author of *The Creative Habit* shares her secrets—from insight to action—for harnessing vitality, finding purpose as you age, and expanding one’s possibilities over the course of a lifetime in her newest New York Times bestseller *Keep It Moving*. At seventy-eight, Twyla Tharp is revered not only for the dances she makes—but for her astounding regime of exercise and nonstop engagement. She is famed for religiously hitting the gym each morning at daybreak, and utilizing that energy to propel her breakneck schedule as a teacher, writer, creator, and lecturer. This book grew out of the question she was asked most frequently: “How do you keep working?” *Keep It Moving* is a series of no-nonsense meditations on how to live with purpose as time passes. From the details of how she stays motivated to the stages of her evolving fitness routine, Tharp models how fulfillment depends not on fortune—but on attitude, possible for anyone willing to try and keep trying. Culling anecdotes from Twyla’s life and the lives of other luminaries, each chapter is accompanied by a small exercise that will help anyone develop a more hopeful and energetic approach to the everyday. Twyla will tell you what the beauty-fitness-wellness industry won’t: chasing youth is a losing proposition. Instead, *Keep It Moving* focuses you on what’s here and where you’re going—the book for anyone who wishes to maintain their prime for life.

Japan's Motorcycle Wars-Jeffrey W. Alexander 2009-01-01 For decades the crown jewels of Japan's postwar manufacturing industry, motorcycles remain one of Japan's top exports. Japan's Motorcycle Wars assesses the historical development and societal impact of the motorcycle industry, from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments that led to the massive wave of motorization sweeping the Asia-Pacific region today. Jeffrey Alexander brings a wealth of information to light, providing English translations of transcripts, industry publications, and company histories that have until now been available only in Japanese. By exploring the industry as a whole, he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced loyalties, technical disasters, and brutal competition.

Slow Burn - The Growth of Superbikes & Superbike Racing 1970 to 1988-Bob Guntrip 2020-04-14 Slow Burn tells how the superbike

racing motorcycle developed out of the road-going sports-tourer to become one of the most successful competitions in all forms of motorcycle sport. As well as offering world championship class competition in its own right, superbike racing has been a highly competitive training ground for grand prix riders as well as helping manufacturers, distributors and dealers develop and improve their motorcycles. Superbike racing is to the motorcycle industry what touring car or NASCAR competition is to the car world - race on Sunday, sell on Monday. All the big names were drawn into the sport during its formative years and have been there ever since - Honda, Kawasaki, Suzuki, Yamaha, Ducati and Aprilia have all used superbike racing to test their street bike designs. And some of the biggest riders in the sport - Wayne Gardner, Wayne Rainey, Kevin Schwantz and Eddie Lawson - all started out on big, unruly superbikes, learning how to power slide their way around the world's toughest tracks. It's all in superbike - and it's all in Slow Burn.

Plug-in Hybrids-Sherry Boschert 2006 A politically polarized America is coming together over a new kind of car—the plug-in hybrid that will save drivers money, reduce pollution, and increase US security by reducing dependence on imported oil. Plug-in Hybrids points out that, where hydrogen fuel-cell cars won't be ready for decades, the technology for plug-in hybrids exists today. Unlike conventional hybrid cars that can't run without gasoline, plug-in hybrids use gasoline or cheaper, cleaner, domestic electricity—or both. Although plug-in hybrids are not yet for sale, demand for them is widespread, coming from characters across the political spectrum, such as: • Chelsea Sexton, the automotive insider: working for General Motors, Sexton fought attempts to destroy the all-electric EV1 car and describes how car companies are resisting plug-in hybrids—and why they'll make them anyway. • Felix Kramer and the tech squad: Kramer started a nonprofit organization using the Internet to tap into a small army of engineers who built the first plug-in Prius hybrids. • R. James Woolsey, former CIA director and national security hawk: seeing the end of oil supplies looming, Woolsey is demanding plug-in hybrids to wean us from petroleum. Cautioning that the oil and auto companies know how to undermine the success of plug-in car programs to protect their interests, the book gives readers tools to ensure that plug-in hybrids get to market—and stay here.

quilt their fellow quilters trust them to preserve. Thirteen chapters explore important historical quilting moments, traditional and modern quilting themes, and the beginnings of the Rocky Mountain Quilt Museum and the Quilter's Newsletter magazine. Different council members researched, photographed, and recorded the most significant events, memories, quilters, and quilts that have influenced the progress of quilting in Colorado. Early Coloradans picked their own cotton, saved every scrap of used fabric, and made quilts from scratch to support their families and for therapy as they recovered from serious injuries and illnesses. Many of these sacred stitches are still works in progress and continue to illustrate what's important to these dedicated craftspeople.

