The Death and Life of Great American Cities-Jane Jacobs 2016-07-20 Thirty years after its publication, The Death and Life of Great American Cities was described by The New York Times as "perhaps the most influential single work in the history of town planning....[It] can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the bitingly satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition.

Teaching and Learning Chinese as a Foreign Language-Janet Zhiqun Xing 2006-01-01 This book provides a research-based account of how to teach and learn Chinese as a foreign language. In addition to the discussion of relevant second/foreign language research, this volume gives detailed information on ways to develop a pedagogical model that is uniquely suited to teaching Chinese in five key areas: pronunciation (tones and pinyin), characters and words, sentences (when and why different sentence structures are used), discourse and pragmatic competence (coherence and genre), and cultural competence. Specially written for Chinese language teachers, student teachers and applied linguists, this is the first book written in English that systematically addresses all major aspects involved in teaching and learning Chinese as a foreign language. This book covers all the fundamental grammar elements in Chinese, explains their functions in discourse and communication, and explores different strategies for teaching and engaging students in learning the language.

Integrated Chinese-Tao-chung Yao 1997 "Ideal for: High school, college and adult learners with no prior knowledge of Chinese. This acclaimed, bestselling series is successful because it integrates all four language skills- listening, speaking, reading, and writing. Integrated Chinese helps you "

Chinese Link-Sue-mei Wu 2010-03-12 Chinese Link, 2e provides a practical, learner-centered and enjoyable language and cultural learning experience for beginning students of Chinese, as well as an efficient and comprehensive teaching resource for instructors. This best-selling text takes care to introduce and explain grammar points clearly and systematically, yet not in a fashion that would be overwhelming to beginners. In keeping with the communicative focus of the text, grammar points are related to communicative task-oriented content. The textbook presents both traditional (complex) and simplified versions of Chinese characters, since learners will encounter both forms during their course of study or in travel abroad. Photographs and drawings make the text vivid and eye-catching, and to provide

visual cues to aid in communicative exercises and activities. And the Video Program to accompany the "Language in Use" sections enhances the in-text dialogues by presenting them in authentic settings. This Books á la Carte Edition is an unbound, three-hole punched version of the textbook and provides students the opportunity to personalize their book by incorporating their own notes and taking only the portion of the book they need to class - all at an affordable price.

Leadership U-Gary Burnison 2020-06-24 Accelerating Through the Crisis Curve Leadership is all about others—inspiring them to believe, then enabling that belief to become reality. That’s the essence of Leadership U: it starts with ‘U’ but it’s not about ‘U.’ Those timeless words are timelier than ever today, as leaders look to accelerate through the crisis curve. As author Gary Burnison observes, “There will likely be more change in the next two years than we have seen in the last twenty.” Now, in Leadership U: Accelerating Through the Crisis Curve, Burnison lays out a framework—his “Six Degrees of Leadership”—to show leaders how to create change. Anticipate - foreseeing what lies ahead, amid ambiguity and uncertainty that are throttled up like never before Navigate - course-correcting in real time, to keep the organization on an even keel Communication - constantly connecting with others; the leader is both the messenger and the message Listen - breaking down the organizational hierarchy to gather insights at all levels—especially what the leader doesn’t want to hear Learn - applying learning agility, to “know what to do when you don’t know what to do” Lead - empowering others in a bottom-up culture that is more nimble, agile, innovative, and entrepreneurial than ever before. Only by embracing

these truths can leaders master another 'U'—the “crisis curve” that will completely disrupt the business landscape. The world has changed—forever. The old days are fine to reminisce about, but you can't stay there. Today leadership means becoming comfortable with being uncomfortable. As Burnison says, when a door closes, leaders cannot afford to stand there, staring at it. It's a “get up or give up” moment. For leaders, the only choice is to find and open another door. Leadership U defines and inspires the pathway through that door.

