Yardley 2013-05-11 During the 1920s Herbert O. Yardley was chief of the first peacetime cryptanalytic organization in the United States, the ancestor of today's National Security Agency. Funded by the U.S. Army and the Department of State and working out of New York, his small and highly secret unit succeeded in breaking the diplomatic codes of several nations, including Japan. The decrypts played a critical role in U.S. diplomacy. Despite its extraordinary successes, the Black Chamber, as it came to known, was disbanded in 1929. President Hoover's new Secretary of State Henry L. Stimson refused to continue its funding with the now-famous comment, "Gentlemen do not read other people's mail." In 1931 a disappointed Yardley caused a sensation when he published this book and revealed to the world exactly what his agency had done with the secret and illegal cooperation of nearly the entire American cable industry. These revelations and Yardley's right to publish them set into motion a conflict that continues to this day: the right to freedom of expression versus national security. In addition to offering an expose on post-World War I cryptology, the book is filled with exciting stories and personalities. The Quest for Artificial Intelligence-Nils J. Nilsson 2009-10-30 Artificial intelligence (AI) is a field within computer science that is attempting to build enhanced intelligence into computer systems. This book traces the history of the subject, from the early dreams of eighteenth-century (and earlier) pioneers to the more successful work of today's AI engineers. AI is becoming more and more a part of everyone's life. The technology is already embedded in face-recognizing cameras, speech-recognition software, Internet search engines, and health-care robots, among other applications. The book's many diagrams and easy-to-understand descriptions of AI programs will help the casual reader gain an understanding of how these and other AI systems actually work. Its thorough (but unobtrusive) end-of-chapter notes containing citations to important source materials will be of great use to AI scholars and researchers. This book promises to be the definitive history of a field that has captivated the imaginations of scientists, philosophers, and writers for centuries. Bureau of Business Research 1967 Bulletin of the Bureau of Agricultural Intelligence and of Plant-Diseases- 1910 Manorama Year Book- 2006 Strengthening Forensic Science in the United States-National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators. Intelligence-led Policing-Marilyn Peterson 2005 "Intelligence in today's policing environment must adapt to the new realities presented by terrorism and conventional crimes. These new realities require increased collaboration in information gathering and intelligence sharing. ... Intelligence-led policing is a collaborative enterprise based on improved intelligence operations and community-oriented policing and problem solving, which the field has considered beneficial for many years. To implement intelligence-led policing, police organizations need to reevaluate their current policies and protocols. Intelligence must be incorporated into the planning process to reflect community problems and issues. Information sharing must become a policy, not an informal practice. Most important, intelligence must be contingent on quality analysis of data. The development of analytical techniques, training, and technical assistance needs to be supported. ... This document identifies four levels of intelligence capabilities for state and local agencies. At each level, steps can be taken to help agencies incorporate intelligence-led policing strategies. These steps include adopting mission statements, writing intelligence policies and procedures, participating in information sharing, establishing appropriate security, and adopting legal safeguards to protect the public's privacy and civil liberties."--Executive Summary. Michigan Manufacturer & Financial Record- 1919 Act of Creation-Stephen C. Schlesinger 2009-04-24 In Act of Creation, Stephen C. Schlesinger tells a pivotal and little-known story of how Secretary of State Edward Stettinius and the new American President, Harry Truman, picked up the pieces of the faltering campaign initiated by Franklin Roosevelt to create a "United Nations." Using secret agents, financial resources, and their unrivaled position of power, they overcame the intrigues of Stalin, the reservations of wartime allies like Winston Churchill, the discontent of smaller states, and a skeptical press corps to found the United Nations. The author reveals how the UN nearly collapsed several times during the conference over questions of which states should have power, who should be admitted, and how authority should be divided among its branches. By shedding new light on leading participants like John Foster Dulles, John F. Kennedy, Adlai Stevenson, Nelson Rockefeller, and E. B White, Act of Creation provides a fascinating tale of twentieth-century history not to be missed. Papers of the Governors: 1871-1883-Pennsylvania.
