Raven's Sword-Adam Baker 2018-09-03 For the Samurai, death is not to be feared. It is to be embraced. Japan 1533 - A nation in turmoil. Rival warlords battle for supremacy while common folk struggle to survive in a land laid waste by endless war. Tengu, an orphaned girl, must navigate the lawless hinterlands if she is to survive and achieve her ambition to become a master swordswoman. Rejected by every school of martial skill, she joins samurai from northern Japan as they converge on a river shrine to take part in a savage tournament, a death-match from which only one can emerge victorious. Will she survive the gladiatorial combat? Or will she meet a bloody end on the arena floor? A taut and heart-pounding novel that takes us deep into the life of combat in Shogunate Japan, Raven's Sword is perfect for readers of David Kirk, James Heneage and James Clavell.

Impact-Adam Baker 2014-07-03 The world is overrun by an unimaginable horror. The few surviving humans are scattered in tiny outposts across the world, hoping for reprieve - or death. Waiting on the runway of the abandoned Las Vegas airport sits the B-52 bomber Liberty Bell, revving up for its last, desperate mission. On board - six crew members and one 10-kiloton nuclear payload. The target is a secret compound in the middle of the world's most inhospitable desert. All the crew have to do is drop the bomb and head to safety. But when the Liberty Bell crashes, the surviving crew are stranded in the most remote corner of Death Valley. They're alone in an alien environment, their only shelter the wreckage of their giant aircraft, with no hope of rescue. And death is creeping towards them from the place they sought to destroy - and may already reside beneath their feet in the burning desert sands. This is the fourth of Adam Baker's thrillers set in the post-apocalyptic world of OUTPOST, JUGGERNAUT and TERMINUS.

Unbroken-Laura Hillenbrand 2014-07-29 Relates the story of a U.S. airman who survived when his bomber crashed into the sea during World War II, spent forty-seven days adrift in the ocean before being rescued by the Japanese Navy, and was held as a prisoner until the end of the war.

China's Rise-C. Fred Bergsten 2009 China has emerged as an economic powerhouse with an increasing role on the world stage. China's Rise will help the United States comprehend the facts and dynamics underpinning China's rise--an understanding that becomes more important with each passing day. Filled with facts for policymakers, this much-anticipated book's accessible style will also appeal to the general reader through its relevant discussion of China's foreign policy, military modernization, economic growth, and energy and the environment.

Plea Bargaining's Triumph-George Fisher 2003 Though originally an interloper in a system of justice mediated by courtroom battles, plea bargaining now dominates American criminal justice. This book traces the evolution of plea bargaining from its beginnings in the early nineteenth century to its present pervasive role. Through the first three quarters of the nineteenth century, judges showed far less enthusiasm for plea bargaining than did prosecutors. After all, plea bargaining did not assure judges "victory"; judges did not suffer under the workload that prosecutors faced; and judges had principled objections to dicker for justice and to sharing sentencing authority with prosecutors. The revolution in tort law, however, brought on a flood of complex civil cases, which persuaded judges of the wisdom of efficient settlement of criminal cases. Having secured the patronage of both prosecutors and judges, plea bargaining quickly grew to be the dominant institution of American criminal procedure. Indeed, it is difficult to name a single innovation in criminal procedure during the last 150 years that has been incompatible with plea bargaining's progress and survived.

Mobile Unleashed-Don Dingee 2015-12-08 This is the origin story of technology super heroes: the creators and founders of ARM, the company that is responsible for the processors found inside 95% of the world's mobile devices today. This is also the evolution story of how three companies - Apple, Samsung, and Qualcomm - put ARM technology in the hands of billions of people through smartphones, tablets, music players, and more. It was anything but a straight line from idea to success for ARM. The story starts with the triumph of BBC Micro engineers Steve Furber and Sophie Wilson, who make the audacious decision to design their own microprocessor - and it works the first time. The question becomes, how to sell it? Part I follows ARM as its founders launch their own company, select a new leader, a new strategy, and find themselves partnered with Apple, TI, Nokia, and other companies just as digital technology starts to unleash mobile devices. ARM grows rapidly, even as other semiconductor firms struggle in the dot com meltdown, and establishes itself as a standard for embedded RISC processors. Apple aficionados will find the opening of Part II of interest the moment Steve Jobs returns and changes the direction toward fulfilling consumer dreams. Samsung devotees will see how that firm evolved from its earliest days in consumer electronics and semiconductors through a philosophical shift to innovation. Qualcomm followers will learn much of their history as it plays out from satellite communications to development of a mobile phone standard and emergence as a leading fabless semiconductor company. If ARM could be summarized in one word, it would be "collaboration." Throughout this story, from Foreword to Epilogue, efforts to develop an ecosystem are highlighted. Familiar names such as Google, Intel, Mediatek, Microsoft, Motorola, TSMC, and others are interwoven throughout. The evolution of ARM's first 25 years as a company wraps up with a shift to its next strategy: the Internet of

Things, the ultimate connector for people and devices. Research for this story is extensive, simplifying a complex mobile industry timeline and uncovering critical points where ARM and other companies made fateful and sometimes surprising decisions. Rare photos, summary diagrams and tables, and unique perspectives from insiders add insight to this important telling of technology history.

