Wingfield College and Its Patrons-Peter Bloore 2015 The 650th anniversary of the foundation of Wingfield College was the occasion for a special two-day symposium marking the culmination of a three-year UEA-funded research project into the college and castle. The building projects of the late medieval aristocracy focused on their homes and the monasteries, churches or chantry foundations under their patronage where their family were buried and commemorated. This commemoration allowed a visual celebration of their achievements, status and lineage, the scale and prestige of which reflected on the fortunes of the family as a whole. Wingfield is explored in the context of both the actual building of the castle, chantry chapel and the college, and that of the symbolic function of these as a demonstration ion of aristocratic status. The contributions to this book examine many topics which have hitherto been neglected, such as the archaeology of the castle, which had never been excavated, the complex history of the college's architecture, and the detailed study of the monuments in the church. The latest techniques are used to reconstruct the college and castle, with a DVD to demonstrate these. And the context of the family and its fortunes are explored in chapters on the place of the de la Poles in fifteenth century history, as soldiers, administrators and potential claimants to the throne.

USS Relentless-O'Neil De Noux 2016-03-25 A saga of the US Navy from the Barbary War of 1803 through the War of 1812. In 1803, a young man joins the crew of what will become the most famous frigate of the early US Navy - USS Constitution. From the sands of North Africa during the first Barbary War, across the aquamarine waters of the Caribbean, we follow the exploits of a young American seaman, Alain de Noux. At the outbreak of the War of 1812, Captain de Noux takes the ship he personally designed to sea to fight the mightiest navy in the world - Britain's Royal Navy. USS Relentless is the newest, largest, fastest frigate in the world, her hull coated in resin that allows her to fly across the waves, her radically-designed sails and special chute-sail that acts as a spinnaker pulls the big frigate along at nearly eighteen knots. Armed with weapons far in advance of its time - steel cannons with rifled barrels that propel shells farther than any cannon on any ship, along with special binoculars that aid lookouts to see at night, USS Relentless is a most lethal ship. The ship also carries high caliber shells that explode on contact and special carcass rounds filled with white phosphorous, consuming any ship it strikes in flames. USS Relentless challenges all ships, including the huge British ships-of-the-line, contemporary battleships. Terrorizing the Atlantic for months, Relentless is sent on a more important mission, a mission with no return ticket. She will fly the American flag into combat for the first time across the Indian Ocean, attacking the fat merchant ships of Britain's lucrative East India Company. America does not have the means to invade Britain, but USS Relentless can disrupt her most profitable trade routes. Alain finds success in war and finally meets the woman that will change his world, if only for a short time. In his heart, he knows he will die a young man. It is a race. How many ships can the great raider destroy or capture before the Royal Navy's fleet can destroy her? Along the shoals of the Laccadive Islands, In what the world will call The Battle of the Arabian Sea, USS Relentless must fight an entire fleet in order for

Alain to get back to the love of his life.

The First Americans-James Adovasio 2009-01-16 J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

The Insolent Chariots-John Keats 1958 A wonderful, prescient diatribe on the American automobile industry and the tyranny of the automobile in our cities.

Fabrics of Freedom-C. k. Little 2007-01-01 "Fabrics of Freedom" is the saga of a family whose origins are in the Marches of Scotland. Tragedy, born of the desire to live free, gives birth to one desperate challenge after another as Robbie Liddle is swept toward his destiny on the battlegrounds of America's War for Independence. The deaths of his father and maternal grandfather conspire to send his mother, grandmother, and uncle on the perilous journey across the Atlantic in hopes of founding a tailor shop. This dream was inspired by the contents in his grandfather's chest of tools of the trade. Through shipwreck and financial hardship, they are led to the possibility of freedom in the Township of Leacock, County of Lancaster, Proprietorship of Pennsylvania. In spite of physical challenges, Robbie displays hereditary skills in the demands of tailoring. Bondage to his uncle, however, arouses in him the first yearning for freedom. With his best friend, Robbie flees northeastward to West Jersey. His wit and charm, inherited from the father he never knew, combined with the skills learned at his mother's knee, enable Robbie to find a new kind of freedom in the arms of the maiden who captured his heart--Miss Isabella Barclay. The Jerseys, however, are directly in the path of the coming conflict for a national freedom. Back and forth across what would become the third State among the United States, the forces of the British and the Continentals bloody the soils of this tiny colony. For the sake of freedom from such bondage to England, Robbie enlists in the New Jersey Militia. His military experiences in places like Brandywine and Monmouth and Valley Forge provide fodder for the tales he will spin throughout the rest of his long life. The tailor becomes the teller of tales. Heroes of such world-changing conflicts are not entirely the general officers, but the citizens who answer the call to risk their lives in the cause of freedom. Every chapter of Robbie Liddle's story is loosely connected with the various fabrics and materials with which he worked and in which he and his family dressed. Together they create that wonderful quilt of a life that rejoices in a liberty that is never free.