The Challenge of Remaining Innovative-Sally H. Clarke 2009 "The contributors explore two main themes: the challenge of remaining innovative and the necessity of managing institutional boundaries in doing so. The book is organized into four parts, which move outward from individual firms; to networks or clusters of firms; to consultants and other intermediaries in the private economy who operate outside of the firms themselves; and finally to government institutions and politics. Six Men Built the Modern Auto Industry-Richard Alan Johnson 2005 This is the story of six extraordinary men who each built something

from nothing, redefined the automotive industry after World War II, and redirected its course for the future: Henry Ford II (visionary autocrat with an iron will), Shoichiro Honda (most successful automotive entrepreneur since Henry Ford I), Eberhard von Kuenheim (founder of the modern BMW), Lee Iacocca, Ferdinand Piech (builder of Volkswagen Group) and Robert Lutz (who left retirement at 70 and is still highly influential at General Motors). What made them special was the sheer volume of fundamental change they brought to the largest industry in the history of the world. They not only re-shaped the auto business, the six made a sizable dent in the societies they lived in. To a man they were great cognitive thinkers. Their minds worked with animal speed, even instinct speed. But more than anything these were brave and cantankerous souls who rode the waves of history. Each could see the future. They could just make it out-sometimes imperfectly, but could see it nonetheless. They took a business that had begun to mature and decline by the 1930s and found ways to make it fresh and whole again.- The compelling story of the global car business over the past half-century.- A lively and engaging narrative that recounts some times collaborative, sometimes archly antagonistic interactions among the men- Full of business revelations at the highest level, written by a journalist operating at the heart of the industry- Global appeal that shows how automotive groups in the USA, Europe and Asia have influenced each other- A business story interlaced with personal details that explains why the six were determined to be successful. --Publisher.

Driving Emissions to Zero. Are the Benefits of California's Zero Emission Vehicle Program Worth the Costs?- 2002 The Zero Emission Vehicle (ZEV) program is a controversial part of California's strategy for meeting federal air quality standards. The program has been significantly modified multiple times since it was adopted by the California Air Resources Board in 1990 and is currently being challenged in court. This report is an independent assessment of the costs and emission benefits of ZEVs and the other low-emission vehicles that manufacturers are allowed to use to meet ZEV program requirements. It reviews the program in the context of the overall strategy for reducing emissions in the greater Los

Angeles area and makes recommendations for reform. The analysis and results presented should be of interest to government agencies, environmental groups, and automakers involved in developing policies to improve air quality in California. California has made significant progress in improving air quality in many parts of the state. However, substantial reductions in emissions of non-methane organic gases (NMO(3) and oxides of nitrogen (NO_x) are still needed to meet federal standards in California's South Coast Air Basin by 2010, as required by the Clean Air Act. The South Coast Air Quality Management District (SCAQMD) and the California Air Resources Board (CARB) have adopted an aggressive strategy to reduce emissions. A controversial part of this strategy is the state's Zero Emission Vehicle (ZEV) program, which requires that auto manufacturers begin selling ZEVs starting in 2003. The ZEV program is a first step in achieving CARB.

Lincoln President-Elect-Harold Holzer 2008-10-21 One of our most eminent Lincoln scholars, winner of a Lincoln Prize for his Lincoln at Cooper Union, examines the four months between Lincoln's election and inauguration, when the president-elect made the most important decision of his coming presidency -- there would be no compromise on slavery or secession of the slaveholding states, even at the cost of civil war. Abraham Lincoln first demonstrated his determination and leadership in the Great Secession Winter -- the four months between his election in November 1860 and his inauguration in March 1861 -- when he rejected compromises urged on him by Republicans and Democrats, Northerners and Southerners, that might have preserved the Union a little longer but would have enshrined slavery for generations. Though Lincoln has been criticized by many historians for failing to appreciate the severity of the secession crisis that greeted his victory, Harold Holzer shows that the presidentelect waged a shrewd and complex campaign to prevent the expansion of slavery while vainly trying to limit secession to a few Deep South states. During this most dangerous White House transition in American history, the country had two presidents: one powerless (the president-elect, possessing no constitutional authority), the other paralyzed (the incumbent who refused to act). Through limited, brilliantly timed and crafted public statements, determined private letters, tough political pressure, and

personal persuasion, Lincoln guaranteed the integrity of the American political process of majority rule, sounded the death knell of slavery, and transformed not only his own image but that of the presidency, even while making inevitable the war that would be necessary to make these achievements permanent. Lincoln President-Elect is the first book to concentrate on Lincoln's public stance and private agony during these months and on the momentous consequences when he first demonstrated his determination and leadership. Holzer recasts Lincoln from an isolated prairie politician yet to establish his greatness, to a skillful shaper of men and opinion and an immovable friend of freedom at a decisive moment when allegiance to the founding credo "all men are created equal" might well have been sacrificed.