Post-Truth and the Mediation of Reality-Rosemary Overell 2019-10-21 Our contemporary moment is preoccupied with arbitrating 'reality'. With the spectre of buzzwords like 'fake news' and 'post-truth' we find a scramble to locate or fix some sort of universal 'real' beneath what are positioned as 'fake' articulations. To engage with this crisis, this collection argues for the importance of a new conjuncture in communication and cultural studies of media. Building on Hall's understanding of 'conjuncture' as a way of grasping moments within hegemonic struggle, the essays suggest that the current moment requires a revitalization of the concept of conjuncture.

Hollyweird Science-Kevin R. Grazier 2015-07-27 Lighthearted, quirky, and upbeat, this book explores the portrayal of science and technology on both the big and little screen -- and how Hollywood is actually doing a better job of getting it right than ever before. Grounded in the real-world, and often cutting-edge, science and technology that inspires fictional science, the authors survey Hollywood depictions of topics such as quantum mechanics, parallel universes, and alien worlds. Including material from interviews with over two dozen writers, producers, and directors of acclaimed science-themed productions -- as well as scientists, science fiction authors, and science advisors -- Hollyweird Science examines screen science fiction from the sometimes-conflicting vantage points of storytellers, researchers, and viewers. Including a foreword by Eureka co-creator and executive producer Jaime Paglia, and an afterword by astronomer and science fiction author Michael Brotherton, Ph.D., this book is accessible to all readers from the layperson to the armchair expert to the professional scientist, and will delight all of them equally.

Readers turn to this guide for its vast array of factual information about the institution and the presidents, as well as for its analytical chapters that explain the structure and operations of the office and the president's relationship to co-equal branches of government, Congress and the Supreme Court. This new edition is updated to include: A new chapter on presidential power Coverage of the expansion of presidential power under President George W. Bush

China's Arctic Ambitions and What They Mean for Canada-P. Whitney Lackenbauer 2017-11-30 China's Arctic Aspirations is the first book to address China's ever increasing interest in the Arctic, and in Canada's Far North in particular. It offers a holistic approach to the subject - covering resource development, shipping, scientific research, governance, and military strategy - to better understand both Chinese motivations and the potential impacts of a greater Chinese presence in the circumpolar region. The book draws on extensive research into published Chinese government documentation, secondary source analysis, business and media reports, and the existing academic literature.

Corruption in Latin America-Robert I. Rotberg 2018-10-19 This book is the newest and one of the very few existing examinations of the full nature of corruption throughout Central and South America. In detailed chapters written by experts with extensive in-country experience, it reveals the political and economic roots and consequences of corruption in Argentina, Bolivia, Brazil, Colombia, Guatemala, Honduras, Mexico, and Peru. The editor's introduction and conclusion texts synthesize their work and provides an over-arching view of corrupt practices and anti-corruption initiatives throughout Latin America. Corruption in Latin America shows the extent to which corrupt practices engulf each of the countries discussed, the involvement of political and corporate entities in the pursuit of ill-gotten gains, and the drag on development caused by corruption in each political entity. The book will be of interest for social scientists, political actors and social activists involved in the fight against corruption in Latin America by providing in-depth analyses of the topic and discussing how best to pursue anti-corruption efforts through civil society actions, judicial endeavors, legal shifts, or elections.

