It focuses on the key concepts that help readers understand literature and cultural events in new and provocative ways. Covering a wide variety of iconic and contemporary theorists, the book offers a broad chronological and global overview, including thirty passages from theorists such as Viktor Shklovsky, Roland Barthes, Judith Butler, Diana Fuss, Jean Baudrillard, Kwame Anthony Appiah, Michel Foucault, Monique Wittig, and Eve Sedgwick. It explains, in detail, thirty concepts that help readers make sense of these works and invites students to apply the concepts to a range of writing and research projects. Modern Genre Theory-David Duff 2014-09-11 Since Aristotle, genre has been one of the fundamental concepts of literary theory, and much of the world's literature and criticism has been shaped by ideas about the nature, function and value of literary genres. Modern developments in critical theory, however, prompted in part by the iconoclastic practices of modern writers and the emergence of new media such as film and television, have put in question traditional categories, and challenged the assumptions on which earlier genre theory was based. This has led not just to a reinterpretation of individual genres and the development of new classifications, but also to a radically new understanding of such key topics as the mixing and evolution of genres, generic hierarchies and genre-systems, the politics and sociology of genres, and the relations between genre and gender. This anthology, the first of its kind in English, charts these fascinating developments. Through judicious selections from major twentieth-century genre theorists including Yuri Tynyanov, Vladimir Propp, Mikhail Bakhtin, Hans Robert Jauss, Rosalie Colie, Fredric Jameson, Tzvetan Todorov, Gérard Genette and Jacques Derrida, it demonstrates the central role that notions of genre have played in Russian Formalism, structuralism and post-structuralism, reception theory, and various modes of historical criticism. Each essay is accompanied by a detailed headnote, and the volume opens with a lucid introduction emphasising the international and interdisciplinary character of modern debates about genre. Also included are an annotated bibliography and a glossary of key terms, making this an indispensable resource for students and anyone interested in genre studies or literary theory.

Literary Theory: A Complete Introduction-Sara Upstone 2017-05-04 Literary theory has now become integral to how we produce literary criticism. When critics write about a text, they no longer think just about the biographical or historical contexts of the work, but also about the different approaches that literary theory offers. By making use of these, they create new interpretations of the text that would not otherwise be possible. In your own reading and writing, literary theory fosters new avenues into the text. It allows you to make informed comments about the language and form of literature, but also about the core themes - concepts such as gender, sexuality, the self, race, and class - which a text might explore. Literary theory gives you an almost limitless number of texts to work into your own response, ensuring that your interpretation is truly original. This is why, although literary theory can initially appear alienating and difficult, it is something to get really excited about. Imagine you are standing in the centre of a circular room, with a whole set of doors laid out around you. Each doorway opens on to a new and illuminating field of knowledge that can change how you think about what you have read: perhaps in just a small way, but also perhaps dramatically and irrevocably. You can open one door, or many of them. The choice is yours. Put the knowledge you gain together with your own interpretation, however, and you have a unique and potentially fascinating response. Each chapter in Literary Theory: A Complete Introduction covers a key school of thought, progressing to a point at which you'll have a full understanding of the range of responses and approaches available for textual interpretation. As well as focusing on such core areas as Marxism, Modernism, Postmodernism, Structuralism and Poststructuralism, this introduction brings in recent developments such as Eco and Ethical Criticism and Humanisms.

The Concept of Modernism-Astradur Eysteinnsson 2018-07-05 The term "modernism" is central to any discussion of twentieth-century literature and critical theory. Astradur Eysteinnsson here maintains that the concept of modernism does not emerge directly from the literature it subsumes, but is in fact a product of critical practices relating to nontraditional literature. Intervening in these practices, and correlating them with modernist works and with modern literary theory, Eysteinnsson undertakes a comprehensive reexamination of the idea of modernism. Eysteinnsson critically explores various manifestations of modernism in a rich array of American, British, and European literature, criticism, and theory. He first examines many modernist paradigms, detecting in them a conflict between modernism's culturally subversive potential and its relatively conservative status as a formalist project. He then considers these paradigms as interpretations-and fabrications-of literary history. Seen in this light, modernism both signals a historical change on the literary scene and implies the context of that change. Laden with the implications of tradition and modernity, modernism fills its major function: that of highlighting and defining the complex relations between history and postrealist literature. Eysteinnsson focuses on the ways in which the concept of modernism directs our understanding of literature and literary history and influences our judgment of experimental and postrealist works in literature and art. He discusses in detail the relation of modernism to the key concepts postmodernism, the avant-garde, and realism. Enacting a crisis of subject and reference, modernism is not so much a form of discourse, he asserts, as its interruption-a possible "other" modernity that reveals critical aspects of our social and linguistic experience in Western culture. Comparatists, literary theorists, cultural historians, and others interested in twentieth-century literature and art will profit from this provocative book.

