Educational Technology and Pedagogic Encounters-Yusef Waghid 2016-07-15 This book looks at some of the underlying theories of educational technology (means), and ways in which this technology is guided in practice (ends). The authors are intent on producing ends that prepare students to undertake new analyses and evaluations that can result in new possibilities for democratic action. Emphasis is on their understanding of and position within educational technology – as opposed to using or applying educational technology. The work is not written from the point of view that their embeddedness within educational technology has a utilitarian end in mind, but rather that their situatedness within educational technology (a practice in itself) leaves open possibilities for new ways of understanding democratic education. This book is organised into six interrelated themes that work towards the cultivation of educational technology as a human practice which guides pedagogic encounters on the basis of taking risks in relation to which the unexpected, unimaginable is always possible.

Remapping Africa in the Global Space-Edward Shizha 2014-11-26 "What are the benefits and risks for Africa's participation in the globalisation nexus? Remapping Africa in the Global Space is a visionary and interdisciplinary volume that restores Africa's image using a multidisciplinary lens. It incorporates disciplines such as sociology, education, global studies, economics, development studies, political science and philosophy to explore and theorise Africa's reality in the global space and to deconstruct the misperceptions and narratives that often infantilise Africa's internal and international relations. The contributions to this volume are a hybrid of both 'outsider' and 'insider' perspectives that create a balanced critical discourse that can provide 'standard' paradigms that can adequately explain, predict, or prevent Africa's current misperceptions and myths about the African 'crisis' and 'failure' status. The authors provide a holistic, and perhaps, anticolonial and anti-hegemonic perspective that can benefit a wide spectrum of academics, scholars, students, development agents, policy makers in both governmental and non-governmental organisations and engage some alternative analyses and possibilities for socio-politico and economic advancement in Africa. The book provides up-to-date scholarly research on continental trends on various subjects and concerns of paramount importance to globalisation and development in Africa. "The book is brilliant! Remapping Africa in the Global Space: Propositions for Change explores Africa from the perspective of academics specialised in subject matters pertaining to the continent. In this age of globalisation, I find this book invaluable. It is a good read as it dissects analyses and presents issues affecting the continent in an articulate and cogent way. I highly recommend its use in academic institutions!" – Magnus Mfofo-M'Carthy, Assistant Professor, Lyle S. Hallman Faculty of Social Work; Fellow of Tshepo Institute for the Study of Contemporary Africa, Wilfrid Laurier University, Kitchener, Canada "More than anything else, Remapping Africa in the Global Space: Propositions for Change speaks to the complex, multifaceted, and interfused character of the development challenges and prospects of Africa. Indeed, few books have examined contemporary Africa as comprehensively and insightfully as this edited volume; it is widely welcomed in the African academic, scholarly and research arena." – Joseph Mensah, Professor of Geography, York University, Toronto "

Do the Work!-Steven Pressfield 2014-10-28

Evolution Education Around the Globe-Hasan Deniz 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: (a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to peoples' views about evolution, (b) designing, implementing, evaluating evolution education curriculum that reflects contemporary evolution understanding, and (c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed

common background for future evolution education research across the globe.

Study and Master Life Sciences Grade 12 Learner's Book-Annemarie Gebhardt 2007-09-20 Study & Master Life Sciences Grade 12 has been developed with the help of practising teachers and covers all the requirements of the National Curriculum Statement for Life Sciences. Special features of the Learner's Book include: • module openers, which clearly explain to the learner the outcomes for that module • boxes listing key concepts which assist learners whose home language may not be English, to deal with new terms • investigations in which learners solve problems, design solutions, set up tests and controls, and record their results • assessment activities, ensuring continuous self, peer and group assessment • case studies and projects, which deal with issues related to the real world and move learners beyond the confines of the classroom • activities which are structured in a logical way, progressing to new and complex learning.

The Merchant of Venice-William Shakespeare 1965 Harold Bloom on "The Merchant of Venice": "Shylock's prose is Shakespeare's best before Falstaff's...His utterances manifest a spirit so potent, malign, and negative as to be unforgettable."

In Search of History-Jean Bottaro 2011

Language and Literacy in Science Educationa-Wellington 2001-03-01 Science in secondary schools has tended to be viewed mainly as a 'practical subject', and language and literacy in science education have been neglected. But learning the language of science is a major part of science education: every science lesson is a language lesson, and language is a major barrier to most school students in learning science. This accessible book explores the main difficulties in the language of science and examines practical ways to aid students in retaining, understanding, reading, speaking and writing scientific language.

Why Are the Ice Caps Melting?-Anne Rockwell 2006-11-07 The earth is getting hotter, and not just in the summer. The climate of your own hometown is changing. But why is this happening, and can we stop it? Read and find out!

Knowledge, Power and Educational Reform-Rob Moore 2006-10-16 This book is made up of a selection of writings from an international team of scholars, highlighting the contribution made to the field of educational policy and educational policy research by Basil Bernstein's work on the sociology of pedagogy. These contributors explore, analyse and engage with contemporary political reforms of education, contemporary pedagogic debates and the changing nature of professional knowledge, relationships and structures. The subjects covered include: particular concepts such as voice research the significance of social class in relation to the language, schooling and home cultures differences between official and pedagogic recontextualising fields formation of different types of identities the construction of the learner formation of teacher identities and use of pedagogic discourses analysis of performance-based educational reforms and its impact on pedagogy.

Losing Earth-Nathaniel Rich 2020-03-05 By 1979, we knew all that we know now about the science of climate change - what was happening, why it was happening, and how to stop it. Over the next ten years, we had the very real opportunity to stop it. Obviously, we failed. Nathaniel Rich's groundbreaking account of that failure - and how tantalizingly close we came to signing binding treaties that would have saved us all before the fossil fuels industry and politicians committed to anti-scientific denialism - is already a journalistic blockbuster, a full issue of the New York Times Magazine that has earned favorable comparisons to Rachel Carson's Silent Spring and John Hersey's Hiroshima. Rich has become an instant, in-demand expert and speaker. A major movie deal is already in place. It is the story, perhaps, that can shift the conversation. In the book Losing Earth, Rich is able to provide more of the context for what did - and didn't - happen in the 1980s and, more important, is able to carry the story fully into the present day and wrestle with what those past failures mean for us in 2019. It is not just an agonizing revelation of historical missed opportunities, but a clear-eyed and eloquent assessment of how we got to now, and what we can and must do before it's truly too late.

Special Needs Education-South Africa. Department of Education 2001

Biochemicals, Reagents & Kits for Life Science Research-Sigma Chemical Company 2006

Meet Shakespeare!-Jay Heale 1995-09-19 Aimed at both teachers and pupils at higher and lower secondary levels, this lively book offers a practical first introduction to the plays of Shakespeare.

Contemporary Pedagogies in Teacher Education and Development-Yehudith Weinberger 2018-08-22 As with most dynamic activities that are based on social and cultural contexts and rely on interactions, education is a complex and often ambiguous endeavor. Despite this complexity, scholars and educators are often required to find ways of defining and explaining what "good" teaching is and to incorporate these conclusions into teacher education. This book contains eight scholarly articles from various countries around the world and offers unique and up-to-date perspectives on relevant practices and pedagogies for teachers' professional education and development. In this international book, it is argued that there is a significant inspiration and enrichment to be gained by investigating the policies and practices of teacher education systems from all over the world.

Biochemicals and Reagents for Life Science Research-Sigma Chemical Company 1999