Reading the Male Gaze in Literature and Culture-James D. Bloom 2017-10-06 This book examines the phenomenon of 'the male gaze', a concept which has spread beyond academia and become a staple of cultural conversations across disciplinary boundaries. Male gazing has typically been disparaged and even stigmatized as a reflection of misogyny and an instrument of objectification, often justifiably so. But as this book argues and illustrates, male gazing can also be understood as an illuminating, intellectually engaging, aesthetically compelling, and even politically progressive practice. This study recounts how the author's own coming-of-age as a gazer became the basis for his long career teaching and writing about American fiction and poetry and poetry, canonical and contemporary, as well as about film, painting, TV, and rock-and-roll. It includes closely-reasoned analyses of work by James Baldwin, Rembrandt, Willa Cather, Philip Roth, Henry James, Charles Chesnutt, Bob Dylan, Robert Stone, Tim O'Brien, Edith Wharton, Theodore Dreiser, Frank O'Hara, Italo Calvino, John Schlesinger as well such cultural phenomena as the British Invasion of the 1960s, the Judgment of Paris in Greek mythology, the technology of seeing (kaleidoscopes, microscopes, telescopes) and the concept of 'objectification' itself.

Conservation Catalysts-James N. Levitt 2014 "This multi-author volume explores large-landscape conservation projects catalyzed by colleges, universities, independent field stations, and research organizations around the world. These initiatives are grand-scale, cross-boundary, cross-sectoral, and cross-disciplinary efforts to protect working and wild landscapes and waterscapes in Australia, Canada, Chile, Colombia, Honduras, Kenya, Tanzania, Trinidad & Tobago, and the United States"--

What Technology Wants-Kevin Kelly 2011 Profiles technology as an evolving international system with predictable trends, counseling readers on how to prepare themselves and future generations by anticipating and steering their choices toward developing needs.

A History of Daggett County-Michael W. Johnson (M.S.) 1998-01-01 History of Daggett County, Utah to 1996, written for the state centennial celebration.

A Place of Execution-Val McDermid 2010-04-01 Winter 1963: two children have disappeared off the streets of Manchester; the murderous careers of Myra Hindley and Ian Brady have begun. On a freezing day in December, another child goes missing: thirteen-year-old Alison Carter vanishes from her town, an insular community that distrusts the outside world. For the young George Bennett, a newly promoted inspector, it is the beginning of his most difficult and harrowing case: a murder with no body, an investigation with more dead ends and closed faces than he'd have found in the anonymity of the inner city, and an outcome which reverberates through the years. Decades later he finally tells his story to journalist Catherine Heathcote, but just when the book is poised for publication, Bennett unaccountably tries to pull the plug. He has new information which he refuses to divulge, new information that threatens the very foundations of his existence. Catherine is forced to re-investigate the past, with results that turn the world upside down. A Greek tragedy in modern England, Val McDermid's A Place of Execution is a taut psychological thriller that explores, exposes and explodes the border between reality and illusion in a multi-layered narrative that turns expectations on their head and reminds us that what we know is what we do not know. A Place of Execution is winner of the 2000 Los Angeles Times Book Prize and a 2001 Edgar Award Nominee for Best Novel.

Disney A to Z-Dave Smith 1996 Includes full descriptions of all Donald Duck, Mickey Mouse, Pluto, and Goofy cartoons; the story of Mickey's birth; the Disney Channel Premiere films and Disney television shows; the Disney parks; Disney Academy Awards and Emmy Awards; the Mouseketeers throughout the years; and details of Disney company personnel and primary actors.

Collective Violence and the Agrarian Origins of South African Apartheid, 1900-1948-John Higginson 2014-11-24 This book examines the dark odyssey of official and private collective violence against the rural African population and Africans in general during the two generations before apartheid became the primary justification for the existence of the South African state. John Higginson discusses how Africans fought back against the entire spectrum of violence ranged against them, demonstrating just how contingent apartheid was on the struggle to hijack the future of the African majority.

Cheap-Ellen Ruppel Shell 2009-07-02 A myth-shattering investigation of the true cost of America's passion for finding a better bargain From the shuttered factories of the Rust Belt to the strip malls of the Sun Belt-and almost everywhere in between-America has been transformed by its relentless fixation on low price. This pervasive yet little-examined obsession with bargains is arguably the most powerful and devastating market force of our time, having fueled an excess of consumerism that blights our landscapes, escalates personal debt, lowers our standard of living, and even skews of our concept of time. Spotting the peculiar forces that drove Americans away from quality, durability, and craftsmanship and towards quantity, quantity, and more quantity, Ellen Ruppel Shell traces the rise of the bargain through our current big-box profusion to expose the astronomically high cost of cheap.

Movement and Maneuver-S. Rebecca Zimmerman 2019-03-30 The report examines the cultural characteristics, primary institutional goals, and competitive strategies exhibited by the Army, Navy, Air Force, Marine Corps, and U.S. Special Operations Command.