Teaching and Learning Chinese as a Second or Foreign Language-Ko-Yin Sung 2019-10-23 Teaching and Learning Chinese as a Second or Foreign Language, edited by Ko-Yin Sung, addresses three emerging themes in the field of Chinese language teaching and learning. (1) Increasingly ubiquitous in all language learning and teaching, and for the learning of Chinese as a second language in particular, information and communication technology (ICT) can serve as an important and effective tool. Several chapters focus on how certain emerging ICT tools are applied in teaching and learning Chinese as a second language. (2) Due to China's economic and political influence, the number of students of all ages studying Chinese as a second language—but especially young learners—has increased in many parts of the world. Despite this, the research into teaching Chinese to young learners has lagged behind. Several chapters investigate young learners' motivations and effective methods for assisting them to master the Chinese language. (3) The writing system of the Chinese language poses many challenges for learners, especially those more familiar with alphabetical languages. In light of this difficulty in learning Chinese characters, some of the chapters identify effective teaching and learning strategies to master the Chinese language.

Advances in Chinese as a Second Language-Nan Jiang 2014-03-17 This book is a collection of 13 empirical studies examining the acquisition and processing of Chinese as a second language. On the acquisition front, these studies explore the acquisition of structures such as the perfective marker *le*, *wh*-questions, *bei*- constructions, and bare nouns, and examine the factors that may affect acquisition such as learners' background, anxiety, and instruction. Processing studies cover topics such as the identification of Chinese tones, the recognition of characters, the processing of compounds and relative clauses, and the expression of motion events. Many of these studies represent pioneering and cutting-edge research on their respective topics, and all will be of interest to students and scholars who are interested in the study of acquisition and processing of Chinese as a second language.

Modeling and Role-Modeling-Helen Cook Erickson 2008-12 This extant nursing theory and paradigm is recognized by the American Holistic Nurses Association. It provides guidelines for nurses interested in application of a mind-body-spirit approach to client care. Modeling is the process of building a mirror image of the client's world. Role-modeling is the process of designing and implementing care that nurtures client growth and healing and facilitates clients fulfilling their personally chosen life-roles.

CultureShock! Shanghai-Sharol Gauthier 2019-09-15 CultureShock! Shanghai is the complete guide for those who are trying to get a handle on China's glittering crown jewel that is both charmingly ancient yet stunningly ultra-modern. Can you tell your *xiaolongbao* from your *xiaolongxia*? What is this nebulous concept called *guan xi*? Is being called a *laowai* a pejorative? Boasting some of the world's tallest buildings, largest businesses, longest bridges, fastest trains and elevators, and finest restaurants,

Shanghai is a megacity and world-class financial centre that may well be the world's first cashless society, but it also has cosy streets filled with napping bicyclists, dancers in full costume and seniors with bird cages. With impressive light shows, backlit freeways and luminous skylines, Shanghai is truly a city of light. Get the most out of your stay with this guide to the Asian metropolis par excellence. The Series CultureShock! is a dynamic, indispensable series of guides for travellers looking to truly understand the countries they are visiting, working in or moving to. Each title explains the country's customs, traditions and social and business etiquette in a lively, informative style. CultureShock! authors, all of whom have experienced the joys and pitfalls of cultural adaptation, are ideally placed to provide warm and helpful advice to those who seek to integrate seamlessly into diverse cultures.

The Chinese Language-Daniel Kane 2006-09-15 This is an introductory book about the history and contemporary usage of the Chinese language. Chinese is generally considered a difficult language. It is also a fascinating and important language that cannot be ignored. A growing number of English speakers are learning the Chinese language to the enrichment of their lives and the admiration of their friends. Chinese does, however, present a number of challenges. Written Chinese looks like a random set of stroke, dots and dashes. In its handwritten form, it looks like a series of undifferentiated squiggles. Spoken Chinese sounds like a rapid series of almost identical monosyllables with rising and falling intonations. This book is a contemporary introduction to the modern Chinese language as it is used in China during the first few years of the twenty-first century. China has changed so much and so dramatically over the past century, and indeed over the past twenty years, and these changes are reflected in the language. Textbooks written only twenty years ago are now quite quaint. Much information on the actual use of putonghua (Mandarin Chinese), the use of dialects or various romanization systems is now out of date. The aim of this book is to present current realities. China is a country with a long history, and to understand modern China we must know something of its past. The same applies to the language. Earlier stages of Chinese still have a deep influence on the current language, and we should at least be aware of such

influences. This book is not a language textbook for those wishing to learn Chinese. It does not try to teach the Chinese language. It is a book about Chinese. It has been written for people who are thinking of taking up Chinese and would like some insights into what they are letting themselves in for. As the Chinese strategist, Sunzi said, "zhi ji zhi bi, bai zhan bai sheng."—"Know yourself and know the other: a hundred battles, a hundred victories." The same applies to learning Chinese.

