How to Ace Your Behavioral Interview-Marie Lokmanyen 2013-07-09 In a behavioral interview, an employer has already determined what skills are needed in the person they (may) hire and will ask questions to discover if the candidate has those skills or not. Instead of asking how you would behave, they will ask how you did behave. The interviewer will want to know how you handled a situation, instead of what you might do in the future. Behavioral interview questions will be more pointed, more probing and more specific than traditional interview questions. While some job seekers see these questions, as diverse as they may be, as an intrusion into areas of privacy, the STAR method is being used widely throughout the USA to help assess a candidate's behavior and reaction to various (work) related situations.

How to Ace Your Online Course-Anthony Birch, Ph.d. 2014-08-12 By 2020, 50% of all college students in the U.S. will be taking at least one online course and they will be joined with millions more across the globe. This book is indispensable for traditional, first-time online students as well as for adult returning students and professionals pursuing online degrees. How to Ace Your Online Course shows you everything instructors want you to know for you to get the best grades in your online course. It is perfect for students taking any type of online course, including those enrolled in high school, A.A., B.A., M.A., or Ph.D. degree programs. Written by two Ph.D.'s with experience in online education at private non-profit, public non-profit, and for-profit universities, this book is much more than just a study guide. First, the authors take you behind the scenes in online education with a full and honest discussion of the economic conditions and educational theories that drive online education. Second, the authors help you with expert advice by describing how you should prepare for online education psychologically and by detailing the specific techniques you need to use to ensure the best grades. The book includes information revealed nowhere else, including the contractual duties of online instructors (why instructors are often required to help you), the grading techniques and tools instructors use, how to answer discussion questions in the formats that instructors look for, and how to work constructively in groups. Contrary to popular belief, most online instructors want to give students good grades, but many students sabotage their own education by failing to follow the best practices for online education. This book shows you how NOT to fail! Younger students may be fearful of the competitive environment in higher education. They fear losing scholarships if their grades fall. Older students may be attending school through corporate programs that reimburse full tuition — but only if the student receives an "A." Fear no more. This book has all the strategies you need to maximize your grades.

Each "card" lays out a concise, accessible explanation of why you want to make this shift and what background information you need to know. Then, it follows up with a real life assignment on how to apply this new knowledge and ends with a dead easy, crazy tasty recipe. While the spades, hearts, and clubs sections focus on food and eating habits, in the diamonds section you will find advice on sleeping better, reducing stress and anxiety, stretching, and many other aspects that will help round out a new healthier (and happier) lifestyle.