African Asylum at a Crossroads-Iris Berger 2015-05-15 African Asylum at a Crossroads: Activism, Expert Testimony, and Refugee Rights examines the emerging trend of requests for expert opinions in asylum hearings or refugee status determinations. This is the first book to explore the role of court-based expertise in relation to African asylum cases and the first to establish a rigorous analytical framework for interpreting the effects of this new reliance on expert testimony. Over the past two decades, courts in Western countries and beyond have begun demanding expert reports tailored to the experience of the individual claimant. As courts increasingly draw upon such testimony in their deliberations, expertise in matters of asylum and refugee status is emerging as an academic area with its own standards, protocols, and guidelines. This deeply thoughtful book explores these developments and their effects on both asylum seekers and the experts whose influence may determine their fate. Contributors: Iris Berger, Carol Bohmer, John Campbell, Katherine Luongo, E. Ann McDougall, Karen Musalo, Tricia

Redeker Hepner, Amy Shuman, Joanna T. Tague, Meredith Terretta, and Charlotte Walker-Said.

The Competitive Advantage-Michael E Krivdo 2019-05-23 Volume 8 of the Army University Large Scale Combat Operations series. The Competitive Advantage: Special Operations Forces in Large Scale Combat Operations presents twelve historical case studies of special operations forces from World War I through Operation Iraqi Freedom. This volume sheds light upon the emerging roles, missions, and unique capabilities that have forged a path for Army Special Operations Forces today. These case studies set Large Scale Combat Operations in the center and place ARSOF's role in the forefront. If a reader were to take one piece from this volume, it would be the clear understanding of the close synergy that occurs between the Conventional Force and SOF in Large Scale Combat Operations for major wars in the 20th and early 21st century. That synergy should provide a broad azimuth for military planners and practitioners to follow as the Army, SOF, and the Joint Force combine to preserve the peace, defend the Nation, and defeat any adversary.

Hollyweird Science: The Next Generation-Kevin R. Grazier 2017-08-02 Informative, entertaining and upbeat, this book continues Grazier and Cass's exploration of how technology, science, and scientists are portrayed in Hollywood productions. Both big and small-screen productions are featured and their science content illuminated—first by the authors and subsequently by a range of experts from science and the film world. Starring roles in this volume are played by, among other things, computers (human and mechanical), artificial intelligences, robots, and spacecraft. Interviews with writers, producers, and directors of acclaimed science-themed films stand side by side with the perspectives of scientists, science fiction authors, and science advisors. The result is a stimulating and informative reading experience for the layperson and professional scientist or engineer alike. The book begins with a foreword by Zack Stentz, who co-wrote X-Men: First Class and Thor, and is currently a writer/producer on CW's The Flash.

Man-midwife, Male Feminist-James Wyatt Cook 2004-01-01

The Soil Underfoot-G. Jock Churchman 2014-04-21 The largest part of the world's food comes from its soils, either directly from plants, or via animals fed on pastures and crops. Thus, it is necessary to maintain, and if possible, improve the quality—and hence good health—of soils, while enabling them to support the growing world population. The Soil Underfoot: Infinite Possibilities for a Finite Resource arms readers with historical wisdom from various populations around the globe, along with current ideas and approaches for the wise management of soils. It covers the value of soils and their myriad uses viewed within human and societal contexts in the past, present, and supposed futures. In addition to addressing the technical means of maintaining soils, this book presents a culturally and geographically diverse collection of historical attitudes to soils, including philosophical and ethical frameworks, which have either sustained them or led to their degradation. Section I describes major challenges associated with climate change, feeding the increasing world population, chemical pollution and soil degradation, and technology. Section II discusses various ways in which soils are, or have been, valued—including in film and contemporary art as well as in religious and spiritual philosophies, such as Abrahamic religions, Maori traditions, and in Confucianism. Section III provides stories about soil in ancient and historic cultures including the Roman Empire, Greece, India, Japan, Korea, South America, New Zealand, the United States, and France. Section IV describes soil modification technologies, such as polymer membrane barriers, and soil uses outside commercial agriculture including the importance of soils for recreation and sports grounds. The final section addresses future strategies for more effective sustainable use of soils, emphasizing the biological nature of soils and enhancing the use of "green water" retained from rainfall.

The Disinformation Age-W. Lance Bennett 2020-10-15 This book shows how disinformation spread by partisan organizations and media platforms undermines institutional legitimacy on which authoritative information depends.