Integrated Chinese, 1, 2, 3-4 1997 "Ideal for: High school, college and adult learners with no prior knowledge of Chinese. This acclaimed, bestselling series is successful because it integrates all four language skills—listening, speaking, reading, and writing. Integrated Chinese helps you "

Migration Narratives-Stanton Wortham 2020-10-01 Migration Narratives presents an ethnographic study of an American town that recently became home to thousands of Mexican migrants, with the Mexican population rising from 125 in 1990 to slightly under 10,000 in 2016. Through interviews with residents, the book focuses on key educational, religious, and civic institutions that shape and are shaped by the realities of Mexican immigrants. Focusing on African American, Mexican, Irish and Italian communities, the authors describe how interethnic relations played a central role in newcomers' pathways and draw links between the town's earlier cycles of migration. The town represents similar communities across the USA and around the world that have received large numbers of immigrants in a short time. The purpose of the book is to document the complexities that migrants and hosts experience and to suggest ways in which policy-makers, researchers, educators and communities can respond intelligently to politically-motivated stories that oversimplify migration across the contemporary world. This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. It is funded by Boston College.

defined and bounded by schools, school boards and their communities, policy, teacher education, and academic research. Each contributing author was asked to comprehensively review the research literature in their assigned topic. These topics, however, are defined by practical places on the landscape e.g. schools and governmental policies for schools. Key Features:

- o Presents a different vision or re-conceptualization of the field
- o Provides a comprehensive and inclusive set of authors, ideas, and topics
- o Takes a global rather than North American parochial approach
- o Recognizes that curriculum and instruction is broader in scope than is suggested by university research and theory
- o Reflects post-1992 changes in curriculum policy, practice and scholarship
- o Represents a rethinking of how school subject matter areas are treated. Teacher education is included in the Handbook with the intent of addressing the role and place of teacher education in bridging state and national curriculum policies and curriculum as enacted in classrooms.

Plastic Free-Rebecca Prince-Ruiz 2020-12-08 In July 2011, Rebecca Prince-Ruiz challenged herself to go plastic free for the whole month. Starting with a small group of people in the city of Perth, the Plastic Free July movement has grown into a 250-million strong community across 177 countries, empowering people to reduce single-use plastic consumption and create a cleaner future. This book explores how one of the world's leading environmental campaigns took off and shares lessons from its success. From narrating marine-debris research expeditions to tracking what actually happens to our waste to sharing insights from behavioral research, it speaks to the massive scale of the plastic waste problem and how we can tackle it together. Interweaving interviews from participants, activists, and experts, Plastic Free tells the inspiring story of how ordinary people have created change in their homes, communities, workplaces, schools, businesses, and beyond. It is easy to feel overwhelmed in the face of global environmental problems and wonder what difference our own actions could possibly make. Plastic Free offers hope for the future through the stories of those who have taken on what looked like an insurmountable challenge and succeeded in innovative and practical ways, one step—and one piece of plastic—at a time.

The Traditional Chinese Medicine Formula Study Guide-Qiao Yi 1999-01-01

Studies in Second Language Acquisition of Chinese-Dr. ZhaoHong Han 2014-05-29 Interest in learning Chinese as an additional language has soared worldwide over the last ten years. Yet little is known about the learning process, and much less about what pedagogical strategies might facilitate or, otherwise, hinder it. This book thus aims to further understanding of the acquisition of Chinese as a foreign or second language. It brings together six independent studies which explore aspects of learning Chinese as an additional language across the domains of morphosyntax, pragmatics, cognitive capacity, interactional learning, and instructed learning via a variety of conceptual frameworks and methodological strategies. These studies, as well as the suggestions for future research, will be of great interest to second language acquisition researchers, graduate students and second language teachers of Chinese, as well as to curriculum developers and materials writers.
