Silage production and utilisation-R.S. Park 2005-06-17 This book is essential reading for all those involved in forage conservation and provides a fascinating insight into current practices and the science underpinning forage conservation. Key subject areas include opportunities to enhance the fermentation process through crop manipulation prior to ensiling and the use of bacterial additives applied during ensiling. Latest developments in techniques for chemical and biological characterisation of silages are reviewed, including grass silage, alternative forages (whole crop wheat and maize silage) and tropical forages. The book also focuses on current developments in feeding of beef and dairy cattle with conserved forage with particular emphasis on factors influencing intake, digestion and animal performance.Overall this is an important reference book, which provides an excellent overview of current developments in forage conservation and utilization of conserved forage in animal production systems.
Metal Catalysts in Olefin Polymerization-Zhibin Guan 2009-03-31 Polyolefin is a major industry that is important for our economy and impacts every aspect of our lives. The discovery of new transition metal-based catalysts is one of the driving forces for the further advancement of this field. Whereas the classical heterogeneous Ziegler-Natta catalysts and homogeneous early transition metal metallocene catalysts remain the workhorses of the polyolefin industry, in roughly the last decade, tremendous progress has been made in developing non-metallocene-based olefin polymerization catalysts. Particularly, the discovery of late transition metal-based olefin polymerization catalysts heralds a new era for this field. These late transition metal complexes not only exhibit high activities rivaling their early metal counterparts, but more importantly they offer unique properties for polymer architectural control and copolymerization with polar olefins. In this book, the most recent major breakthroughs in the development of new olefin polymerization catalysts, including early metal metallocene and non-metallocene complexes and late transition metal complexes, are discussed by leading experts. The authors highlight the most important discoveries in catalysts and their applications in designing new polyolefin-based functional materials.
American Regional Cuisine-Art Institutes 2002-01-01 New England clam chowder . . . New Orleans gumbo . . . Southern fried green tomatoes . . . Texas barbecue . . . Each region of the United States has its own cuisine, with distinctive ingredients, techniques, and recipes. From north to south and from east to west, American Regional Cuisine explores this tremendous culinary diversity in a comprehensive cookbook and guide to the nation's cuisines. By placing each cuisine within its historical and cultural context, the book offers readers a deeper understanding of each cooking style and the qualities that make it unique. From the blue cornmeal and jalapeno peppers of the southwest to the zesty spices of Cajun cooking, it covers the indigenous ingredients whose flavor and character do so much to give dishes their special regional "accent." Two hundred delicious recipes-twenty for each type of cuisine-are introduced by well-known chefs and restaurateurs, including Bert Cutino (owner of The Sardine Factory, Monterey, California), Michael Foley (owner of Printer's Row, Chicago), and Allen Susser (owner and executive chef of Chef Allen's, Miami). The recipes are drawn from every part of the menu, from appetizers to desserts, and detailed instructions ensure that nothing is left to chance in the kitchen. Perfect for anyone who wants to learn how to cook "fluently" in the language of the nation's regional cuisines, this book will bring new variety and authenticity to any cooking repertoire.
Near-Infrared Spectroscopy in Food Science and Technology-Yukihiro Ozaki 2006-09-18 This reference gives food science professionals a working understanding of near-infrared spectroscopy (NIRS) and its role in maximizing food potential. It explains the technical aspects of NIRS, including: basic principles; characteristics of the NIR spectra; instrumentation; sampling techniques; and chemometrics. The book details applications of NIRS in agricultural and marine products, foodstuffs and processed foods, engineering and process monitoring, and food safety and disease diagnosis.

Optimising Sweet Taste in Foods-W J Spillane 2006-07-17 A sweet taste is often a critical component in a consumer's sensory evaluation of a food product. This important book summarises key research on what determines consumer perceptions of sweet taste, the range of sweet-tasting compounds and the ways their use in foods can be optimised. The first part of the book reviews factors affecting sweet taste perception. It includes chapters on how taste cells respond to sweet taste compounds, genetic differences in sweet taste perception, the influence of taste-odour and taste-ingredient interactions and ways of measuring consumer perceptions of sweet taste. Part two discusses the main types of sweet-tasting compounds: sucrose, polyols, low-calorie and reduced-calorie sweeteners. The final part of the book looks at ways of improving the use of sweet-tasting compounds, including the range of strategies for developing new natural sweeteners, improving sweetener taste, optimising synergies in sweetener blends and improving the use of bulk sweeteners. With its distinguished editor and international team of contributors, Optimising sweet taste in foods is a standard reference for the food industry in improving low-fat and other foods. Investigates what determines consumer perceptions of sweet taste Looks at improving the use of sweet-tasting compounds Explores strategies for delivering new natural sweeteners

