Bessie Needs Hearing Aids-Jenna Harmke 2020-05-13 Did you child just get hearing aids?Is your child feeling self-conscience about their hearing loss?Bessie Needs Hearing Aids" is a children's book that will help children with hearing loss understand the process, and that they are not alone. Written and illustrated by a teenage girl who went through this process, so it will resonate with children just learning of hearing issues, or coping with wearing hearing aids. The book received numerous accolades so it was decided to make it available to all, in order to possibly help other children with hearing loss.When a child goes through the process of getting hearing aids, it is scary for them and difficult for a parent to explain. This is a story of Bessie, the bunny, who was so excited to start school only to have the kids get frustrated that she was not hearing them properly. Bessie visits the audiologist and learns about hearing aids and the happy results of getting hear aids.

How to Rewire Vintage Sewing Machines-Connie McCaffery 2017-10-19 'How To Rewire Vintage Sewing Machines' is an easy to follow guide for rewiring the original lights, motors and foot controllers on your vintage sewing machines. Also included is how to add a new light, motor and foot controller. For this book, vintage sewing machines pertains to those made through 1960. While the process of rewiring is actually quite simple, it's not for everyone. It's imperative that you are able to identify the hot, cold & neutral wires. You also need to be able to identify which connections these wires are compatible with in the terminal box. When in doubt always seek the advice of a professional. This manual is meant as a reference, not as a substitute for a professional repairman. Let's save vintage sewing machines, one machine at a time.

Continuum Mechanics in the Earth Sciences-William I. Newman 2012-03-15 Continuum mechanics underlies many geological and geophysical phenomena, from earthquakes and faults to the fluid dynamics of the Earth. This interdisciplinary book provides geoscientists, physicists and applied mathematicians with a class-tested, accessible overview of continuum mechanics. Starting from thermodynamic principles and geometrical insights, the book surveys solid, fluid and gas dynamics. In later review chapters, it explores new aspects of the field emerging from nonlinearity and dynamical complexity and provides a brief introduction to computational modeling. Simple, yet rigorous, derivations are used to review the essential mathematics. The author emphasizes the full three-dimensional geometries of real-world examples, enabling students to apply this in deconstructing solid earth and planet-related problems. Problem sets and worked examples are provided, making this a practical resource for graduate students in geophysics, planetary physics and geology and a beneficial tool for professional scientists seeking a better understanding of the mathematics and physics within Earth sciences.

Getting Into Business-Wylie A. Walthall 1987

Titanic-Filson Young 2012-08-07 This was one of the first books to appear after the sinking of the Titanic, published just 37 days after the disaster, and despite the haste it is one of the most stylish and well-written of the early works. Its author, Filson Young, was a respected journalist who had already used his columns in the London Saturday Review and the Pall Mall Gazette to call for better safety at sea, and for all ships to have properly-manned radios. Having sailed the Atlantic himself, and knowing several of the passengers on board the doomed liner, his book combines an imaginative telling of the first few days on board, with a vivid account of the sinking based on early survivor interviews. In 1932 the BBC asked Filson to dramatise the book for radio, but a public outcry forced them to reconsider: even after twenty years, his recreation of the sinking was still too powerful for many of their audience.
