Political systems and movements around the world are having a profound impact on our national security, as well as on our human security. The increasing diversity of our workplaces, schools, and communities is changing the face of our society. To confront the twenty-first century challenges to our economy and national security, our education system must be strengthened to increase the foreign language skills and cultural awareness of our students. America's continued global leadership will depend on our students' abilities to interact with the world community both inside and outside our borders. In this executive summary, the Committee for Economic Development recommends that (1) international

content should be taught across the curriculum and at all levels of learning, to expand American students' knowledge of other countries and cultures; (2) expand the training pipeline at every level of education to address the paucity of Americans fluent in foreign languages, especially critical, less commonly taught languages; and (3) national leaders--political leaders, as well as the business and philanthropic communities, and the media--should inform the public about the importance of improving education in foreign languages and international studies. Reform in School Mathematics and Authentic Assessment-Thomas A. Romberg 1995-01-01 Today new ways of thinking about learning call for new ways for monitoring learning. Reform in School Mathematics builds from the vision that assessment can become the bridge for instructional activity, accountability, and teacher development. It places teachers in key roles while developing the theme that we cannot reform the way in which school mathematics is taught without radically reforming the ways the effects of that teaching are monitored. Among others, this volume addresses the issues of the specification of performance standards, the development of authentic tasks, the measure of status and growth or a combination, the development of psychometric models, and the development of scoring rubrics. The new models proposed in this book give teachers a wealth of nontraditional assessment strategies and concrete ways to obtain measures of both group and individual differences in growth.

Unequal Freedom-Evelyn Nakano GLENN 2009-06-30 The inequalities that persist in America have deep historical roots. Evelyn Nakano Glenn untangles this complex history in a unique comparative regional study from the end of Reconstruction to the eve of World War II. During this era the country experienced enormous social and economic changes with the abolition of slavery, rapid territorial expansion, and massive immigration, and struggled over the meaning of free labor and the essence of citizenship as people who previously had been excluded sought the promise of economic freedom and full political rights. After a lucid overview of the concepts of the free worker and the independent citizen at the national level, Glenn vividly details how race and gender issues framed the struggle over labor and citizenship rights at the local level between blacks and whites in the South, Mexicans and Anglos in the Southwest, and Asians and haoles (the white planter class) in Hawaii. She illuminates the complex interplay of local and national forces in American society and provides a dynamic view of

how labor and citizenship were defined, enforced, and contested in a formative era for white-nonwhite relations in America.

Psychological, Emotional, Social and Cognitive Aspects of Implantable Cardiac Devices-Riccardo Proietti 2017-07-20 Electrical therapy of the heart has rapidly evolved over recent years with the development of the cardiac implantable defibrillator and the application of the cardiac resynchronization therapy to improve performance of the congestive failed heart. There is an impressive amount of literature produced to assess the efficacy and effectiveness of the electrical therapy. New technology is continuously introduced into the market for the treatment of electrical heart disease with optimized performance and implemented design, with approximately 600,000 new pacemakers implanted each year. Attention of the electrophysiology community has mainly focused on the biomedical aspects of electrical therapy, but the psychological, emotional, social and cognitive aspects of the implantable devices has been largely overlooked. Health-related quality of life (QoL) and, to a lesser extent, psychological disorders, i.e. anxiety and depression, have rarely been assessed as outcomes in clinical trials, and results are pointing towards the impact of the implantable devices on QoL and mental health not being direct but moderated and mediated by several biomedical as well as psychosocial variables. Furthermore, the cognitive effects of the implantable devices have rarely been assessed in empirical studies, although cognitive impairment is largely associated with the heart disorders that require implantation of an electrical device and cognitive benefits are strongly expected from the therapy. The aim of this book is to collect, appraise and condense the results of all empirical studies that have investigated, even marginally, the relationships between the implantable devices and any psychological, emotional, social and cognitive dimension. This book is a cornerstone for all involved in device utilization (physicians, nurses, technicians, industry representatives) that need to understand this topic.

Inventing 'Easter Island'-Beverley Haun 2008-04-05 Easter Island, or Rapa Nui as it is known to its inhabitants, is located in the Pacific Ocean, 3600 kilometres west of South America. Annexed by Chile in 1888, the island has been a source of fascination for the world beyond the island since the first visit by Europeans in 1722 due to its intriguing statues and complex history. Inventing 'Easter Island' examines narrative strategies and visual conventions in the discursive construction of 'Easter Island' as distinct from the native conception of 'Rapa Nui.' It looks at the geographic imaginary that pervaded the eighteenth century, a period of overwhelming imperial expansion. Beverley Haun begins with a discussion of forces that shaped the European version of island culture and goes on to consider the representation of that culture in the form of explorer texts and illustrations, as well as more recent texts and images in comic books and kitsch from off the island. Throughout, 'Easter Island' is used as a case study of the impact of imperialism on the view of a culture from outside. The study hinges on three key points - an inquiry into the formation of 'Easter Island' as a subject; an examination of how the constructed space and culture have been shaped, reshaped, and represented in discursive spaces; and a discussion of cultural memory and how the constraints of foreign texts and images have shaped thought and action about 'Easter Island.' Richly illustrated and unique in its findings, Inventing 'Easter Island' will appeal to cultural theorists, anthropologists, educators, and anyone interested in the history of the South Pacific.