The Tractor in the Haystack-Scott Garvey For the aficionado of farm equipment, or the scion of an old farming family nostalgic for the old days, or the grown-up boy who still loves a classic piece of old-time machinery, the vintage tractor can be a thrilling find like no other. This book tells dozens of stories of such discoveries, of the treasured old tractor parked in a shed since 1927, of the pristine model unearthed at an estate sale, of the broken-down old beauty stashed in a barn where generations of children have made their secret hideaways. These are the classic tractors that are often as hard to find as a needle in a haystack—but far more fun to discover, as all of these delightful stories make abundantly clear.

The First Americans-James Adovasio 2009-01-16 J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, The First Americans is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

NorFor -Harald Volden 2011-10-05 NorFor is a semi-mechanistic feed evaluation system for cattle, which is used by advisors in Denmark, Iceland, Norway and Sweden. This book describes in detail the system and it covers five main sections. The first is concerned with information on feed characteristics, feed analysis and feed digestion methods. The second section describes the digestion and metabolism in the gastrointestinal tract and the supply and requirement of energy and metabolizable amino acids. The third section considers the prediction of feed intake and physical structure of the diet. The fourth section focuses on model evaluation and the final section provides information on the IT solutions and feed ration formulation by a non-linear economical optimization procedure. This book will be of significant interest to researchers, students and advisors of cattle nutrition and feed evaluation.

Improved Cutting Edges for Ice Removal-Wilfrid A. Nixon 1993 Laboratory tests were performed with a hydraulic ice-cutting rig to determine the effects of the geometry of the cutting edge of a snow plow blade on the force required to remove ice from a highway pavement surface. Test results indicated that the most important parameter was the clearance angle, and the associated flat width. Using this information, a prototype cutting edge was designed and fabricated for field testing during the winter of 1991-92. Three different cutting edges were tested: the prototype cutting edge, and two commercially available cutting edges. The prototype cutting edge was shown to be clearly superior to the other two edges, cutting more ice with less downforce and thus resulting in greater vehicle control.
The New Organic Grower-Eliot Coleman 1995-10-01 With more than 45,000 sold since 1989, The New Organic Grower has become a modern classic. In this newly revised and expanded edition, master grower Eliot Coleman continues to present the simplest and most sustainable ways of growing top-quality organic vegetables. Coleman updates practical information on marketing the harvest, on small-scale equipment, and on farming and gardening for the long-term health of the soil. The new book is thoroughly updated, and includes all-new chapters such as: Farm-Generated Fertility—how to meet your soil-fertility needs from the resources of your own land, even if manure is not available. The Moveable Feast—how to construct home-garden and commercial-scale greenhouses that can be easily moved to benefit plants and avoid insect and disease build-up. The Winter Garden—how to plant, harvest, and sell hardy salad crops all winter long from unheated or minimally heated greenhouses. Pests—how to find "plant-positive" rather than "pest-negative" solutions by growing healthy, naturally resistant plants. The Information Resource—how and where to learn what you need to know to grow delicious organic vegetables, no matter where you live. Written for the serious gardener or small market farmer, The New Organic Grower proves that, in terms of both efficiency and profitability, smaller can be better.
Handsaw Essentials-Christopher Schwarz 2013 Once you master the use of handsaws, you'll be awed by the simple power of this humble tool. If you can see and follow a line - any line - you can cut the line. There's no need for crazy setups or jigs; just grab the right saw and start cutting - any angle, any shape. Complex joinery becomes no more than a series of lines to cut on your stock. Yet many woodworkers - both beginners and professionals - are intimidated by handsaws. Handsaw Essentials - compiled from more than a decade's worth of blog entries and magazine articles - will change that. Christopher Schwarz and the editors and contributors to Popular Woodworking help you choose the right saw for your budget and project, use it successfully and keep it cutting like new.

Historic Bottle and Jar Closures-Nathan E Bender 2016-07-01 This book presents a much-needed review of commercial closures for bottles and jars used in America prior to World War II. Archaeological attention to commercial closures has been rather limited. This is surprising given that data derived from bottles and jars pertain to a wide range of studies, including chronological control, trade, site functions, and methods of manufacture. Closures are an integral part of these studies, becoming particularly important after a spectacular variety of metal and glass caps in the late nineteenth and early twentieth centuries. This volume-provides a comprehensive review, including detailed closure definitions, as well as glass finishes;-discusses the history of the development and impact of the hermetic seal in commercial closures;-will appeal to students, professionals, and collectors studying this common historic artifact class.