Collective Intelligence-Robert David Steele 2015-04-13 The era of collective intelligence has begun in earnest. While others have written about the wisdom of crowds, an army of Davids, and smart mobs, this collection of essays for the first time brings together fifty-five pioneers in the emerging discipline of collective intelligence. They provide a base of tools for connecting people, producing high-functioning teams, collaborating at multiple scales, and encouraging effective peer-production. Emerging models are explored for digital deliberative democracy, self-governance, legislative transparency, true-cost accounting, and the ethical use of open sources and methods. See also INTELLIGENCE FOR EARTH: Clarity, Diversity, Integrity & Sustainability, and THE OPEN SOURCE EVERYTHING MANIFESTO: Transparency, Truth, & Trust.

China's Internal and External Relations and Lessons for Korea and Asia-Jung-Ho Bae, Jae H. Ku 2013-12-31 With the coming of so-called G2 era, guaranteeing cooperation with China is a rising strategic task when it comes to the North Korean problem and Korean reunification. There is a clear limit, however, in guaranteeing Chinese cooperation due to the Republic of Korea (ROK) and China's different perceptions on Korean reunification while economic interdependence between these two states is increasing. In international society, cooperation could be achieved on the basis of shared interests, but issue by issue, shared interests in and of themselves may not be enough. "Strategic leverage," in other words, might be necessary in order to induce some kind of inter-state cooperation. This research was undertaken in the context of the above-mentioned questions, with regard to building up diplomatic leverage that could lead to possible ways to induce Chinese cooperation. This research was undertaken in the context of cooperation with Florence Lowe-Lee at the Global America Business Institute; Dr. Jae H. Ku at the U.S.-Korea Institute at SAIS, Johns Hopkins University; and Professor David Hawk at the City University of New York. Researchers Kwon Hye-Jin, Moon Mi-Young, Ro Young-Ji, An Hyun-Jung (former member) at the Korea Institute for National Unification (KINU) and Wonhee Lee at the U.S.-Korea Institute at SAIS also devoted much effort in making it possible to publish this volume. as did coeditor Dr. Jae H. Ku. As the chief editor of this volume, I sincerely appreciate all these efforts. It is my hope that this research helps academics and experts as well as general audiences better understand the dynamic relationship between core and periphery in China, the relationship between China and its weak neighboring countries, China and international human rights organizations, and North Korean human rights. Cultural Conflict in Hong Kong-Jason S. Polley 2018-03-28 This book examines how in navigating Hong Kong's colonial history alongside its ever-present Chinese identity, the city has come to manifest a conflicting socio-cultural plurality. Drawing together scholars, critics, commentators, and creators on the vanguard of the emerging field of Hong Kong Studies, the essay volume presents a gyroscopic perspective that discerns what is made in from what is made into Hong Kong while weaving a patchwork of the territory's contested local imaginary. This collection celebrates as it critiques the current state of Hong Kong society on the 20th anniversary of its handover to China. The gyroscopic outlook of the volume makes it a true area studies book-length treatment of Hong Kong, and a key and interdisciplinary read for students and scholars wishing to explore the territory's complexities.

China's Maritime Gray Zone Operations-Andrew S. Erickson 2019-03-15 China's maritime "gray zone" operations represent a new challenge for the U.S. Navy and the sea services of our allies, partners, and friends in maritime East Asia. There, Beijing is waging what some Chinese sources term a "war without gunsmoke." Already winning in important areas, China could gain far more if left unchecked. One of China's greatest advantages thus far has been foreign difficulty in understanding the situation, let alone determining an effective response. With contributions from some of the world's leading subject matter experts, this volume aims to close that gap by explaining the forces and doctrines driving China's paranaival expansion, operating in the "gray zone" between war and peace. The book covers China's major maritime forces beyond core gray-hulled Navy units, with particular focus on China's second and third sea forces: the "white-hulled" Coast Guard and "blue-hulled" Maritime Militia. Increasingly, these paranaival forces, and the "gray zone" in which they typically operate, are on the frontlines of China's seaward expansion.

Towards a Just and Ecologically Sustainable Peace-Joseph Camilleri 2020-08-13 This book addresses the need to develop a holistic approach to countering violence that integrates notions of peace, justice and care of the Earth. It is unique in that it does not stop with the move toward articulating 'Just Peace' as a human concern but probes the mindset needed for the shift to a 'Just and Ecologically Sustainable Peace'. It explores the values and principles that can guide this shift, theoretically and in practice. International in scope and grounded in the reality of Indigenous and non-Indigenous Australia and the wider Asia-Pacific context, the book brings together important insights drawn from the Indigenous relationship to land, ecological feminism, ecological philosophy, the social sciences more generally, and a range of religious and non-religious cosmologies. Drawn from diverse disciplinary backgrounds, the contributors in this book apply their combined professional expertise and active engagement to illuminate the difficult choices that lie ahead.