Exploring Cultural Identities in Jean Rhys' Fiction-Cristina Georgiana Voicu 2014-07-24 Using a theoretical approach and a critical summary, combining the perspectives in the postcolonial theory, psychoanalysis and narratology with the tools of hermeneutics and deconstruction, this book argues that Jean Rhys's work can be subsumed under a poetics of cultural identity and hybridity. It also demonstrates the validity of the concept of hybridization as the expression of identity formation; the cultural boundaries variability; the opposition self-otherness, authenticity-fiction, trans-textuality; and the relevance of an integrated approach to multiple cultural identities as an encountering and negotiation space between writer, reader and work. The complexity of ontological and epistemological representation involves an interdisciplinary approach that blends a literary interpretive approach to social, anthropological, cultural and historical perspectives. The book concludes that in the author's fictional universe, cultural identity is represented as a general human experience that transcends the specific conditionalities of geographical contexts, history and culture. The construction of identity by Jean Rhys is represented by the dichotomy of marginal identity and the identification with a human ideal designed either by the hegemonic discourse or metropolitan culture or by the dominant identity. The identification with a pattern of cultural authenticity, of racial, ethnic, or national purism is presented as a purely destructive cultural projection, leading to the creation of a static universe in opposition to the diversity of human feelings and aspirations. Jean Rhys's fictional discourse lies between "the anxiety of authorship" and "the anxiety of influence" and shows the postcolonial era of uprooting and migration in which the national ownership diluted the image of a "home" ambiguous located at the boundary between a myth of origins and a myth of becoming. The relationship between the individual and socio-cultural space is thus shaped in a dual hybrid position.

Theory of Literature-Rene Wellek 2018-09-10 Theory of Literature was born from the collaboration of René Wellek, a Vienna-born student of Prague School linguistics, and Austin Warren, an independently minded "old New Critic." Unlike many other textbooks of its era, however, this classic kowtows to no dogma and toes no party line. Wellek and Warren looked at literature as both a social product--influenced by politics, economics, etc.--as well as a self-contained system of formal structures. Incorporating examples from Aristotle to Coleridge, written in clear, uncondescending prose, Theory of Literature is a work which, especially in its suspicion of simplistic explanations and its distrust of received wisdom, remains extremely relevant to the study of literature today.

Terrorism and Literature-Peter C. Herman 2018-09-13 Terrorism has long been a major shaping force in the world. However, the meanings of terrorism, as a word and as a set of actions, are intensely contested. This volume explores how literature has dealt with terrorism from the Renaissance to today, inviting the reader to make connections between older instances of terrorism and contemporary ones, and to see how the various literary treatments of terrorism draw on each other. The essays demonstrate that the debates around terrorism only give the fictive imagination more room, and that fiction has a great deal to offer in terms of both understanding terrorism and our responses to it. Written by historians and literary critics, the essays provide essential knowledge to understand terrorism in its full complexity. As befitting a global problem, this book brings together a truly international group of scholars, with representatives from America, Scotland, Canada, New Zealand, Italy, Israel, and other countries.

Sound and Literature-Anna Snaith 2020-04-30 What does it mean to write in and about sound? How can literature, seemingly a silent, visual medium, be sound-bearing? This volume considers these questions by attending to the energy generated by the sonic in literary studies from the late nineteenth century to the present. Sound, whether understood as noise, music, rhythm, voice or vibration, has long shaped literary cultures and their scholarship. In original chapters written by leading scholars in the field, this book tunes in to the literary text as a site of vocalisation, rhythmic and dissonance, as well as an archive of soundscapes, modes of listening, and sound technologies. Sound and Literature is unique for the breadth and plurality of its approach, and for its interrogation and methodological mapping of the field of literary sound studies.

The first four chapters address the broad theoretical issues within the field such as 'interliterary theory', decoloniality, and world literature, while the next four are more applied, looking at themes, translation, literary history and comparison with other arts. This engaging guide also contains a glossary of terms and concepts as well as a detailed guide to further reading.

