Introduction to Criminology-Pamela J. Schram 2017-02-13 Introduction to Criminology, Why Do They Do It?, Second Edition, by Pamela J. Schram Stephen G. Tibbetts, offers a contemporary and integrated discussion of the key theories that help us understand crime in the 21st century. With a focus on why offenders commit crimes, this bestseller skillfully engages students with real-world cases and examples to help students explore the fundamentals of criminology. To better align with how instructors actually teach this course, coverage of violent and property crimes has been integrated into the theory chapters, so students can clearly understand the application of theory to criminal behavior. Unlike other introductory criminology textbooks, the Second Edition discusses issues of diversity in each chapter and covers many contemporary topics that are not well represented in other texts, such as feminist criminology, cybercrime, hate crimes, white-collar crime, homeland security, and identity theft. Transnational comparisons regarding crime rates and the methods other countries use to deal with crime make this edition the most universal to date and a perfect companion for those wanting to learn about criminology in context.

The book: Discusses the methodologies of life-course and longitudinal research Explains and critiques the major theories of life-course criminology Considers the issues of risk, prediction, onset, persistence and desistance of criminal activity Draws on research from studies in Europe, the UK, US and Australia, including the Stockholm Life-Course Project Written by two leading figures in the field, this is an authoritative text that will guide you through your studies in life-course criminology, criminal career research, and developmental criminology. Introduction to Criminology-Anthony Walsh 2010-12-09 A unique text/reader that takes a comprehensive, interdisciplinary approach to the study of criminology Providing an affordable alternative to the standard textbook, this new edition of the authors' popular text/reader provides instructors and students the best of both worlds - authored text with carefully selected accompanying readings. Now thoroughly updated with new articles, new content, and new statistics, tables, and figures, this Second Edition provides an interdisciplinary perspective on crime and criminality that incorporates the latest theories, concepts, and research from sociology, psychology, genetics, evolutionary biology, and the neurosciences. The new edition is divided into 15 sections that mirror chapters in a typical criminology textbook. New to This Edition: A new Section 11 on Mass Murder and Terrorism makes coverage of these high-interest topics even more accessible. Section 10 now focuses only on murder, rape, robbery, aggravated assault, and domestic violence, making it easier for students to absorb the material. New articles appear in the structural theories section, the sections devoted to violent crime, and throughout the text/reader as needed. The authors now more closely link sections on types of crime to sections on theory to give readers a more cohesive understanding of the connections between the two. Contemporary criminologists' favored theories (drawn from a survey of 770 criminologists) now appear in a table to give readers insight into the professional opinion today on criminological theories. Features: Each Section has a 15-page introduction (a "mini-chapter") that contains vignettes, photos, tables and graphs, end-of-chapter questions, and Web exercises, followed by three to four supporting readings. Theory Section introductions contain a unique table that compares and contrasts the theories presented, while theory concluding sub-sections focus on policy and crime prevention. A "How to Read a Research Article" guide (which appears prior to the first reading) illustrates key aspects of a research article. The book's readings are drawn from carefully selected, edited journal articles appropriate for an undergraduate audience.

Introductory Criminology-Marcus Felson 2017-12-04 Introductory Criminology: The Study of Risky Situations takes a unique and intuitive approach to teaching and learning criminology. Avoiding the fragmentation of ideas commonly found in criminology textbooks, Marcus Felson and Mary A. Eckert develop a more

practical, readable structure that engages the reader and enhances their understanding of the material. Their descriptive categories, simultaneously broad and realistic, serve better than the usual philosophical categories, such as "positivism" and "classicism," to stimulate students' interest and critical thinking. Short chapters, each broken into 5-7 sections, describe situations in which crime is most likely to happen, and explain why they are risky and what society can and can't do about crime. They create a framework to organize ideas and facts, and then link these categories to the leading theories developed by criminologists over the last 100 years. With this narrative to guide them, students remember the material beyond the final exam. This fresh new text was created by two professors to address the main points they encounter in teaching their own criminology courses. Problems solved include: reluctant readers, aversion to abstract thinking, fear of theory, and boredom with laundry lists of disconnected ideas. Felson, a leader in criminology theory with a global reputation for innovative thinking, and Eckert, an experienced criminal justice researcher, are uniquely qualified to reframe criminology in a unified arc. By design, they offer abstractions that are useful and not overbearing; their prose is readable, and their concepts are easy to comprehend and remember. This new textbook challenges instructors to re-engage with theory and present the essence of criminological thought for adult learners, coaching students to grasp the concept before any label is attached and allowing them to emerge with deeper understanding of what each theory means and offers. Lean, with no filler or fluff like stock photos, *Introductory Criminology* includes the authors' graphics to crystallize and expand concepts from the text.

The Theoretical Foundations of Criminology-Jayne Mooney 2019-12-06 To confront the challenges criminologists face today and to satisfactorily critique the theories on which criminology is founded, we need to learn from the past. To do this we must give context to both theorist and theory. Written from a critical perspective, this book brings criminological theory to life. It presents the core theories of criminology as historical and cultural products and theorists as producers of culture located in particular places, writing in specific historical periods and situated in precise intellectual networks and philosophical controversies. This book illustrates that theory does not arise 'out of the blue' and highlights the importance of understanding how and why ideas emerge at certain points in time, why they gained currency and the influence that they have had. It follows the trajectory of criminology from pre-Enlightenment society through to the present day and the proliferation of criminological thinking. It explores: Setting the Stage for the Emergence of Criminology Classicist Criminology: The Search for Justice, Equality and the Rational 'Man' The Positivist Revolution, Physiognomy, Phrenology and the Science of 'Othering' Chicago School of Sociology: An Explosion of Ideas Developing a Sociological Criminology: Durkheim, Du Bois, Merton and Tannenbaum Feminism: Redressing the Gender Imbalance Confronting the Establishment: The Emergence of Critical Criminology From Theoretical Innovations to Political Engagement The Theoretical Foundations of Criminology provides an invaluable contribution to the growing conversation about criminology's 'origin story' and the level that this is grounded in the idiosyncrasies of the North Atlantic world and its historical development. This book will be invaluable reading to students and academics engaged in studies of criminology and criminal justice.

Criminology-Stephen E. Brown 2012-12-31 This highly acclaimed criminology text presents an up-to-date review of rational choice theories, including deterrence, shaming, and routine activities. It also incorporates current examples of deterrence research regarding domestic violence, drunk driving, and capital punishment, and features thought-provoking discussion of the relativity of crime. The authors explore the crime problem, its context, and causes of crime. The organization of the text reflects the fact that the etiology of crime must be at the heart of criminology. It examines contemporary efforts to redefine crime by focusing on family violence, hate crimes, white-collar misconduct with violent consequences, and other forms of human behavior often neglected by criminologists. Extensive discussion of evolving laws is included, and while the prevalence of the scientific method in the field of criminology is highlighted, the impact of ideology on explanations of crime is the cornerstone of the book. Comprehensive introductory textbook that looks at competing answers to the question, "Why do people commit crimes?" Student-friendly figures, features, highlights, and full-color photos. Each chapter includes learning objectives, discussion questions, and lists of key terms and concepts, key criminologists, and important legal cases.