Key Concepts in Feminist Theory and Research-Christina Hughes 2002-09-12 This original and engaging text explores the core concepts in feminist theory. This up-to-date text addresses the implications of postmodernism and post-structuralism for feminist theorizing. It identifies the challenges of this through the development of 'conceptual literacy'. Introducing conceptual literacy as a pedagogic task, this text facilitates students' understanding of, for example: - The range and lack of fixity of conceptualizations and meanings of key terms - The significance of theoretical framework for conceptualization of key terms; - The changing nature of language and the reframing of key terms in research (eg the recent shift from equality to social justice); The text explores these issues through six key concepts in feminist theorizing: equality; difference; choice; care; time; and experience. Each chapter considers the varied ways in which these terms have been conceptualised and the feminist debates about these concepts. Each chapter includes case studies to illustrate the application of these concepts in feminist empirical research, and provides a guide to further reading. This text will be an invaluable tool for students taking courses in feminist theory and research methods, and students across the social sciences who are taking courses concerned with issues of gender.

Literary Theory-Terry Eagleton 1992

Prose Fiction: An Introduction to the Semiotics of Narrative-Ignasi Ribó 2019-12-13 This concise and highly accessible textbook outlines the principles and techniques of storytelling. It is intended as a high-school and college-level introduction to the central concepts of narrative theory - concepts that will aid students in developing their competence not only in analysing and interpreting short stories and novels, but also in writing them. This textbook prioritises clarity over intricacy of theory, equipping its readers with the necessary tools to embark on further study of literature, literary theory and creative writing. Building on a 'semiotic model of narrative,' it is structured around the key elements of narratological theory, with chapters on plot, setting, characterisation, and narration, as well as on language and theme - elements which are underrepresented in existing textbooks on narrative theory. The chapter on language constitutes essential reading for those students unfamiliar with rhetoric, while the chapter on theme draws together significant perspectives from contemporary critical theory (including feminism and postcolonialism). This textbook is engaging and easily navigable, with key concepts highlighted and clearly explained, both in the text and in a full glossary located at the end of the book. Throughout the textbook the reader is aided by diagrams, images, quotes from prominent theorists, and instructive examples from classical and popular short stories and novels (such as Jane Austen's Pride and Prejudice, Franz Kafka's 'The Metamorphosis,' J. K. Rowling's Harry Potter, or Dostoyevsky's The Brothers Karamazov, amongst many others). Prose Fiction: An Introduction to the Semiotics of Narrative can either be incorporated as the main textbook into a wider syllabus on narrative theory and creative writing, or it can be used as a supplementary reference book for readers interested in narrative fiction. The textbook is a must-read for beginning students of narratology, especially those with no or limited prior experience in this area. It is of especial relevance to English and Humanities major students in Asia, for whom it was conceived and written.

Jungian Literary Criticism-Susan Rowland 2018-10-04 In Jungian Literary Criticism: the essential guide, Susan Rowland demonstrates how ideas such as archetypes, the anima and animus, the unconscious and synchronicity can be applied to the analysis of literature. Jung's emphasis on creativity was central to his own work, and here Rowland illustrates how his concepts can be applied to novels, poetry, myth and epic, allowing a reader to see their personal, psychological and historical contribution. This multidisciplinary and transdisciplinary approach challenges the notion that Jungian ideas cannot be applied to literary studies, exploring Jungian themes in canonical texts by authors including Shakespeare, Jane Austen and W. B. Yeats as well as works by twenty-first century writers, such as in digital literary art. Rowland argues that Jung's works encapsulate realities beyond narrow definitions of what a single academic discipline ought to do, and through using case studies alongside Jung's work she demonstrates how both disciplines find a home in one another. Interweaving Jungian analysis with literature, Jungian Literary Criticism explores concepts from the shadow to contemporary issues of ecocriticism and climate change in relation to literary works, and emphasises the importance of a reciprocal relationship. Each chapter concludes with key definitions, themes and further reading, and the book encourages the reader to examine how worldviews change when disciplines combine. The accessible approach of Jungian Literary Criticism: the essential guide will appeal to academics and students of literary studies, Jungian and post-Jungian studies, literary theory, environmental humanities and ecocriticism. It will also be of interest to Jungian analysts and therapists in training and in practice.
